

As Needed engineering and technical support services for MDOT ITS Program Office
REQ 472 QA1
11/24/10

Q. The above RFP does not have "Prequalified Services" checked on the cover sheet. Page one of the Scope of Service does list Intelligent Transportation Systems under Primary Prequalification Classification.

A. This was an oversight on the form, ITS is the Primary Prequalification for this project.

Q. Do we need to be prequalified if we are a sub-vendor.

A. All prequalified work listed must be done by a prequalified firm. However, some specialty work that does not fall under the ITS prequal may be performed by a non-prequalified firm.
