Long-term Benefits

Construction on US-12 will enhance the downtown community and provide long term infrastructure improvements.

How Will We Keep Motorists Informed?

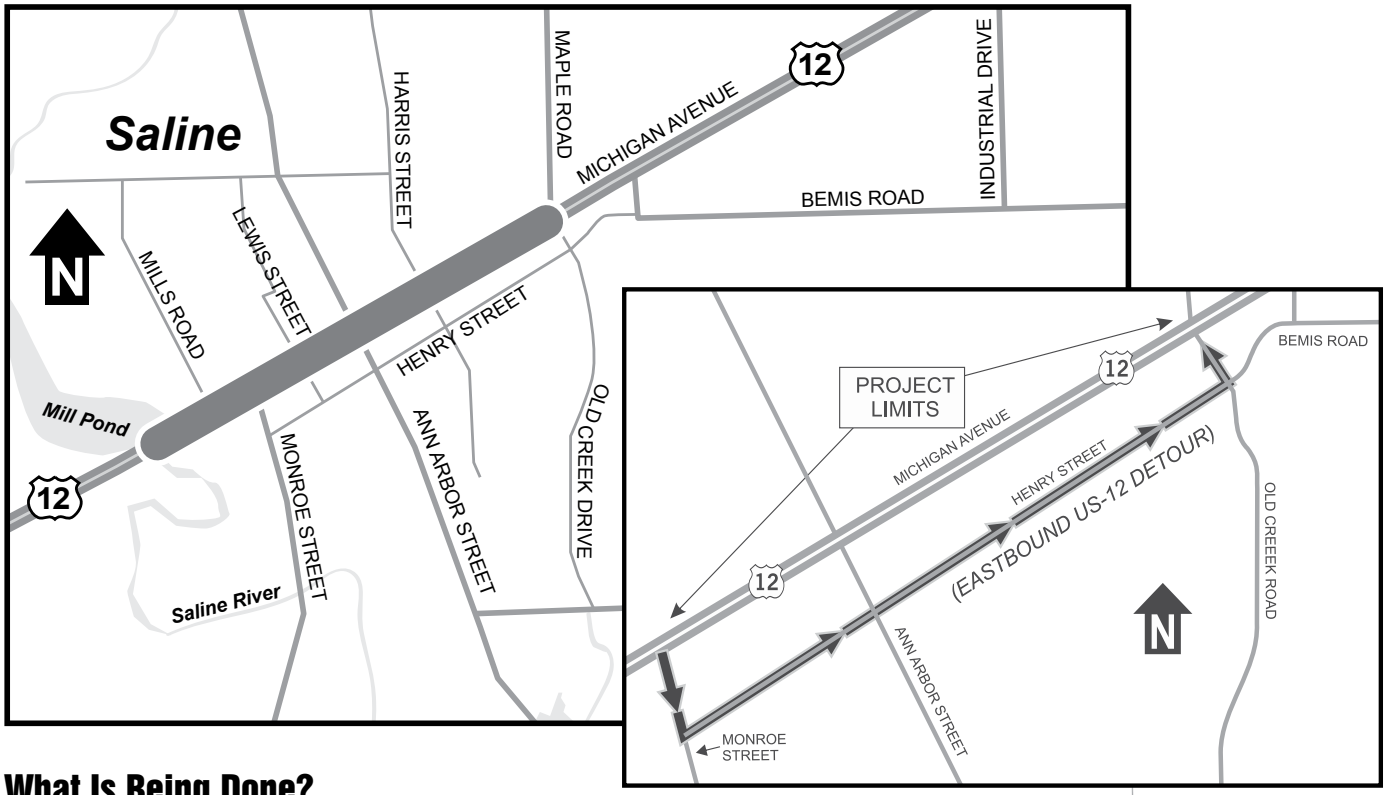
Construction and Motorist Information

April - November 2016



How Will Traffic Be Affected?

During construction, only one lane of westbound traffic will be open between Monroe Street and Maple Road, with eastbound traffic detoured using Henry Street. Henry Street will be resurfaced after construction on US-12 is complete.

One lane will be open in each direction between the bridge and Monroe Street. There also will be short-term intersection closures with a detour posted.

