

Michigan Internet & Telecommunications Alliance

Connecting Michigan to the World

June 30, 2009

Ms. Karen Norcross
Telecommunications Division
Michigan Public Service Commission
PO Box 30221
Lansing, Mi 48909

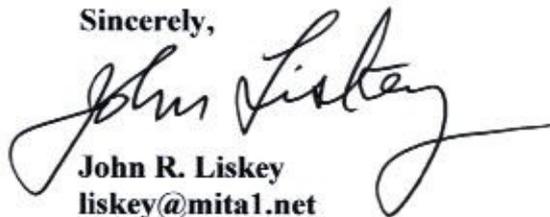

Dear Ms. Norcross:

The Michigan Internet & Telecommunications Alliance applauds your efforts to gather industry comments relative to Enhanced 911 capabilities of Multiline Telephone Systems. Our organization consists of several Competitive Local Exchange Carriers (CLEC's) and Internet Service Providers (ISP's) among other interested parties.

We welcome the opportunity to comment and participate in this proceeding. While we have no specific comments at this time, we would like to submit the recently drafted Model Statutes White Paper developed by the National Emergency Numbering Association (NENA). While we reserve judgment on the document in its entirety, we nevertheless think you may find it contains useful information as you begin to craft MLTS Rules.

Thank you again for the opportunity to participate. We look forward to working with you and other industry players in this matter.

Sincerely,

Handwritten signature of John R. Liskey.
