

Implementation of Unmanned Aerial Vehicles (UAVs) for Assessment of Transportation Infrastructure –
Phase II

OR15-139

Requisition #1864

November 23, 2015

Q: If our proposal contains a subcontractor that currently has an MDOT accepted and approved indirect rate, are they able to use that MDOT approved indirect rate for their budget estimate as a subcontractor, or can they only use that rate when they are the entity applying to MDOT directly?

A: If a subcontractor currently has an MDOT accepted and approved indirect rate, regardless if they are a prime or subcontractor, they must use the approved overhead rate. Per our Contract Services Division, the overhead rate is approved once per company, regardless of the number of contracts.
