DEPARTMENT OF TRANSPORTATION
LANSING

JENNIFER M. GRANHOLM
GOVERNOR

KIRK T. STEUDLE
DIRECTOR

December 19, 2008

Interested Parties:

We are pleased to present the annual report on the activities and progress of the Michigan Transportation Economic Development Fund (TEDF). The program's mission is to fund transportation improvements that support private investment and create and retain Michigan jobs.

The Office of Economic Development (OED) which administers the fund, coordinates extensively with the Michigan Economic Development Corporation (MEDC) to provide necessary infrastructure improvements across the state. These investments are critical to the movement of people and products; getting workers to jobs, materials to growers and manufacturers, and finished goods to consumers.

The TEDF serves as a catalyst for the economic growth of the state and helps Michigan compete in the international economy of the 21st century. For further information on the fund, please contact:

Michael B. Kapp, Administrator
Office of Economic Development
P.O. Box 30050
Lansing, MI 48909
(517) 335-1069
www.michigan.gov/tedf

I respectfully submit for your review the TEDF Annual Report for Fiscal Year 2008. The Michigan Department of Transportation and the OED look forward to continuing our work with local government and business partners to bring new industry and new jobs to Michigan.

Sincerely,

A handwritten signature in cursive script that reads "Kirk T. Steudle".

Kirk T. Steudle
Director

CATEGORY A - TARGET INDUSTRY DEVELOPMENT

The Transportation Economic Development Fund was established to create a funding mechanism to respond quickly to immediate, non-speculative economic development opportunities. Category A improves and builds roads, streets, and highways that are integral to the establishment, retention, and expansion of companies in target industries in Michigan. Those industries are:

- Agriculture or food processing
- Tourism
- Forestry
- High technology research
- Manufacturing
- Mining
- Office centers of not less than 50,000 square feet

Specifically, the Category A program has four objectives:

- ⊖ Improve the network of highway services essential to economic competitiveness.
- ⊖ Improve accessibility to target industries as a catalyst for economic growth.
- ⊖ Support private initiatives that create or retain jobs.
- ⊖ Encourage economic developments that improve the health, safety, and welfare of Michigan citizens.

Under Category A, the OED receives applications for grants to construct road projects necessary to support the creation or retention of jobs in target industries. Applications are evaluated according to a cost versus benefits analysis to determine the merits of public grant participation. Eligible applicants for Category A grants are the Michigan Department of Transportation, county road commissions, and cities and villages.

During FY 2008, 22 projects were evaluated and approved for funding. The projects represent a public investment of over \$17 million, servicing private industry development of over \$3.9 billion and creating and/or retaining 4,767 jobs. In addition to supporting new development and new jobs, some of the grants also support the redevelopment of areas that have been adversely affected by the closure of industry and the loss of existing jobs.

A map showing the location of the approved grants is included on page 3. In addition, see page 4 for a list of Category A grants that were approved during FY 2008 and the status of projects approved during FY 2007.

ECONOMIC DEVELOPMENT FUND

MICHIGAN DEPARTMENT OF TRANSPORTATION

OVERVIEW

Attracting industry to locate in a community frequently requires timely investments in road improvements. When resources and processes are inadequate to support those improvements, development opportunities and jobs are lost. Enacted in 1987, the **Transportation Economic Development Fund (TEDF)** was created to assist in the funding of highway, road, and street projects, necessary to support economic growth. The program mission is to serve as a catalyst for economic growth and enhance the state's ability to compete in the global market place, while improving the quality of life for the residents of the great State of Michigan. The fund was reauthorized with minor revisions in 1993.

The fund, which is administered through the Office of Economic Development (OED), provides a means for state government, local agencies, and businesses to work together to meet the often extensive and urgent demands placed upon the transportation system by further developing the economy throughout the state. Eligible road agencies include the Michigan Department of Transportation, county road commissions, and cities and villages.

