

**CHECKLIST TO DESIGNATE AREAS OF EVALUATION
FOR REQUESTS FOR PROPOSAL (RFP)**
Research Administration Use Only

		REQUISITION NUMBER 1112	DUE DATE 2/25/2013	TIME DUE Noon
MDOT PROJECT MANAGER Corey Rogers		JOB NUMBER (JN) tbd		CONTROL SECTION (CS) n/a
DESCRIPTION Evaluation and Standardization of Accelerated Bridge Construction (ABC) Techniques				
Check all items to be included in RFP			Provide only checked items below in proposal	
Check the appropriate Tier in the box below				
<input type="checkbox"/> TIER I (\$25,000-\$99,999)	<input checked="" type="checkbox"/> TIER II (\$100,000-\$250,000)	<input type="checkbox"/> TIER III (>\$250,000)		
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Understanding of Service	
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Past Performance	
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Qualifications of Team	
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Quality Assurance/Quality Control	
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Location: The percentage of work performed in Michigan will be used for all selections unless the project is for on-site inspection or survey activities, then location should be scored using the distance from the consultant office to the on-site inspection or survey activity.	
N/A	N/A	<input type="checkbox"/>	Presentation	
N/A	N/A	<input type="checkbox"/>	Technical Proposal (if Presentation is required)	

The prime consultant must be a Michigan university. The prime consultant/vendor is responsible for the successful completion of the service and is expected to perform at least 40 percent of the services, by dollar value. The basis of payment is Actual Costs as defined in standard MDOT contracts.

If your organization is interested in providing services, please indicate your interest by submitting a proposal following the **research guidelines** near the top of MDOT's Request for Proposals Web page at http://www.michigan.gov/mdot/0,1607,7-151-9625_32842--,00.html.

RFP SPECIFIC INFORMATION

Problem Title: Evaluation and Standardization of Accelerated Bridge Construction (ABC) Techniques

OR Number: OR14-019

This is Best Value Selection which means the budget amount submitted with the proposal is a component of the proposal score, not the determining factor of the selection.

PROPOSAL SUBMITTAL INFORMATION

PROPOSAL AND BID SHEET EMAIL ADDRESS –

mdot-rfp-response@michigan.gov with a CC to
mdot-research@michigan.gov

GENERAL INFORMATION

Any questions relative to the Research Problem Statement must be submitted by e-mail to:

mdot-research@michigan.gov. Questions must be received by 5 business days prior to the RFP due date at 5:00 p.m. EST. All questions and answers will be placed on the MDOT RFP Web site as soon as possible after receipt of the questions and at least three (3) days prior to the due date listed above. The names of organizations submitting questions will not be disclosed.

MDOT is an equal opportunity employer and MDOT DBE firms are encouraged to apply. The participating DBE firm, as currently certified by MDOT's Office of Equal Opportunity, shall be listed in the Proposal.

MDOT AND RESEARCH FORMS REQUIRED AS PART OF PROPOSAL SUBMISSION:

5100D- Request for Proposal Cover Sheet

Schedule of Research Activities Form- Appendix B

Deliverables Table- Appendix A

Initial Implementation Plan Form- Appendix C

5100J- Consultant Data and Presignature sheet is required for signatory on this proposal

Research Proposal Budget Form Worksheet Appendix D (Universities)

Or

Bid Sheet and Budget Exhibits required in [Priced Proposal Guidelines](#) (Consultants)

MANDATORY ELECTRONIC SUBMITTAL

Proposals submitted for this project must be submitted electronically.

The following are Requirements for Electronic Submittals:

- Proposals must be prepared using the most current Research guidelines found at the top of the page- [MDOT – Research Proposal Guidelines](#).
- The proposal must be bookmarked to clearly identify the proposal sections (See Below)
- For any section not required per the RFP, the bookmark must be edited to include “N/A” after the bookmark title.
- Proposals must be assembled and saved as a single PDF file
- PDF file must be 5 megabytes or smaller
- PDF file must be submitted via e-mail to MDOT-RFP-Response@michigan.gov
- MDOT’s requisition number and company name must be included in the subject line of the e-mail. The PDF shall be named using the following format:
 - **Requisition#XXX_Company Name.PDF**
- MDOT will not accept multiple submittals
- Proposals must be *received* by MDOT on or before the due date and time specified in each RFP

If the submittals do not comply with the requirements, they may be determined unresponsive.

The Proposer will receive an e-mail reply/notification from MDOT when the proposal is received. Please retain a copy of this e-mail as proof that the proposal was received on time.

Proposers are responsible for ensuring the MDOT receives the proposal on time.

