MI-TRAIN is designed to give students a single location to register for courses, take online courses, and direct access to their certificates and transcripts. There are various ways to find courses; however, it is recommended to enter the Course ID (listed below) into the search box located on the top right of the MI-TRAIN home page.

Note: Many emergency management courses have prerequisites consisting of Independent Studies (IS) and/or EMHSD classroom courses (see course descriptions for more information). The Independent Studies are free, web-based, and downloadable through the Federal Emergency Management Agency (FEMA) website at [http://training.fema.gov/IS/crslist.asp](http://training.fema.gov/IS/crslist.asp)
CLASSROOM COURSES

51st CST/Hazmat Teams Training and Exercise

The Michigan National Guard 51st WMD Civil Support Team (CST) is required to conduct regional exercises each fiscal year. The 51st CST requested the assistance of the Michigan State Police, Emergency Management and Homeland Security Training Center (EMHSTC) to reach out to the local Hazardous Materials (HazMat) teams to provide a preceding day of training in collaboration with these regional monthly exercises. All regional first responders including fire, law enforcement, HazMat, EMS, bomb and tactical teams are encouraged to attend the training and exercise in part or for the full duration.

The EMHSTC is committed to delivering an educational day of training to prepare the local HazMat teams for these exercises. The EMHSTC plans to cover the following topics:

- 51st CST equipment overview
- 51st CST tactics, techniques, and procedures
- Interoperable communications
- Michigan Emergency Management Plan (MEMP)
- DOD emergency response capabilities
- IAP development and the use of ICS 200 forms
- DOD emergency
- Any pertinent HazMat refresher topics

In addition, we welcome any additional requests for training subjects that would be jurisdictional specific. All participants will be required to sign in for the day(s) on the ICS 211 Check in sheet AND the MI-TRAIN sign in rosters.

Hours: Various
Cost: No Cost
MI-TRAIN Course IDs: 1045109 Training
1045664 Exercise—during registration, use the special code of: exercise

Dates and Locations:
October 24-25, 2017 – Region 6
December 19-20, 2017 – Region 2
March 27-28, 2018 – Region 2

Air Monitoring for Hazardous Materials EPA 165.4

This three-day course provides participants with the knowledge and skills necessary to monitor and sample for airborne hazardous substances. A variety of instruments will be used during the course presentation and practical exercises, including combustible gas indicators, oxygen sensors, colorimetric tubes, photo ionization detectors, flame ionization detectors, and sampling pumps. Topics to be covered include monitoring programs, monitoring and sampling techniques, equipment selection, equipment calibration and use, exposure guidelines, air dispersion modeling, and safety planning.

This course is Department of Homeland Security (DHS) accepted and applicable to the use of DHS grant funds.

Prerequisite: Hazardous Materials Technician Part I
Hours: 24
MI-TRAIN Course ID: 1035025
Please click here to request an offering of this course in your area.
Anhydrous Ammonia Awareness

This four-hour informational workshop will cover the requirements for understanding the need to plan, prepare, and respond to incidents involving anhydrous ammonia. Safe handling and storage procedures including refrigeration basics and chemical/physical properties in accordance to CFR 1910.119 will be covered, in addition the hazards associated with anhydrous ammonia and appropriate planning requirements. Emergency response equipment and procedures in accordance to CFR 1910.120 will be addressed. Also covered will be chemical protective equipment, specific air monitoring concerns, and the need to work collaboratively with local emergency response agencies.

Hours: 4  
MI-TRAIN Course ID: 1058191  
Please click here to request an offering of this course in your area.

Anhydrous Ammonia Operations

This program is designed for private and public sector and intended to provide the client with the amount of training required under OSHA regulations and applicable MIOSHA rules in response to an Anhydrous Ammonia release. Participants who successfully complete the course will be able to respond and control a small release of NH₃, as defined by the employer.

Course content includes implementing the employer's emergency response plan, use of field survey instruments to classify, identify, and verify the chemical and physical characteristics of NH₃. The implementation of the incident command system, use of personal protective equipment provided by the employer, decontamination, hazard/risk assessment, control/containment/confinement techniques and termination procedures.

Hours: 8  
Please click here to request an offering of this course in your area.

Basic Public Information Officers Workshop (G290)

This two-day workshop for entry-level disaster Public Information Officers and staff emphasizes the skills needed to manage crisis information in emergency and disaster events. Topics include responsibilities of a Public Information Officer in disasters, effective media interviews, crisis information planning, and social media monitoring and management.

