

Intelligent Transportation Design Services for the Border Wait Time System QA1

Requisition #1047

11/8/2012

- Q1. With Delcan identified as a designated sub, does anything preclude Delcan from also submitting as a Prime? Considering that this is a qualification based selection we don't see any reason we would not be allowed to prime also.
- A1. This does not preclude Delcan from submitting as a prime. The selection is qualification based not price based.**
- Q2. There are currently 4 international land border crossings between Michigan and Ontario; Sault Ste. Marie, Blue Water Bridge, Detroit-Windsor Tunnel and Ambassador Bridge. A fifth crossing is planned for the near future in Detroit. Are all five crossings included within the scope of this assignment?
- A2. The design will be done so that any border crossing in Michigan can utilize the same system.**
