

For the current MDOT ACT51 County Report system users, please follow the five steps below to manually uninstall the application from your computer.

Step 1: Right click on the Act 51 Reports shortcut icon from your desktop, select Properties. The Act 51 Reports Properties window displays as below:

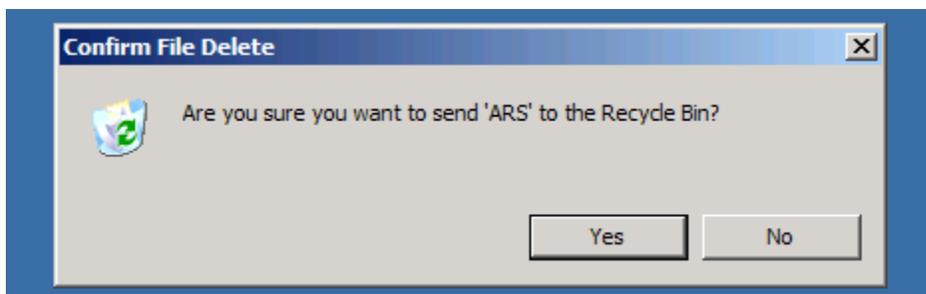

Step 2: Copy all the text from the Start in textbox. In this case, it is C:\act51rpt as the above screen shows. Your actual path might be different due to the folder you selected when installing the application.

Step 3: Right click on the Start button at the lower left corner of your desktop, select Explore to open an Explore window, paste the text you just copied from step 2 to the Address textbox, then hit the Enter key or click the Go button.

Step 4: Delete all the selected files shown as above. The Export Files folder is optional for you to remove. If you decide to remove the Export Files folder and its contents, the Act51Rpt folder will be empty, and you can delete it as well.

Step 5: To remove the shortcut from your desktop, right click on the Act 51 Reports shortcut icon from your desktop, select Delete. Click on the Yes button when system pops up the window to confirm file delete.
