

**Subsurface Utility Engineering service in the city of Ironwood QA1 Requisition #813
1/10/12**

Q: Why is prequalification in Right of Way Surveys listed as a requirement for this RFP?
Typically, the survey of utility data is included in the scope for SUE. Therefore, a SUE provider prequalified in SUE should be able to perform the survey necessary to meet the standard of care

A: The SUE proposal includes a survey component. The SUE provider will need to be either prequalified in surveys or team up with a consultant who is.
