

**REQ #1473**  
**Evergreen Road over I-96 and CSX (R01 of 82122) in the City of Detroit, Wayne County**  
**JN 122645**

**Questions and Answers**  
**3/24/2014**

- Question #2 – On page 5 there is mention of getting soil borings for the design of the approach pavement. The P/PMS task list includes task 3530 for Foundation Engineering Report. Is that related to the temporary supports? Or was it related to the signal poles? What was the intent of including the P/PMS task?
  
- Answer #2 – The only borings anticipated for this project are the borings along the bridge approaches, which will be used to develop a proposed pavement design. The P/PMS task was intended to represent the Consultant Team's submittal of the boring information to MDOT.
