E-VERIFY REQUIREMENTS

E-Verify is an Internet based system that allows an employer, using information reported on an employee's Form I-9, Employment Eligibility Verification, to determine the eligibility of that employee to work in the United States. There is no charge to employers to use E-Verify. The E-Verify system is operated by the Department of Homeland Security (DHS) in partnership with the Social Security Administration. E-Verify is available in Spanish.

The State of Michigan is requiring, under Public Act 200 of 2012, Section 381, that as a condition of each contract or subcontract for construction, maintenance, or engineering services that the pre-qualified contractor or subcontractor agree to use the E-Verify system to verify that all persons hired during the contract term by the contractor or subcontractor are legally present and authorized to work in the United States.

Information on registration for and use of the E-Verify program can be obtained via the Internet at the DHS Web site: <http://www.dhs.gov/E-Verify>.

The documentation supporting the usage of the E-Verify system must be maintained by each consultant and be made available to MDOT upon request.

It is the responsibility of the prime consultant to include the E-Verify requirement documented in this NOTIFICATION in all tiers of subcontracts.

SCOPE OF SERVICE FOR RESEARCH SERVICES

TITLE: Best Practices for Modernizing MDOT Bridge Design Manual, Guides, and Policy Documentation
OR#: 16-006

LOCATION: Statewide

WORK DESCRIPTION: Research on Best Practices for Modernizing MDOT Bridge Design Manual, Guides, and Policy Documentation

ANTICIPATED START DATE: April 1, 2017

ANTICIPATED COMPLETION DATE: April 30, 2018

BUDGET: The budget for this project cannot exceed \$348,391.20.

MDOT RESEARCH PROJECT ADMINISTRATION MANAGER:

Bradley Wagner
425 W. Ottawa
Lansing, Michigan 48909
E-MAIL: mdot-research@michigan.gov

GENERAL INFORMATION:

1. PROBLEM TO ADDRESS

MDOT often makes policy decisions based on past experience, feedback from stakeholders, and the technical expertise of the MDOT Bridge Committee. When decisions are implemented into our manual and guides, they include direction without giving the background for changes. Background information can often be cumbersome to piece together when questions arise or when considering updates to policy.

2. RESEARCH OBJECTIVES

1. Assemble all historical bridge design policy information, research best practices among states and determine a way to document decisions and store information in an easily accessible manner.

3. URGENCY AND IMPLEMENTATION BENEFIT TO MDOT

MDOT will adopt the procedures that result from this research and utilize them in the development and documentation of all future bridge design policy decisions. Completion of this project will make information better organized and more accessible allowing our engineers to have the information available to make more well informed decisions.

4. RISKS OR OBSTACLES TO RESEARCH

Lack of information documenting some policy decisions.

5. DESIRED QUALIFICATIONS IN AN INVESTIGATOR(S)

The investigator must have a thorough understanding of MDOT's Design Manuals and Guides as well as overall MDOT policy and extensive experience designing bridges in Michigan.

There is no statistical qualification requirement for this proposal.

CONSULTANT RESPONSIBILITIES:

1. Determine best practices among state and federal design manuals, and recommend a digital format for the next generation of manuals/guides.
2. Examine available resources (such as Design IM's, Design Standards files, Bridge Committee notes) and interview MDOT experts to determine the background behind all policy reflected in our manual and guides.
3. Recommend procedures and systems for linking policy decision and background with actual policy (such as commentary included in AASHTO Manuals).
4. Propose updates to manuals and guides per steps 1-3 above.

Failure of any of the above will be found in noncompliance with the contract.

DELIVERABLES:

1. Summary of best practices among state and federal manuals and guides
2. Organized documentation of historical policy information from all available sources
3. Recommended procedures and systems for future policy decision documentation
4. Draft updates to manuals and guides corresponding to best practices and the results of this research for adoption by MDOT. (Bridge Design Manual, Bridge Design Guides

MDOT RESPONSIBILITIES:

MDOT will make staff available for interviews, provide access to all historical documentation and provide project oversight.

