

**Design of Environmental Sensor Stations, North Region QA2 4/12/2010  
Proposal Due Date: 4/15/2010**

Previous documentation identified a Location Study for a North Region RWIS network (JN 88065) is that Study available for review?

**Yes, the North Region RWIS Concept of Operations can be found at [www.MDOTITSPlanning.com](http://www.MDOTITSPlanning.com) click on RWIS & TMC concepts and then North RWIS**

Have the preliminary locations (12) been spotted on a map or summarized by potential route/intersection?

**Currently, a design build project is in progress and 12 ESS sites 3, 6, 9, 11, 13, 16, 20, 21, 24, 26, 40 and 42 have been selected. In the RWIS ConOps, Appendix C identifies all 50 locations and their phases. The next 12 locations for JN 105741 REQ 268 will be identified by MDOT with the help of the selected Consultant. ESS sites will most likely be selected from phase 1, phase 2, and possibly phase 3.**

Are CCTV expected at each location?

**CCTV is recommended at ½ the locations, but assume CCTV for most locations.**

Is there an existing network diagram of the existing RWIS system (field to a central server)?

**Network diagrams can be found in the North Region RWIS Concept of Operations at the link described above.**
