

Construction Services for Underwater Bridge Inspection at the Mackinac Bridge QA1
Requisition # 833
1-26-12

Q: Is there going to be any Hydrographic Survey?

A: No.

Q: I read the RFP as not requiring a Cost Estimate. Is that true?

A: Once the inspection firm is selected through the quality based selection process, a price proposal will be negotiated.

Q: Is there a requirement for video?

A: No

Q: Is the Secondary Prequalification Classification: "Bridge Safety Inspection" a requirement beyond the Underwater Bridge Inspection Primary Classification? In other words does a consultant need to be Prequalified in both Classifications?

A: The prime consultant needs to be prequalified in "Underwater Bridge Inspection". If the prime does not also have the "Bridge Safety Inspection" prequalification, they may use a subconsultant with that prequalification. Information about MDOT prequalification can be found at <http://www.michigan.gov/mdot>
