Errata Version of the 2012 Standard Specifications for Construction

This is to advise all designers of the availability of the 2012 Standard Specifications for Construction in an information only PDF version that includes the errata made to date.

When going out on the web to the link for the 2012 Standard Specifications for Construction (<http://mdotcf.state.mi.us/public/specbook/2012/>) you can find a link that will take you to the information only version of the book which includes all errata made to date.

The contractual version will remain the printed Standard Specifications for Construction book plus the current version of the Supplemental Specification 12SS-001A - Errata to the 2012 Standard Specifications.

The new errata version can be helpful guide to remind designers of what errata changes have been made to the Standard Specifications for Construction. The page numbering in the errata version does not correspond to the printed manual but the section, subsection and table numbers correspond to the printed book.

The errata version will be updated each time a new Supplemental Specification is placed on the web.
