

Weigh in motion (WIM) design - Mackinac Bridge Req 1268
QA 2
7-19-13

Q: If we participate on the design team will this prevent us from bidding on the project when it is released for bid?

A: Instances like this are handled on a case by case basis. This situation would be reviewed for potential conflicts of interest in Lansing.

Q: Is there a way to see all the engineering firms that could be responding to the RFP (like a bidders list)?

A: The firms actually responding to the RFP are not known until after the proposals are received. Only prequalified firms would be allowed to submit proposals. The firms that are prequalified for the classification listed on the RFP can be found at http://www.michigan.gov/mdot/0,4616,7-151-9625_21540---,00.html

Q: What is the best way to find out the winning engineering firm that is selected.

A: The selection results for this RFP will be found at http://www.michigan.gov/mdot/0,4616,7-151-9625_21540---,00.html This will be posted after the selection has been made and approved.
