

**Specialty Services to Provide Consultant Services to Perform Owners Representative  
Duties  
I-75 Modernization Project QA2  
Requisition #1457  
March 11, 2014**

**Question:**

What types of tasks or specialty services does MDOT anticipate for this project that might require the selection of an independent consultant not part of the ORC team to provide?

**Answer:**

There are no specialty services known or anticipated at this time. However, in the event that some sort of specialty service is identified and needed during the course of the contract that is not within the purview of the ORC Team, then MDOT would like to reserve the right to hire the appropriate, expertise to conduct that specific task or specialty service.
