

As-Needed road Design Services-Taylor TSC QA1
Requisition 1895
12/14/2015

Question: Is Hydraulic Survey included in this contract? The prequalification was not listed in the RFP; however, the Hydraulic Survey P/PMS Task was checked on the MDOT Preconstruction Tasks Consultant Checklist.

Answer: If a hydraulic survey is required, the survey will be performed by MDOT or under a separate as needed contract. Our as needed design consultant will only perform the hydraulic analysis (as described in attachment A of the RFP). Therefore, the Hydraulics surveys prequal is not required for this project.
