

Construction Services for as needed final estimate reviews QA1
Requisition 2021
6/23/2016

- Q: It is our understanding that our project team cannot provide review services on any project with which we have been involved during design or construction. Is it MDOT's intent to select two firms, in the event of any conflict that may arise, or are you seeking firms that do not provide services for any project in this region?
- A: Per BOHIM 2011-04, "Consultants and TSC staff who had involvement in the design or construction of the project shall not be part of the review team." One of the justifications for having two contracts is to reduce or eliminate the possibility of conflict. The contract will not prohibit the consultant from providing consultant services to local agencies on federal or state aid projects.
