- Availability of High Speed Internet

**ARCHITECT'S CERTIFICATION
RE: MICHIGAN PRODUCTS**

Under Michigan's Qualified Allocation Plan for 2012, projects that can demonstrate the use of products and goods that are manufactured by Michigan-based corporations and that are incorporated into the proposed development will receive 3 points in the scoring process.

By signing this form, the architect hereby certifies that the Construction Documents for the proposed development incorporate the following (applicants may subdivide the table below):

| Product | Manufacturer | Manufacturer's Address |
|---------|--------------|------------------------|
| | | |

After construction has been completed, the architect shall verify the use of the products listed above and report any discrepancies to the Authority.

The Authority reserves the exclusive right to determine whether a manufacturer is "Michigan-based." **Failure to adhere to this certification is the responsibility of the Applicant and may result in loss of points**, which may further result in suspension of a project's application, loss of tax credits, or other penalty.

**ARCHITECT'S CERTIFICATION
RE: HIGH-SPEED INTERNET**

Michigan's Qualified Allocation Plan for 2012 requires all projects to provide certification from the architect and applicant that all units will be equipped for High-speed Internet capability (either by connecting each unit to a separate data network using Category 5e wiring, by installing a wireless Local Area Network (LAN) server and providing each unit with a least one wireless LAN card, or by installation of cable service to the project and to each unit) and that the project will have an active internet connection between the project and a local internet service provider. In the event that there is no local internet service provider in the area, the Applicant and architect must provide a written certification that states that a local internet service provider is not available to service the project at this time and the Applicant must agree to provide such service once it becomes available

By signing this form, the architect hereby certifies that the Construction Documents for the proposed project will include the elements necessary to provide high-speed Internet access to each unit in accordance with the requirements of the QAP.
