

**Scope of Services for Specialty Services Transportation
Surveys (Mobile LiDAR) for Asset Mapping REQ#1532
REVISED QA1**

6/3/2014

Question 1: Does a firm who provides mobile LiDAR mapping, need to be prequalified? Does a firm who provides mobile LiDAR mapping need to be prequalified if they will be sub-consulting to the Prime firm and the Prime firm has Prequalification in Road Design Surveys and the primary prequalification categories listed in the RFP?

Answer 1: If the prime does NOT have mobile LiDAR capabilities, then they must subcontract with a firm that possesses this capability and is prequalified in the classification(s) shown in the scope.

The scope was revised to include the Photogrammetry Prequalification **as precautionary**.
