

Research Program Services

OR#15-001

Requisition #1811

8/10/2015

Q: Does MDOT anticipate that the workflow will be steady and spread out equally over four years and that the content and information for the deliverables will be provided at regular intervals?

A: It could be considered regular, but sporadic and desiring prompt turn-around times. This is because documents such as spotlights are completed upon completion of particular research projects.

Q: The RFP states a maximum number of articles such as newsletters, spotlights, etc. Is there a minimum number for these same deliverables?

A: There is not a minimum, but the numbers in the RFP for various documents are what we anticipate needing, although we could change course on our outreach methods over the course of the 4 year contract.
