

**Evaluating Prestressing Strands and Post-Tensioning Cable in Concrete Structures using Nondestructive Evaluation (NDE) methods-OR10-038 QA1  
Requisition #841  
2/14/2012**

Q: Regarding the RFP, Freezing and Thawing of Frost-Susceptible Soils – Development of a Reliable Predictive Model OR10-047, the page limit for the proposal is listed as 3 pages. Does this mean that the qualifications of the team, past performance, quality assurance/quality control and location must be summarized in 3 pages with an understanding of service optional AND include these forms?

**A: Please submit 20 pages as requested in the research proposal guidelines.**