Suggested Courses: IS-230, IS-244, and IS-702  
Course Cost: No cost  
MI-TRAIN Course ID: 1017932  
Dates and Location:  
January 10-11, 2018 – Lansing  
July 25-26, 2018 – Region 3  
September 25-26, 2018 – Region 7

CBRNE/WMD Defensive Operations for Health Care Professionals

This 16-hour course includes materials that bring the student up to the hazmat operations level and covers the additional information required by the OSHA First Receiver Standard regarding decontamination and personal protective equipment for hospital personnel. Also covered in this course is information about weapons of mass destruction and the decontamination of those agents. This class provides hands-on decontamination activities, decon line setup, and dressout in protective clothing to support the classroom presentations.

Prerequisite: CBRNE/WMD Awareness is recommended  
Hours: 16  
MI-TRAIN Course ID: 1029097  
Please click here to request an offering of this course in your area.
Chemistry I

The Chemistry of Hazardous Materials courses are designed to meet the needs of personnel involved at various stages of hazardous materials planning and response. The Chemistry course series provides a chemistry background for any person who comes in contact with hazardous materials in transportation, a facility, or the workplace, and provides practical application of this knowledge to planning activities, hazard communication programs, and chemical spill responses.

The three-day Chemistry I course provides students with an introduction to the chemistry of hazardous materials. This course will explore basic chemistry concepts, areas such as: elements, atomic structure, the periodic table, electronic configuration, bonding, and chemical formulas. In addition, the chemistry and hazards associated with hydrocarbons, hydrocarbon derivatives, and fire and pyrolysis will be covered in detail.

Hours: 24
Cost: $390 (2 nights of double occupancy lodging included)
MI-TRAIN Course ID: 1028961
Dates and Locations: January 16-18, 2018 – Lansing

Chemistry II

Chemistry II is the next level course in this series which reinforces the information and concepts learned in Chemistry I. This three-day course will explore, in detail, the chemistry of each of the United States Department of Transportation's (DOT's) nine hazard classes.

Prerequisite: Chemistry I
Hours: 24
MI-TRAIN Course ID: 1029000
Please click here to request an offering of this course in your area.

Chemistry Refresher

The first part of this one-day course will provide the student with a thorough review of inorganic chemistry, including salts and non-salts, then progressing into organic chemistry, including hydrocarbons and hydrocarbon derivatives. Nomenclature, molecular structures, and chemical behavior will be discussed as it relates to the first responder. The second part of the class will be a hands-on practical laboratory exercise using air monitoring equipment and analytical equipment for risk assessment and identification of various chemical compounds and mixtures.

Prerequisite: Chemistry I and Chemistry II or the equivalent
Hours: 8
MI-TRAIN Course ID: 1052388
Please click here to request an offering of this course in your area.
Community Mass Care and Emergency Assistance (G108)

The purpose of this two-day course is to develop foundational knowledge of Mass Care and Emergency Assistance services in the community. It is not a “how to” for sheltering. Participants will use this information to build community emergency Action Items and to identify gaps in the community’s program. Course objectives include:

- Define the four primary Mass Care and Emergency Assistance services as discussed in this course.
- Describe how to determine their community’s Mass Care and Emergency Assistance service resource requirements.
- Identify providers that exist in their community or can be called upon from a nearby community to meet the requirements for Mass Care and Emergency Assistance.
- Name planning and operational actions that can affect how services will be provided.
- List Action Items to utilize resources and providers to meet Mass Care and Emergency Assistance requirements in their community.

Suggested Courses: IS-100.a (or any ICS 100 level), IS-200 (or IS-200.HC), IS-230, IS-800.b
Hours: 16
Cost: No cost
MI-TRAIN Course ID: 1017440
Dates and Locations: February 14-15, 2018 – Region 6
April 17-18, 2018 – Region 1

Confined Space Entry–Permit Required for Private Sector

This one- to three-day course is designed to increase the student’s knowledge of hazards associated with permit-required confined space (PRCS) entry. The length of the program will be determined upon the types and hazards associated with the confined spaces the employee(s) will enter. Course topics include the OSHA required confined space entry standard, hazards associated with entry procedures, personal protective equipment, and related limitations. The course objective is determining if an area is a confined space by:

- Analyzing hazards to determine if the space is a PRCS.
- Recognizing, evaluating, preventing, and abating safety and health hazards associated with PRCS entry.
- Documenting violations of the permit-required confined space standards.
- Evaluating or writing a specific permit-required confined space program.

Hours: 8, 16, or 24 hours based on the specific types of permit required confined spaces
Please click here to request an offering of this course in your area.

Confined Space Rescue–Emergency Response 32-Hour

This four-day course has been developed for members of public and private sector emergency rescue organizations and meets the objectives of the NFPA 1670 Technical Rescue Standard and the OSHA 29 CFR 1910.146 standard. This course provides the information and skills necessary for emergency response organizations to effectively and safely conduct confined space rescue operations. Areas covered will include: confined space regulations, incident management, interior operations, atmospheric monitoring, rescue ventilation, lockout for rescue, respiratory protection, PPE, rescue team development, and pre-planning.