Temporary traffic signals will be in place on Henry Street at Ann Arbor Street, Harris Street and Old Creek Drive. Trucks will be encouraged to use M-50 or I-94, as oversized loads will be prohibited along US-12 during construction.

The roadway is expected to reopen to two-way traffic with construction complete by November. Final restoration will take place in spring 2017.

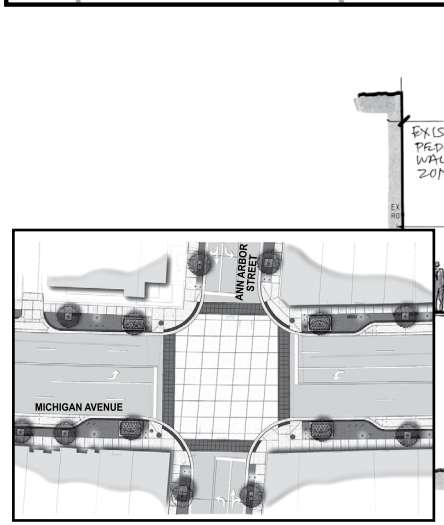
What Is Being Done?

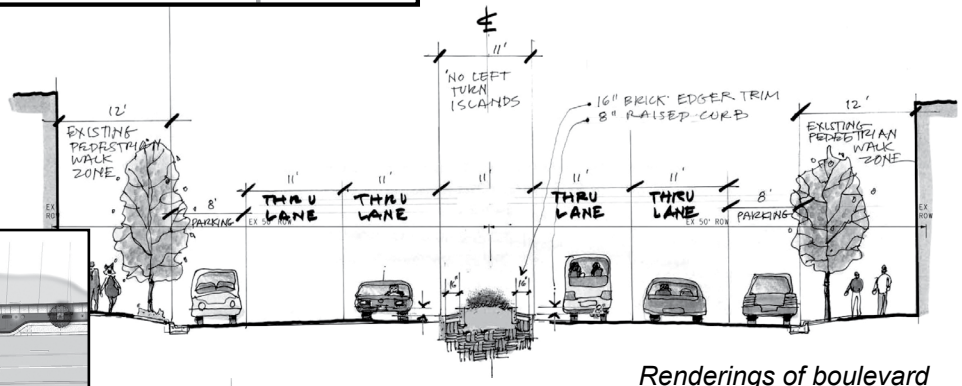
The Michigan Department of Transportation (MDOT) will reconstruct US-12 (Michigan Avenue) in downtown Saline from N. Maple Road/Old Creek Drive to the bridge over the Saline River. Work includes widening US-12 to five lanes between Monroe Street and Harris Street to add a center turn lane, storm and sanitary sewer and water main upgrades, sidewalk improvements, and traffic signal upgrades.

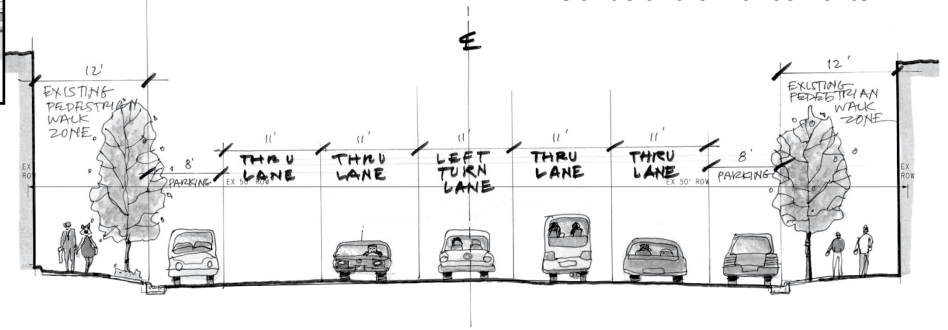
In addition, downtown amenities will be updated as part of a streetscape enhancement grant in partnership with the City of Saline. These upgrades include tree removal and replacement, enhanced crosswalks at major intersections, the addition of mid-block islands, and enhanced lighting along the corridor.

When Will This Be Done?

Work on this project begins in April and is expected to be finished in November.







Renderings of boulevard islands and enhancements.
