Implementing Digital Signatures using CoSign Software

April, 2017

MDOT is deploying a new method to digitally sign and seal documents. This new process moves away from Adobe digital signatures to a tool called CoSign which will allow for digital signatures and seals. MDOT is encouraging local agencies and their consultants to sign up to use the CoSign tool.

Digital signatures and seals using CoSign will allow local agencies and consultants to submit documents to MDOT electronically during the design process including program applications and design exceptions. Digital signatures are required for e-construction to sign contract modifications and other forms. Ink signatures cannot be mixed with digital signatures.

To request a digital signature user account, download and fill out MDOT form #2122. Email the completed form to MDOT-esign@michigan.gov.

For training videos, software installation instructions or additional information please visit www.michigan.gov/MDOT-esign.

For questions related to requesting a digital signature user account please contact MDOT-esign@michigan.gov.

For any questions related to local agency projects such as the program application or design exception processes please contact Tracie Leix at leixt@michigan.gov or 517-335-2233.
