

Institutions of Higher Education Agreement

The Michigan College Access Network would like to offer colleges and universities the chance to expand college access and increase student enrollment by participating in the Michigan College Access Portal.

Features specific to the Institutions:

1. College Profile page - Each institution will have an informational page on the portal. Colleges can edit and add information to their college page, including links to websites for virtual tours and videos about your programs and campus. Training sessions will be held in the fall to give colleges access to their pages and instructions on modifying their profiles.
2. College applications - Your college application will be loaded into the portal so students may pre-populate, complete, and submit the application in the portal. As a college you will receive the application free of charge as a PDF or CSV file. The loading of the application and the transmission is part of the portal project and is at no cost to the student or the institution.

Responsibility of the College

1. The institution agrees to be fully responsible for editing/adding information to their college page
2. The institution will not use the website for any unlawful purpose.
3. The institution will not upload files that contain viruses, corrupted files or any other similar software or programs that may adversely affect the operation of the services or any other computer linked to the Service, including computers of other users.

Responsibility of the State/ConnectEDU

1. State will provide training that will allow colleges to edit/add information to their college page.