Hours: 32
Please click here to request an offering of this course in your area.
Confined Space Rescue—Private Sector

Under existing health and safety rules, rescue capability must be readily available at every location where workers enter a permit-required confined space (PRCS). The primary goal of this rescue course is to teach students how to develop pre-accident plans for various rescues and rescue skills needed to remove a victim from a permit space.

This course is for anyone who, during the course of their employment, is expected to make rescues from confined spaces. This course is a combination of classroom and practical scenarios in actual confined spaces. The program content is easily modified to meet the specific hazards of the PRCS of your facility.

Course Objectives
- Preparing a rescue plan
- Rescue equipment overview
- Patient packaging
- Air supply systems
- Command and communicator (radio communications systems)
- Air monitoring
- Lockout/tagout

Prerequisite: Permit Required Confined Space Entry - Private Sector

Hours: 8, 16, or 24 hours based on the types of confined spaces
Please click here to request an offering of this course in your area.

Continuity Program Manager (G548)

This course is designed to provide an overview of the role of a Continuity Program Manager to new and experienced COOP personnel. The objectives include defining COOP; explaining the benefits of a viable COOP Program and Plan; identifying elements of a viable COOP Program; and identifying processes, resources, and tasks necessary to implement and manage a successful COOP Program.

Hours: 20
MI-TRAIN Course ID: 1065121
Please click here to request an offering of this course in your area.

Crude Oil Transportation Emergencies Awareness for Decision Makers

This 4-hour awareness level course will provide decision makers basic knowledge and skills, to prepare for and respond to emergency incidents involving transportation of crude oil. The Crude Oil Transportation Emergencies Awareness for Decision Makers course will provide a historical understanding of the recent increase in crude oil shipments by rail, pipeline, and truck. Students will learn site assessment priorities and what resources to consider for the crude oil emergency that will allow them to develop Incident Action Plans (IAP) to mitigate the incident.

This course will cover the basic chemical and physical properties of the types of crude being transported. In addition, students will learn basic design features of railcars used to ship crude oil, common railroad terminology, and techniques for contacting and working with the railroad. This course will provide overview tactical suppression and control strategies for crude oil emergencies. Finally, the course will review case studies of recent crude train derailments and discuss lessons learned.

Hours: 4
MI-TRAIN Course ID: 1058057
Please click here to request an offering of this course in your area.
Damage Assessment for Local Jurisdictions – Half-Day

Damage Assessment is the crucial first step to recovering from a disaster in your community. Without it, response and recovery can be unorganized, resources inadequate, and recovery funds non-existent. This four-hours Damage Assessment for Local Jurisdictions - Workshop is facilitated by an experienced instructor who will introduce damage assessment concepts to individuals who will be rating damage in the field. Some topics covered include your role in disaster, state and federal damage assessment classification, conducting and documenting damage, visual documentation guidelines, coordination with your Emergency Management Coordinator and more!

Suggested Courses: IS-100, IS-559, IS-800.b  
Hours: 4  
Cost: No cost  
MI-TRAIN Course ID: 1063984

Please [click here](http://www.michigan.gov/emhsd-training) to request an offering of this course in your area.

---

Damage Assessment for Local Jurisdictions – Train-the-Trainer

Damage Assessment for Local Jurisdictions - Train-the-Trainer is a one-day course the prepares instructors to deliver lectures and hands-on damage assessment training to local jurisdictions. The course is conducted in two phases: fundamental principles and applied principle. Participants will receive an overview of adult learning, course content, and evaluations. Instructors will then apply the knowledge acquired during class. Upon completion, participants will be able to effectively teach Damage Assessment for Local Jurisdictions – Half Day in the field.

This course is intended for those in leadership positions within State Police and local and Emergency Management programs. Pre-approval is required by registering for this course. EMHSTC staff may follow up requesting more information.

Prerequisites: Damage Assessment Teams and Damage Assessment for Emergency Operations Center Staff (online)  
Hours: 8  
Cost: No cost  
MI-TRAIN Course ID: 1058540

Date and Location: March 28, 2018 – Lansing

---

Emergency Operations Center Management and Operations (G775)

This two-day course provides participants with the knowledge and skills to effectively manage and operate an emergency operations center (EOC) during a crisis. It covers locating and designing an EOC, how to staff and brief EOC personnel, and how to operate in an EOC during in various situations.

