## **ITEMS FOR WHICH DATA CAN BE COMPARED WITH CAUTION BETWEEN C2SS AND 1990 CENSUS**

Many of the items in the C2SS reflect improvements made to questions asked in the 1990 Census. These changes include things such as rewording of questions, changes in response categories, revised placement on the questionnaire, and modifications in the editing procedures. For example, some of the categories in the industry item in C2SS are comparable to categories used in the 1990 Census, and others are not. Following is a list of items in the C2SS that, while not directly comparable to items in the 1990 Census, can be compared with some limitations. Users are strongly encouraged to discuss the limitations with subject-matter experts before making any comparisons.

### **Population items:**

Household relationship (some differences in categories, editing changes), ancestry (two write-in boxes provided, editing changes), occupation (some differences in categories, editing changes), industry (some differences in categories, editing changes).

### **Housing items:**

Occupancy status (slight difference in residency rules), year built (some differences in categories), year householder moved in (some differences in categories), housing value (some differences in categories).

## **ITEMS FOR WHICH DATA CAN BE COMPARED WITH CAUTION BETWEEN C2SS AND 1990 CENSUS**

Many of the items in the C2SS reflect improvements made to questions asked in the 1990 Census. These changes include things such as rewording of questions, changes in response categories, revised placement on the questionnaire, and modifications in the editing procedures. For example, some of the categories in the industry item in C2SS are comparable to categories used in the 1990 Census, and others are not. Following is a list of items in the C2SS that, while not directly comparable to items in the 1990 Census, can be compared with some limitations. Users are strongly encouraged to discuss the limitations with subject-matter experts before making any comparisons.

### **Population items:**

Household relationship (some differences in categories, editing changes), ancestry (two write-in boxes provided, editing changes), occupation (some differences in categories, editing changes), industry (some differences in categories, editing changes).

### **Housing items:**

Occupancy status (slight difference in residency rules), year built (some differences in categories), year householder moved in (some differences in categories), housing value (some differences in categories).

## **ITEMS FOR WHICH DATA CAN BE COMPARED WITH CAUTION BETWEEN C2SS AND 1990 CENSUS**

Many of the items in the C2SS reflect improvements made to questions asked in the 1990 Census. These changes include things such as rewording of questions, changes in response categories, revised placement on the questionnaire, and modifications in the editing procedures. For example, some of the categories in the industry item in C2SS are comparable to categories used in the 1990 Census, and others are not. Following is a list of items in the C2SS that, while not directly comparable to items in the 1990 Census, can be compared with some limitations. Users are strongly encouraged to discuss the limitations with subject-matter experts before making any comparisons.

### **Population items:**

Household relationship (some differences in categories, editing changes), ancestry (two write-in boxes provided, editing changes), occupation (some differences in categories, editing changes), industry (some differences in categories, editing changes).

### **Housing items:**

Occupancy status (slight difference in residency rules), year built (some differences in categories), year householder moved in (some differences in categories), housing value (some differences in categories).

## **ITEMS FOR WHICH DATA CAN BE COMPARED WITH CAUTION BETWEEN C2SS AND 1990 CENSUS**

Many of the items in the C2SS reflect improvements made to questions asked in the 1990 Census. These changes include things such as rewording of questions, changes in response categories, revised placement on the questionnaire, and modifications in the editing procedures. For example, some of the categories in the industry item in C2SS are comparable to categories used in the 1990 Census, and others are not. Following is a list of items in the C2SS that, while not directly comparable to items in the 1990 Census, can be compared with some limitations. Users are strongly encouraged to discuss the limitations with subject-matter experts before making any comparisons.

### **Population items:**

Household relationship (some differences in categories, editing changes), ancestry (two write-in boxes provided, editing changes), occupation (some differences in categories, editing changes), industry (some differences in categories, editing changes).

### **Housing items:**

Occupancy status (slight difference in residency rules), year built (some differences in categories), year householder moved in (some differences in categories), housing value (some differences in categories).

## **ITEMS FOR WHICH DATA CAN BE COMPARED WITH CAUTION BETWEEN C2SS AND 1990 CENSUS**

Many of the items in the C2SS reflect improvements made to questions asked in the 1990 Census. These changes include things such as rewording of questions, changes in response categories, revised placement on the questionnaire, and modifications in the editing procedures. For example, some of the categories in the industry item in C2SS are comparable to categories used in the 1990 Census, and others are not. Following is a list of items in the C2SS that, while not directly comparable to items in the 1990 Census, can be compared with some limitations. Users are strongly encouraged to discuss the limitations with subject-matter experts before making any comparisons.

### **Population items:**

Household relationship (some differences in categories, editing changes), ancestry (two write-in boxes provided, editing changes), occupation (some differences in categories, editing changes), industry (some differences in categories, editing changes).

### **Housing items:**

Occupancy status (slight difference in residency rules), year built (some differences in categories), year householder moved in (some differences in categories), housing value (some differences in categories).

## **ITEMS FOR WHICH DATA CAN BE COMPARED WITH CAUTION BETWEEN C2SS AND 1990 CENSUS**

Many of the items in the C2SS reflect improvements made to questions asked in the 1990 Census. These changes include things such as rewording of questions, changes in response categories, revised placement on the questionnaire, and modifications in the editing procedures. For example, some of the categories in the industry item in C2SS are comparable to categories used in the 1990 Census, and others are not. Following is a list of items in the C2SS that, while not directly comparable to items in the 1990 Census, can be compared with some limitations. Users are strongly encouraged to discuss the limitations with subject-matter experts before making any comparisons.

### **Population items:**

Household relationship (some differences in categories, editing changes), ancestry (two write-in boxes provided, editing changes), occupation (some differences in categories, editing changes), industry (some differences in categories, editing changes).

### **Housing items:**

Occupancy status (slight difference in residency rules), year built (some differences in categories), year householder moved in (some differences in categories), housing value (some differences in categories).
