

Siesta[®] Residence Hall Mattress

For your benefit, for their comfort

All of our Siesta Mattresses are created with the comfort your residents will love, and the cost savings our customers appreciate.

Unsurpassed Durability

Our high density cushioning provides proven longevity with its thickness and firmness retention, eliminating the need for frequent replacements.

Continued Comfort

Our 100% open-cell, resilient foam cushioning provides comfort for all sleeping positions. No squeaking, bent wires, or painful springs.

Quality Construction

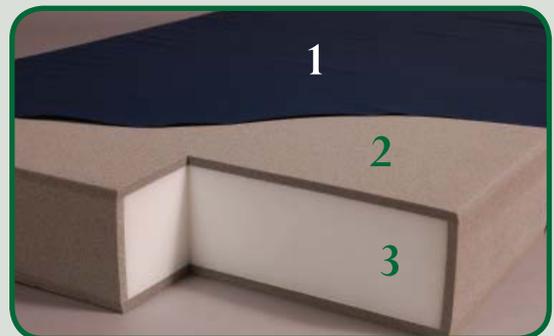

The engineering and creation of the Siesta mattress was made as a proactive approach to eliminate common mattress contaminants. The inverted side seams prevent bug penetration, the fluid resistant covering is easily wiped clean, and the sewn seams allow the unit to breathe minimizing the retention of body heat.

Proven Safety

The fire-resistant foam barrier achieves superior fire performance to help keep your residents safe. This concept eliminates the use of a fabric barrier which can deteriorate, leaving mattresses vulnerable to flame.

Custom Options

Various sizes are available for the comfort of larger body frames. Replacement covers are also available to extend service life.

Siesta Features:

1. Fluid Resistant Coated Nylon
2. Cutting-Edge Fire Resistant Foam Barrier
3. High Density Polyurethane
