

EPE Services for Traffic Analysis-Oakland County REQ 638 QA1
5/17/2011

Q1. As far as MDOT's responsibilities, what types of information (and in what formats) will be provided to the consultant for use in the video and other deliverables (i.e. photos, CAD files, etc.)?

A1. Basic project information that can be provided includes: the I-75 corridor engineering reports, the I-75 environmental documents (environmental impact statement, record of decision, interchange access justification, etc.), photographs, other prepared reports, etc. Individual figures used in prior documentation for explanatory purposes (i.e. ramp braid diagram) can also be provided for use in the video. Aerial/digital ortho-photos are also available upon request from 2006 and 2007. Animation is expected to be prepared from the required traffic analysis, comparable technical analysis and/or photographs or aerials to produce the final I-75 video. Information is available in the following formats: adobe, word, excel, tiff, dgn, xhf and jpeg files.
