RATE AND SALES SECTION

DEFINITIONS OF CLASSES OF SERVICE AND INSTRUCTIONS PERTAINING TO STATEMENTS ON SALES DATA

In the definitions below, the letters preceding the captions distinguish the main classes from the subclasses. Show the data broken into the subclasses if possible, but if not, report data under the main classes, drawing a dash through the subclass.

When gas measured through a single meter is used for more than one classof service as here defined, as for example, for both commercial and residential purposes, assign the total to the class having the principal use.

Average Number of Customers. Number of customers should be reported on the basis of number of meters, plus number of flat-rate accounts, except that where separate meter readings are added for billing purposes, one customer shall be counted for code group of meters so added. The average number of customers means the average of the 12 figures at the close of each month.

Thousands of Cubic Feet or Therms Sold (indicate which one by crossing out the one that does not apply). Give net figures, exclusive of respondent's own use and losses.

Revenues. This term covers revenues derived from (a) Sale of Gas (exclusive of forfeited discounts and penalties) and (b) Other Gas Revenues, such as rent from gas property, interdepartmental rents, customers' forfeited discounts and penalties, servicing of customers' installations and miscellaneous gas revenues.

- AB. <u>Residential Service</u>. This class includes all sales of gas for residential uses such as cooking, refrigeration, water heating, space heating and other domestic uses.
- A. Residential Service. This class includes all sales of gas for residential use except space hearing.
- B. Residential Space Heating. This class includes all sales of gas for space heating including gas for other residential uses only when measured through the same meter.
- CD. <u>Commercial Service</u>. This class includes service rendered primarily to commercial establishments such as restaurants, botels, clubs, hospitals, recognized rooming and boarding houses, apartment houses (but not individual tenants therein), garages, churches, warehouses, etc.
- C. Comercial Service. This class includes all sales of gas for commercial use except space heating.
- D. <u>Commercial Space Heating</u>. This class includes all sales of gas for space heating including gas for other commercial uses only when measured through the same meter.
- E. <u>Industrial Service</u>. This class includes service rendered primarily to manufacturing and industrial establishments where gas is used principally for large power, heating and metallurgical purposes.
- F. <u>Public Street and Highway Lighting</u>. Covers service rendered to municipalities or other governmental units for the purpose of lighting streets, highways, parks and other public places.
- G. Other Sales to Public Authorities. Covers service rendered to municipalities or other governmental units for lighting, heating, cooking, water heating and other general uses.
- H. <u>Interdepartmental Sales</u>. This class includes gas supplied by the gas department to other departments of the utility when the charges therefor are at tariff or other specific rates.
- 1. Other Sales. This class includes all service to ultimate consumers not included in the foregoing described classifications.
- A I. <u>Total sales to Ultimate Consumers</u>. This is the total of the foregoing described classifications.
- J. Sales to Other Gas Utilities for Resale. This class includes all sales of gas to other gas utilities or to public authorities for resale to ultimate consumers.
- K. Other Gas Revenues. Revenues derived from operations of the respondent other than sales of gas. They include rent from gas property, interdepartmental rents, customers' forfeited discounts and penalties, services of customers' installations and miscellaneous gas revenues, such as fees and charges for changing, connecting and disconnecting service, profit on sales of materials and supplies not ordinarily purchased for resale, commissions on sales or distribution of others' gas (sold under rates filed by such others), management or supervision fees, sale of steam (except where the respondent furnishes steam-heating service) and rentals from leased property on customers' premises.
- A K. Total Gas Operating Revenues. The total of all the foregoing accounts.

<u>Separate Schedules for Each State</u>. Separate schedules in this section should be filed for each state in which the respondent operates.

<u>Estimates</u>. If actual figures are not available for the schedules in this section, give estimates. Explain the methods used and the factual basis of the estimates, using supplementary sheets, if necessary.

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2004 AND 2003

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Inventories

Inventories are stated at the lower of cost (FIFO) or market.

Property, Plant and Equipment and Depreciation

In 1946 the value of the utility plant was written down to an appraised value established by a cost and valuation study made by the Michigan Public Service Commission. Fixed assets are, therefore, stated at this appraised value, plus cost of net additions, less depreciation allowance since the appraisal date. Net additions in the years 2004 and 2003 amounted to \$41,932 and \$62,283, respectively.

The Company charged operations for depreciation, using the straight line method, on utility plant assets at annual rates ranging from 2% to 11%. Depreciation for 2004 and 2003 was \$147,517 and \$151,008, respectively.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

<u>Unbilled Revenues Under Gas Cost Recovery Adjustment and Refunds Due Customers as Results of Refunds Received from Pipeline Companies</u>

The Company at various times purchases propane gas to be used for making propane-air gas for peak shaving purposes. The Company ultimately recovers this cost through increase in rates to customers in a later period. The purchase of natural gas from interstate pipelines is sometimes purchased at rates given preliminary approval by the Federal Energy Regulatory Commission. If, after examination, the rates are determined to be excessive, refunds are received from the pipeline companies and are refunded to customers, many times in a later period.

The Company follows the policy of expensing cost of propane and emergency gas purchases during the period used and booking as revenues the over-recovery or under-recovery of this cost in the period in which the costs are accrued. Likewise, recovery of increased or decreased cost of gas under gas cost recovery adjustments clauses are booked as increases or decreases in revenues in the period in which they arise.

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2004 AND 2003

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

<u>Unbilled Revenues Under Gas Cost Recovery Adjustment and Refunds Due Customers as Results of Refunds Received from Pipeline Companies</u>

The Company's policy with regard to refunds received from pipeline companies is to book the refunds as a reduction in the cost of purchased gas in the period they are received or credited and to reduce revenue in the same periods.

Gas Sales Revenues

In accordance with customary industry practices, revenues are included in income as billed on the basis of scheduled meter readings. Accordingly, these revenues do not include deliveries of gas from the meter reading date to the end of the accounting period. At the end of each period, therefore, there are volumes of gas consumed and recorded as costs, but not yet billed to customers and not yet recorded as revenues. Such volumes of gas will vary between periods. Unbilled revenues were as follows:

| | <u>2004</u> | <u>2003</u> |
|-------------------------------|-------------------|-------------|
| End of year | \$ 516,506 | \$ 304,502 |
| Beginning of year | 304,502 | 239,340 |
| INCREASE IN UNBILLED REVENUES | <u>\$ 212,004</u> | \$ 65,162 |

Statement of Cash Flows

For purposes of the statement of cash flows, the Company considers all highly liquid debt instruments with a maturity of three months or less to be cash equivalents.
