

AAA Traffic Safety Resources for the Strive For a Safer Drive Program

TeenDriving.AAA.com (Keys2Drive): This is a state specific extremely comprehensive website that is divided into two sections, one for teens and one for parents. The site contains information on licensing, state laws, resources and a parent – teen driving agreement.

AAA Driving Simulators: The AAA Driving Simulators are desktop driving simulator units that are used to show the extreme dangers of driving distracted. These units may be borrowed for use at your events through coordination with your S4SD project manager. Units are limited so advance planning is a must.

Traffic Safety Handout Materials: AAA offers a wide variety of hand out materials on numerous traffic safety topics. These materials are free to the schools. Time must be allowed for ordering the materials, so again, advanced planning is necessary. To order supplies contact Laurie Earles at laearles@aaamichigan.com or (313) 336-1414.

Contact information: For any questions regarding the above information, or for clarification on use of the funding, please contact the project manager, Gary Bubar, at Strive4aSaferDrive@gmail.com.
