

**Design Services for M-60 (spring Arbor Road) from Chapel Road to east of Renfrew Road  
in Jackson County QA2  
Requisition 1806  
7/16/15**

Q) Regarding the short/medium span bridge prequalification and associated tasks, were those intended for the box culvert west of Reynolds Road, the Sandstone Creek structure (B01 of 38061) east of Renfrew near the POB, or both? Has a hydro survey been completed for either of these structures?

(A) The Short and Medium Span Bridge prequalification is intended for the replacement of the culvert approximately 500 feet west of Reynolds Road. The replacement structure will be a box culvert. The hydro survey has been completed.