****Contact Contract Services Division immediately at 517-373-4680 if you do not get an auto response****

Required Bookmarking Format:

- I. Request for Proposal Cover Sheet Form 5100D
 - a. Consultant Data and Signature Sheet, Form 5100J (if applicable)
- II. Understanding of Service
 - a. Innovations
- III. Qualifications of Team
 - a. Structure of Project Team
 - i. Role of Firms
 - ii. Role of Key Personnel
- IV. Location
- V. Quality Assurance / Quality Control Plan
- VI. Resumes of Key Staff
- VII. Pricing Documents/Bid Sheet (if applicable)

Michigan Department of Transportation

SCOPE OF SERVICE FOR RESEARCH SERVICES Michigan Universities Only

TITLE: Evaluation and Standardization of Accelerated Bridge Construction (ABC) Techniques
OR#: OR14-019

LOCATION: Statewide

WORK DESCRIPTION: Research on Evaluation and Standardization of Accelerated Bridge Construction (ABC) Techniques

ANTICIPATED START DATE: 10/1/2013

ANTICIPATED COMPLETION DATE: 9/30/2015

MDOT RESEARCH PROJECT ADMINISTRATION MANAGER:

Michael Townley, P.E.
8885 Ricks Road
Lansing, Michigan 48917
E-MAIL: mdot-research@michigan.gov

GENERAL INFORMATION:

1. PROBLEM TO ADDRESS:

Through efforts to expedite bridge construction the department is researching accelerated techniques to build bridges faster and impact traffic less. Such techniques as bridge slides, incremental launching, Self Propelled Modular Transports (SPMT) to move or launch bridges or Prefabricated Bridge Element Systems used in conjunction with these techniques are some options to be considered. The most challenging aspect associated with ABC, in particular with moves and slides, is the construction of deep foundations under the existing structure. Evaluating and standardizing deep foundation and substructure construction prior to deconstruction of the existing bridge is necessary to successfully implement an ABC program. Additional design considerations must also be taken into account such as deck reinforcement, tolerances, jacking loads and stability during transport.

2. RESEARCH OBJECTIVES:

- 1.) Review what other states are doing in terms of ABC and monitor any current ABC projects taking place in Michigan at the time of this project.
- 2.) Evaluate methods of substructure construction and constructability issues for utilizing deep foundations outside of existing pier/abutments and the use of precast footing elements and/or post tensioning systems for footing construction
- 3.) Evaluate the constructability issues associated with bridge slides and SPMT's and what are the site conditions necessary (required right of way, allowable elevation changes, size of equipment, availability of equipment, loads, temporary roads) to successfully move bridges
- 4.) Evaluate the costs associated with SPMT moves, bridge slides and unique foundation construction compared to conventional construction. Incorporate impacts to traffic and lane rentals when determining cost to benefit ratios.
- 5.) Identify additional design requirements for moves and slides such as additional deck reinforcement, jacking stiffeners, structural stability during moves, construction tolerances for ABC vs. conventional construction and unique loading characteristics caused from ABC.

3. URGENCY AND IMPLEMENTATION BENEFIT TO MDOT:

ABC will be incorporated into the department's bridge program. These guides will be used to scope structures for ABC and assist designers with ABC design. MDOT will benefit by expediting bridge construction and reducing impacts to traffic that are typical of conventional construction.

4. RISKS OR OBSTACLES TO RESEARCH:

It will be difficult to establish a design STANDARD in ABC. Site conditions and structures vary immensely throughout the state and what works for one structure may not work for the other. Guidelines must take into consideration the degree of variation in conditions across the state.

5. DESIRED QUALIFICATIONS IN AN INVESTIGATOR(S):

The investigator should have experience in bridge construction practices including precast concrete, post-tensioning, substructure design, superstructure design, and construction equipment. There is no statistical qualification requirement for this proposal.

CONSULTANT RESPONSIBILITIES:

- 1.) Literature review to determine what has been successful and what has failed in ABC. Survey other states that have implemented an ABC program and report on methods. Monitoring and evaluation of current MDOT projects (if any) utilizing ABC techniques.
- 2.) Develop scoping guidelines to assist in determining which sites and structures are ideal candidates for ABC, with a focus on bridge moves using SPMT's and slides.

- 3.) Develop a methodology to construct foundations and substructures while existing structures remain in place that takes into consideration MDOT's need for deep foundations such as H-piles or drilled shafts.
- 4.) Analyze the costs associated with ABC versus conventional construction such as a cost to benefit ratio.
- 5.) Prepare final report

Failure of any of the above will be found in noncompliance with the contract.