COORDINATION PROCEDURES

Work will be completed in compliance with the Research Implementation Manual

CONSULTANT PAYMENT

All billings for services must be directed to the Department and follow the current Research Implementation Manual. This document contains instructions and forms that must be followed and used for billing. Payment may be delayed or decreased if the instructions are not followed.

Payment to the Consultant for services rendered shall not exceed the maximum amount unless an increase is approved in accordance with the contract with the Consultant.

Direct expenses, if applicable, will not be paid in excess of that allowed by the Department for its own employees in accordance with the State of Michigan's Standardized Travel Regulations. Supporting documentation must be submitted with the billing for all eligible expenses on the project in accordance with the Reimbursement Guidelines. The only hours that will be considered allowable charges for this contract are those that are directly attributable to the activities of this project.

The use of overtime hours is not acceptable unless prior written approval is granted by the MDOT project manager. Reimbursement for overtime hours that are allowed will be limited to time spent on this project in excess of forty hours per person per week. Any variations to this rule should be included in the priced proposal submitted by the Consultant and must have prior written approval by the MDOT project manager.

The basis of payment is Actual Costs for Universities and Loaded Hourly Rate for Consultants as defined in standard MDOT contracts.

PROPOSAL INFORMATION AND SCORING

Formal proposals are required and shall include the information as outlined in these Guidelines. This section is the information required in the proposal that will be used to score the qualifications of each consultant's proposal. The section numbering correlates to the score sheet. Therefore, the consultant should format their proposals consistent with the outline provided.

1. UNDERSTANDING OF SERVICE: 40 POINTS

Describe understanding of the service intended to be proposed. This information is to be based on the scope of services.

Problem Statement and Background Summary- demonstrates good understanding of problem, looks objectively at problem, specifies problem limits and restricts scope appropriately, and cites relevant literature.

Research Plan- cites specific objectives clearly, technical approach responds to all written and implied requirements, difficult areas are identified and details to overcome are given, represents novel idea or technical approach, plan is feasible, and effort is consistent with scope of problem.

Products and Implementation- proposal clearly defines products to be delivered at completion, includes practical, realistic implementation plan.

MDOT Involvement- MDOT involvement is not excessive and is clearly defined and quantified.

2. QUALIFICATIONS OF TEAM: 30 POINTS –

Describe the structure of the project team including the roles of all key personnel and subcontractors. For each subcontractor describe role in service and include what percent of the task that the subcontractor is expected to provide. Provide résumés for each of the key staff of the prime and subcontractor.

Facilities- proposer has adequate access to equipment and/or laboratory required in study.

Staffing- personnel availability is clearly defined, shows a depth of qualified personnel, proposer has ability to manage a project of this size an sufficient resources to complete study, qualifications are directly related to the requirements of the project, plans for specific key personnel assignment included, and there is a reasonable balance between subcontractor and prime contractor.

Statistical Qualification- The required knowledge level for a research team in statistical analyses, if defined, will be in the RFP under the heading DESIRED QUALIFICATIONS IN AN INVESTIGATOR(S).

Proposals not documenting statistical training and experience levels required in the RFP may be classified as non-responsive.

3. RELEVANT PAST PERFORMANCE: 30 POINTS

The project manager will contact references and review relevant performance evaluations from the past 5 years.

Record of past accomplishment- proposer satisfactorily completed past projects, was cooperative and flexible, and ended past projects according to the original budget and time schedule.

4. QUALITY ASSURANCE/QUALITY CONTROL (QAQC) PLAN: 5 POINTS

The proposer provided an outline of a QA/QC process. The QA/QC Manager is experienced with MDOT standards and practices.

5. LOCATION: 5 POINTS

The percentage of work hours performed in Michigan will be used for all selections unless the project is for on-site inspection or survey activity. The combination of location and percentage of work performed in Michigan should not exceed 5 points.

Percentage of Work To Be Done in Michigan Score	
95% to 100%	5
80% to 94%	4
50% to 79%	3
25% to 49%	2
10% to 24%	1
Less than 10%	0

6. PRICE: 40 POINTS

Cost score is based on the lowest cost proposed divided by the current proposer cost multiplied by 40. Lowest bid shall receive 40 points.

TOTAL POINTS: 150
