

**Evaluation of Bridge Decks using Non-Destructive Evaluation (NDE) at Near
Highway Speeds for Effective Asset Management OR10-043 QA1
Requisition #842
2/14/2012**

Q: I respectfully request clarification on exactly what the page limit for 'Evaluation of Bridge Decks Using Non-Destructive (NDE) at Near Highway Speeds for Effective Asset Management' (OR10-043) should be; I see in the 5100B form (Checklist to Designate Areas of Evaluation for RFP) that Tier II requires 7 pages; while the research proposal guideline requires 20 pages.

With the exception of what is excluded from the overall page count, I am confused as to the correct amount of pages to submit.

A: You should submit 20 pages as requested in the research proposal guidelines.
