## High Tension Cable Barrier Repairs

The Traffic Operations Section is initiating a research project on High Tension Cable Barrier (HTCB). As part of this project, researchers will perform a cost benefit analysis and a life-cycle cost for all existing and future HTCB installations. We anticipate that the maintenance of these systems will be a major contributor to the overall cost. In order to ensure that maintenance cost data is available when this research project starts we need your assistance.

A new Maintenance Performance Guide, Guardrail Repair: Cable, Activity # 13100 was introduced on 02/2010. Please make sure that Direct Forces and Contract Agencies are charging to this activity number for all HTCB repairs.
