

Inspection and Testing on US-24, Metro Region, Oakland TSC, JN's 80916 & 84908

Projects: 63031-80916A and 63031-84908A

US-24 from 8 Mile Road to Long Lake Road

Posting due on 1/19/2010

Question:

Mark, after reviewing the scope of services of the RFP, it appears to be quite difficult to project how many people are needed for this project. Is there some way you can give us a ball park figure of how many people you might need for the project including your personal on the project?

Answer:

The consultant will be required to provide enough inspection staff with engineering assistance to work with the MDOT Engineering and inspection staff to cover the requirements of this project.

The MDOT staff assigned to the project includes a project manager, assistant engineer, staff engineer, 3 senior technicians and 3 staff technicians. This MDOT staff will also be working on the two other Telegraph jobs to the south.
