

**Design Services to reconstruct Old M-14**  
**Requisition 1083 QA1**  
**12/14/12**

Q1) It appears that street lighting will be impacted along the south side of Old M-14, east of Hines Drive by at least one of the alternatives. Is street lighting a consultant task? Is the Freeway Lighting prequal required?

**A1) The street lights within the project limits are not owned by MDOT. If there is any impact to the street lights, it will be part of the utility coordination effort.**

Q2) The improvements will impact wetlands as detailed in the Final Feasibility Report. Is wetland assessment or wetland design a consultant task? Are those prequals required?

**A2) Any necessary wetland assessment/design will be completed by MDOT as part of the EA (Environmental Assessment) process.**

Q3) Can the existing bridge plans for Hines Dr over Old M-14 and Old M-14 over the Rouge River be provided?

**A3) The existing bridge plans have been uploaded to MDOT's FTP site at the following link: <ftp://ftpmidot.state.mi.us/JN%20110611/as-built%20bridge%20plans/>**