The types of projects eligible for TEDF assistance are:

- Category A** - Road projects related to target industry development and redevelopment opportunities.
- Category C** - Reduction of traffic congestion in urban counties.
- Category D** - Road improvements in rural counties to create an all-season road network.
- Category E** - Road improvements essential to the development of commercial forests in Michigan.
- Category F** - Road and street improvements that support an all-season road network in cities in rural counties.

The above five categories support projects that complement each other in achieving the overall program mission. Category B was eliminated when the program was reauthorized in 1993.

CATEGORY A GRANTS APPROVED FY 2008

County	Project Location	Transportation Project	Grant Amount
Allegan	Allegan	M-222 / Grand St	\$575,000

Of the fourteen projects approved, 11 have been constructed, and 3 are currently in the construction phase. Every effort is made to determine whether the transportation need of the company(ies) has been met. This follow-up is accomplished with company surveys and site visits after project completion.

Following is an example of a project that was critical to the creation or retention of jobs in Michigan.

**City of Lansing, Ingham County
Capital City Boulevard
Peckham, Inc.**

The project called for new median cuts on Capital City Boulevard with required turn lanes. This mitigated the impact to the through northbound traffic accessing the airport. In addition, a bus pull-off lane was constructed on Capital City Boulevard for Capital Area Transportation Authority line haul buses, allowing the northbound through traffic an unobstructed flow, creating safer conditions for bus passenger safety while egressing the buses. Finally, due to the additional anticipated traffic, Capital City Boulevard between Grand River and the CSX Transportation railroad tracks was resurfaced in order to preserve and extend the pavement life.

Peckham is a private non-profit agency that provides job opportunities to persons with disabilities and other barriers to employment. Peckham's largest line of business is apparel manufacturing, providing cold weather clothing systems to the military and other customers. Peckham's mission is to provide a wide range of opportunities for persons striving for independence and self-sufficiency. This new building will help develop more than 200 jobs in apparel manufacturing.

Before and After:
Peckham, Inc.

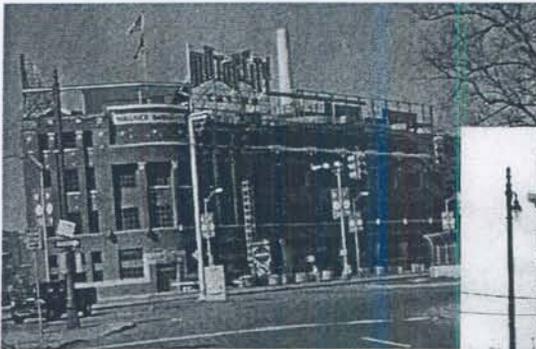

Before and After:
Capital City Boulevard facing North

**City of Detroit, Wayne County
M-10 at Grand River Avenue
MotorCity Casino**

The expansion of the MotorCity Casino development promised to increase traffic in an already congested situation. To alleviate the traffic problems, the road project widened the southbound M-10 exit ramp at Grand River to improve traffic flow into the casino development. The project also modified the intersection of the northbound Service Drive and Grand River Avenue/Temple Street, including a new traffic signal layout. This allows traffic exiting the development a more direct access to the northbound service drive and northbound M-10.

MotorCity Casino recently completed its \$300 million dollar expansion project. The expansion increased the gaming floor to 100,000 square feet. The expansion project included the construction of a 400 room hotel with 40,000 square feet of convention space as well as the addition of a 1,886 seat entertainment theatre. To handle additional traffic generated by expansion, the casino also added a 900 car garage to their site. This expansion is expected to result in an increase of 400 jobs at the facility.

CATEGORY B - STATE TRUNKLINE SERVICE - DISCONTINUED

Category B, which provided for state trunkline service that would replace city or county service, is no longer eligible for funding through the Transportation Economic Development Fund. Category B was eliminated in 1993 when the TEDF was re-authorized.

