

**Intelligent Transportation Systems services to provide signal modernization design for the  
Grand Traverse County and city QA1**

**Requisition 1955**

**3/21/2016**

Q: In the scope of service for design surveys (Attachment A), it states, “a detailed survey work plan **must** be included in the project proposal.”

Is this carryover language from a previous RFP, or do you really want to see a detailed survey work plan as part of the 7 page proposal?

A: A detailed survey work plan is not required for the project proposal. However, there is the potential for Right of Way needs at some of the intersections to accommodate sidewalk ramps. Proposers should familiarize themselves with the Right of Way maps and identify any obvious impacts within their project proposal. Right of Way maps and existing traffic signal plans are now on the FTP site (follow the link on page 1 of the Scope of Service).
