

**Early Preliminary Engineering Services on I-94 from M-60 easterly to Sargent Road QA1
Requisition #725
9/26/2011**

Q. Does MDOT want the Consultant to prepare preliminary Maintaining Traffic Plans as part of the TTCP/TMP? Attachment C- Section 2.F of the I-94 scoping RFP states that the Consultant shall "create a preliminary Transportation Management Plan (TMP) including a Temporary Traffic Control Plan (TTCP)....." Usually a TTCP includes maintaining traffic plan sheets, however, the specific items further enumerated within Attachment C (Sections 2.F and 2.G, H, and J) reference only "methods" or "recommendations" for maintaining traffic and maintaining traffic Typical, but no maintaining traffic plan sheets. On previous scoping projects we've done, we've been asked to provide preliminary TMP's, EXCEPT that no MOT plan sheets are required for the TTCP, just typicals, recommendations/write-ups and analysis. Is that the intent for your scoping project, as well, OR will the Consultant be required to prepare preliminary MOT plans sheets as part of the TTCP?

A) Maintaining Traffic Plan sheets are not required for the scoping document.