CATEGORY C - URBAN CONGESTION RELIEF

Funding is available through the Transportation Economic Development Fund for projects to reduce congestion on county primary and city major streets in urban counties. Eligible counties are those with a population greater than 400,000 (Wayne, Oakland, Macomb, Genesee, and Kent). Federal Equity Bonus and state funds are allocated to eligible counties by a percentage set in law for their specific population. The overall goal of Category C is to promote increased economic potential and improve the quality of life by reducing urban traffic congestion levels.

Specifically, the Category C program has three objectives:

- Improve the operational level of service in heavily congested areas.
- Reduce the accident rate on heavily congested roadways.
- Improve the surface and base condition of heavily congested roadways.

In order to determine that these objectives will be met by improvements funded with Category C monies, Metropolitan Planning Organizations (MPOs) conduct regional analyses to determine traffic levels, air quality levels, and accident information of all roads in their areas. This information is used by their federal aid sub-committees responsible for prioritizing projects for federal funding. Local public hearings are also held to determine the social, economic, and environmental concerns of local residents. This information is included in the planning and development process. Based on this information, projects are recommended by the Metropolitan Planning Organization's (MPO) for Category C funding and included in the annual Transportation Improvement Plan (TIP) for the area. Department liaisons in the Bureau of Transportation Planning work with the MPOs in this regard and provide the subsequent TIP information to the OED.

Once projects are completed, surface and base conditions are updated on local pavement management systems. Average daily traffic counts are done annually and the local transportation modeling system is updated using the current counts. These tools are used to determine the degree to which the projects funded have achieved the objectives for Category C.

It should be noted that all five counties have requirements under the non-attainment or maintenance designations for USEPA's 8 hour Ozone Ambient Air Quality Standard. Category C projects were, and continue to be, important contributors to the air quality benefits achieved in the transportation program by reducing traffic congestion and improving the operational level of service for roads which were heavily congested.

A list of Category C projects approved during FY 2008 is listed on page 9. A report on the status of Category C projects approved during the previous fiscal year (FY 2007) follows. The project cost listed may include non-Category C funds.

CATEGORY C PROJECTS IN THE FY 2008 TIP

Macomb	North Ave	North Ave	\$2,400,000	Complete

CATEGORY D - RURAL COUNTIES SECONDARY ALL-SEASON ROAD SYSTEM

Category D of the Transportation Economic Development Fund was created to establish a local all-season road system to link communities with the state trunkline system.

Specifically, the Category D program has two objectives:

- Complement the existing state trunkline system with improvements on connecting local routes with high commercial traffic.
- Minimize disruptions resulting from seasonal load restrictions.

During FY 2008, 73 projects were selected for the FY 2008 State Transportation Improvement Program (STIP). These projects will allow the addition or improvement of nearly 115 miles of all-season roads in the state. The addition of uninterrupted, year-round access provided by these routes will complement the state trunkline system, minimize disruptions and delays in transporting goods to market, and assist the transport of goods by various transportation modes.

Federal Equity Bonus and state funds are allocated to the 78 rural counties based on their relative share of the total rural primary road mileage in the state. The counties work together through regional rural task forces to provide coordination across county lines. A department liaison with the Bureau of Transportation Planning works with the task forces to identify projects appropriate for Category D funding and submits this information to the OED. Whenever possible, projects are coordinated with Category F (cities in rural counties) projects to establish all-season system continuity within cities and villages.

A list of Category D projects approved during FY 2008 is included on pages 11-12. A report on the status of Category D projects approved during the previous fiscal year (FY 2007) is included on pages 12-14. The project cost listed may include non-Category D funds.

CATEGORY E – FOREST ROADS

Category E of the Transportation Economic Development Fund was established to aid in the safe and efficient collection and transport of forest raw materials.

Specifically, the Category E program has two objectives:

- Increase access to harvestable forest resources.
- Increase the safety and efficiency of forest raw material transport.

Category E funding is limited to county road commissions to counties in which a national lakeshore or national park is located or in which 34 percent or more is commercial forest land.

