Final Estimate Review Procedures

The purpose of this construction advisory is to clarify the number of pay items reviewed during a final estimate review.

Construction staff must ensure that the criteria for final estimate reviews is being followed per Bureau of Highway Instructional Memorandum 2011-04. Final estimate reviews must randomly select pay items used on the project. If a pay item is randomly selected for review and it has a final contract value of zero units (or was deleted from the contract) then a different pay item must be randomly selected. When selecting pay items on projects with less than 100 pay items, the number of pay items selected for a review must exceed 10.0 percent of the final number of pay items with a non-zero final contract quantity.

Please share this construction advisory with local agencies and consultants within your jurisdiction as well as TSC staff.
