

**As needed removal of underground storage tanks at sites where tanks are encountered on
MDOT ROW
QA1
Requisition #1126
1/29/2013**

Q: On page 1 of the Underground Storage Tank removal RFP, under description it states: “As needed asbestos investigations at properties with buildings or bridges slated for demolition or renovation.” I assume that this is an artifact originating from a different RFP and does not belong in the current RFP, correct?

A: The description should read:

As needed underground storage tank removal services where tanks are encountered on road and bridge construction projects.