DELIVERABLES:

- 1.) Guidelines for scoping and design of ABC utilizing SPMT's and slides of superstructures including site limitations that may prevent the use of such equipment.
- 2.) Design details for the construction of deep foundations, footings and substructures while existing structures are in place.
- 3.) A cost analysis comparing ABC to conventional construction.
- 4.) Prepare a training document to train bridge engineers in scoping, designing and constructing bridges using ABC techniques
- 5.) Guidance on reinforcing requirements for structure moves including additional reinforcing, stiffeners, temporary post tensioning, etc.

MDOT RESPONSIBILITIES:

MDOT will provide design standards for structures, access to bridge sites as required. The researchers will be responsible for their own personal protection equipment as required, mobilization, and provide MDOT with advance notice of site visits.

COORDINATION PROCEDURES

Work will be completed in compliance with the Research Implementation Manual

CONSULTANT PAYMENT

All billings for services must be directed to the Department and follow the current Research Implementation Manual. This document contains instructions and forms that must be followed and used for billing. Payment may be delayed or decreased if the instructions are not followed.

Payment to the Consultant for services rendered shall not exceed the maximum amount unless an increase is approved in accordance with the contract with the Consultant.

Direct expenses, if applicable, will not be paid in excess of that allowed by the Department for its own employees in accordance with the State of Michigan's Standardized Travel Regulations. Supporting documentation must be submitted with the billing for all eligible expenses on the project in accordance with the Reimbursement Guidelines. The only hours that will be considered allowable charges for this contract are those that are directly attributable to the activities of this project.

The use of overtime hours is not acceptable unless prior written approval is granted by the MDOT project manager. Reimbursement for overtime hours that are allowed will be limited to time spent on this project in excess of forty hours per person per week. Any variations to this rule should be included in the priced proposal submitted by the Consultant and must have prior written approval by the MDOT project manager.

Compensation for services will be reimbursed on actual cost basis.

PROPOSAL INFORMATION AND SCORING

Formal proposals are required and shall include the information as outlined in these Guidelines. This section is the information required in the proposal that will be used to score the qualifications of each consultant's proposal. The section numbering correlates to the score sheet. Therefore, the consultant should format their proposals consistent with the outline provided.

1. UNDERSTANDING OF SERVICE: 40 POINTS

Describe understanding of the service intended to be proposed. This information is to be based on the scope of services.

Problem Statement and Background Summary- demonstrates good understanding of problem, looks objectively at problem, specifies problem limits and restricts scope appropriately, and cites relevant literature.

Research Plan- cites specific objectives clearly, technical approach responds to all written and implied requirements, difficult areas are identified and details to overcome are given, represents novel idea or technical approach, plan is feasible, and effort is consistent with scope of problem.

Products and Implementation- proposal clearly defines products to be delivered at completion, includes practical, realistic implementation plan.

MDOT Involvement- MDOT involvement is not excessive and is clearly defined and quantified.

2. QUALIFICATIONS OF TEAM: 30 POINTS –

Describe the structure of the project team including the roles of all key personnel and subcontractors. For each subcontractor describe role in service and include what percent of the task that the subcontractor is expected to provide. Provide résumés for each of the key staff of the prime and subcontractor.

Facilities- proposer has adequate access to equipment and/or laboratory required in study.

Staffing- personnel availability is clearly defined, shows a depth of qualified personnel, proposer has ability to manage a project of this size an sufficient resources to complete study, qualifications are directly related to the requirements of the project, plans for specific key personnel assignment included, and there is a reasonable balance between subcontractor and prime contractor.

Statistical Qualification- The required knowledge level for a research team in statistical analyses, if defined, will be in the RFP under the heading DESIRED QUALIFICATIONS IN AN INVESTIGATOR(S).

Proposals not documenting statistical training and experience levels required in the RFP may be classified as non-responsive.

3. RELEVANT PAST PERFORMANCE: 30 POINTS

The project manager will contact references and review relevant performance evaluations from the past 5 years.

Record of past accomplishment- proposer satisfactorily completed past projects, was cooperative and flexible, and ended past projects according to the original budget and time schedule.

4. QUALITY ASSURANCE/QUALITY CONTROL (QAQC) PLAN: 5 POINTS

The proposer provided an outline of a QA/QC process. The QA/QC Manager is experienced with MDOT standards and practices.

5. LOCATION: 5 POINTS

The percentage of work hours performed in Michigan will be used for all selections unless the project is for on-site inspection or survey activity. The combination of location and percentage of work performed in Michigan should not exceed 5 points.

Percentage of Work To Be Done in Michigan Score	
95% to 100%	5
80% to 94%	4
50% to 79%	3
25% to 49%	2
10% to 24%	1
Less than 10%	0

6. PRICE: 40 POINTS

Cost score is based on the lowest cost proposed divided by the current proposer cost multiplied by 40. Lowest bid shall receive 40 points.

TOTAL POINTS: 150