Funds are distributed by the Department directly to the county road commission in each of the 47 qualified counties. A report on the amount of FY 2008 Category E revenues allocated to eligible counties is listed below.

CO	COUNTY	AMOUNT	CO	COUNTY	AMOUNT	CO	COUNTY	AMOUNT
1	Alcona	\$100,023	27	Gogebic	\$202,298	56	Midland	\$48,136

24	Emmet	63,702	54	Mecosta	40,042	83	Wexford	81,683
26	Gladwin	62,919	55	Menominee	161,016			
YEARLY TOTALS: \$5,000,000								

The county road commission determines which road projects will be funded with Category E funds; however, the projects must be directly related to the collection and transport of forest raw products. Distribution is based on the percentage of acres of commercial forest, national park, and lakeshore land that each eligible county contains relative to all qualified counties in the state.

Each county road commission receiving Category E funds submits a report on a calendar year basis. These reports include information on the road improved, the type of work involved, and the cost of the improvements. A list of Category E road improvements during FY 2007, the latest year available, is included on pages 16-23.

CATEGORY F - CITIES IN RURAL COUNTIES

In order to provide a network of all-season roads, urbanized areas in rural counties need to link up to the all-season roads funded through Category D. Category F was established to provide road improvements in cities with a population of 5,000 or greater in the 78 rural counties eligible for Category D. Category F projects are selected by the Office of Economic Development from applications submitted by eligible cities.

Specifically, the Category F program has three objectives:

- Improve all-season capabilities on routes having high commercial traffic.
- Improve access to the state trunkline system.
- Coordinate with the secondary all-season system (Category D) or provide all-season routes within a city.

Category F grants allow the addition of miles to or the preservation of, the all-season road network in this state. The addition of uninterrupted year-round access provided by these routes will complement the state trunkline system, improve safety for routes with high commercial traffic, and assist commerce to transport goods using various transportation modes.

Following is a list of Category F projects approved for FY 2008. In addition to the grant amounts listed, local communities provide at least 20% of the total cost in local matching funds.

CATEGORY F PROJECTS APPROVED IN FY 2008

County	Project Location	Transportation Project	Grant Amount
Calhoun	Emmett Township	H Drive North Connector	\$339,872
Muskegon	Fruitport Township	Dangl Road	\$361,600
Alpena	City of Alpena	Long Rapids Road	\$375,000
Calhoun	Albion	Clark Street	\$375,000
Montcalm	City of Greenville	Greenville West Drive	\$305,000
Kalamazoo	Pavilion Township	South Avenue	\$375,000
Gogebic	City of Ironwood	Greenbush Street	\$175,200

STATUS OF CATEGORY F PROJECTS APPROVED IN FY 2007

County	Project Location	Transportation Project	Grant Amount	Status of Construction
Dickinson	Breitung Township	Lincoln Street/Third Street	\$234,400	2009 Construction
Ionia	City of Belding	Ellis & Bridge Street (Old M-91)	\$375,000	Complete
Jackson	Summit Township	Spring Arbor Road	\$288,000	Complete
Manistee	City of Manistee	Old US 31, Sibben & Fifth Sts	\$232,000	Complete
Mecosta	City of Big Rapids	Maple Street	\$375,000	Complete
Midland	Village of Sanford Muskegon Hts. &	Meridian Road	\$375,000	2009 Construction
Muskegon	Muskegon	Park Street	\$192,000	Complete
Saginaw	City of Saginaw	Johnson Street	\$375,000	Complete

After projects are completed, the Office of Economic Development makes a follow-up site visit. Following is an example of a project that was important in expanding and maintaining Michigan's all-season road network.

City of Alpena, Alpena County
Long Rapids Road

The City of Alpena repaired nearly one mile of Long Rapids Road from the Tendercare Driveway to US-23(Chisolm Street). This project included the widening and reconstruction of the roadway, which provides a bypass of the city's downtown area for commercial truck traffic. The \$622,000 project received \$375,000 from the state TEDF.

Before and After:
Long Rapids Road
