

Training Wheels On-Road Bicycle Facility Design Training

Training Wheels

Training Wheels is an educational course on the planning and design of on-road bicycle facilities. It will consist of two hours of classroom instruction on the AASHTO Guide for the Development of Bicycle Facilities, followed by an on-road, *on bike portion*. During this portion we will casually ride through the community, analyzing types of on-road facilities available. There will be many stops to point out potential facility types, followed by a group exercise and discussion, questions from participants and a brief wrap-up.

Class is intended to accommodate all levels of users. Please dress appropriately as we will bike, rain or shine.

Class Size: Maximum of 25

Instructors: John LaPlante, P.E., P.T.O.E., Vice President, Chief Transportation Planning Engineer of T.Y. LIN International

Mr. LaPlante was the principal author of the current AASHTO Guide for the Development of Bicycle Facilities (1999).

Mike Amsden, AICP, T.Y. LIN International

Required Materials: A bicycle and helmet are required. Please let us know if you need assistance in obtaining these for the class.
