DATE:       June 16, 1995

TO:         District Engineers
             District Field/Construction Engineers
             Resident/Project Engineers

FROM:       Robert A. Welke
             Deputy Director
             Bureau of Highways

SUBJECT:    CONSTRUCTION CIRCULAR LETTER 1995-3
             Inspection of Traffic Sign Contracts

The purpose of this letter is to clarify the responsibilities of the contractor and the Michigan Department of Transportation (MDOT) regarding quality control, quality assurance, and final acceptance. Recent MDOT inspections during the various stages of traffic sign contracts; including fabrication, shipping, storage, and erection, have found numerous specification violations. It is always the contractor’s responsibility to insure that their product quality meets specifications. This requires contractor quality control at all contract stages. The Department will only do acceptance inspections after the signs are erected. Acceptance inspections will be in accordance with procedures described in Construction Instructional Memorandum 1993-6, Inspection of Freeway Sign Upgrading Projects. (Don Murray replaces Jerry Rademacher.) Any inspections/testing conducted prior to this acceptance inspection are for the Department’s own quality assurance and not for the purpose of quality control or acceptance. Signs which are found to be unacceptable during assurance or final inspections will be rejected.