Suggested Courses: IS-230, IS-275, IS-800.b, G-385, G-619, and EMHSD’s CIMS training at [www.michigan.gov/cims](http://www.michigan.gov/cims)  
MI-TRAIN Course ID: 1017936  
Cost: No cost  
Date and Location:  
April 3-4, 2018 – Region 2  
May 22-23, 2018 – Region 6  
June 13-14, 2018 – Region 7  
June 19-20, 2018 – Region 8
Flammable Liquid Tank Truck Emergencies

Tank trucks travel through almost every community in Michigan, and most of the time they safely deliver their product without incident. Unfortunately, when an accident does happen, it can quickly escalate to a major emergency. Is your department prepared if you are called to a gasoline tank truck that is rolled over, leaking, or on fire?

This eight-hour course will train responders on the proper steps to take at tank truck emergencies. This course will cover first responder operations including hot zone, rescue operations, emergency valve shut off, patient considerations, defensive leak control, and fire attack. Technician level topics will include dome clamp application, foam considerations, alternative fuels, and scene management. Command level topics will include strategy selection, developing incident action plans, evacuations, resource deployment, mutual aid/inter-agency cooperation, and environmental considerations

**Prerequisites:** First Responder Awareness and First Responder Operations

**Hours:** 8

**MI-TRAIN Course ID:** 1065576

Please click here to request an offering of this course in your area.

---

Hazard Communication, Right-to-Know, and GHS

This one-day course is intended to comprehensively address the issue of evaluating the potential hazards of chemicals and communicating information concerning hazards and appropriate protective measures of employees. It will also assist in developing and maintaining a written hazard communication program for the workplace in compliance with 29 CFR 1910.1200 and MIOSHA Part 42, 92, and 430 the Michigan Hazard Communication and Right-to-Know Standard.

**Hours:** 8

**MI-TRAIN Course ID:** 1032780

Please click here to request an offering of this course in your area.

---

Hazard Mitigation/Comprehensive Plan Interface

This two-day course provides participants with the skills needed for developing strategies that integrate hazard mitigation into the community's comprehensive planning process and master plan. The ultimate goal is to increase the public officials' understanding of the need to address mitigation issues.

**Prerequisites:** IS-230, IS-235, and IS-393

**MI-TRAIN Course ID:** 1017432

**Cost:** No cost

**Date and Location:**
- October 17-18, 2017 – Lansing
- March 20-21, 2018 – Lansing
- July 17-18, 2018 – Region 7

---

Hazardous Materials Incident Command System

On scene incident commanders who will assume control of a hazardous materials incident scene beyond the first responder awareness level shall receive training equal to the first responder operations level of MIOSHA Part 432. Incident commanders must also be competent in knowing and being able to implement the employer’s incident command system/employer’s emergency response plan/local emergency response plan, knowing and understanding the hazards and risks associated with employees who work in chemical protective clothing, being aware of the state emergency response plan and the federal regional response team, and knowing and understanding the importance of decontamination procedures.

This one-day course will address all these competencies as well as those listed in NFPA 472, Chapter 8.

**Prerequisites:** First Responder Operations, ICS 100, and ICS 200

**Hours:** 8

Please click here to request an offering of this course in your area.
Hazardous Materials Incident Response Operations EPA 165.5 (40-Hour HAZWOPER)

Michigan's Emergency Management and Homeland Security Training Center is an approved external provider of this EPA 40-hour training program which is designed for personnel involved with the investigation and remediation of hazardous waste sites. Upon completion of this course, students will be more knowledgeable about hazardous waste site operations, team functions, personnel health and safety, and field monitoring equipment. The following topics are included in this course: hazard recognition, air monitoring, toxicology, respiratory protection, levels of protection and chemical protective clothing, site entry and reconnaissance, radiation survey instruments, decontamination, and response organization. This course is based on HAZWOPER 1910.120.

This course can also be brought to your facility, please [click here](#) to request an offering of this course.

**Hours:** 40  
**Cost:** $400 (4 nights of double occupancy lodging included)  
**MI-TRAIN Course ID:** 1029070  
**Dates and Locations:** February 26-March 2, 2018 – Lansing  
August 20-24, 2018 – Lansing

Hazardous Materials Officer (NFPA 472, Chapters 11 and 12)

This four-day course is intended to provide participants with the knowledge and skills necessary to meet the educational competencies as outlined in NFPA 472, Chapter 11: Competencies for the Hazardous Materials Branch Director/Group Supervisor and Chapter 12: Competencies for the Hazardous Materials Branch Safety Officer.

The Hazardous Materials Group Supervisor is the person responsible for directing and coordinating all operations assigned to the hazardous materials branch by the Incident Commander. The Hazardous Materials Assistant Safety Officer is the person working within the Unified Incident Command System (UICS) to ensure recognized safe practices are followed within the hazardous materials team.

The Hazardous Materials Officer program will also define the responsibilities and roles of specific Hazardous Materials Team functions of Entry Team Leader, Decon Team Leader, Site Access Control Team Leader, and Safe Refuge Area Manager.

This course is designed around lecture, group discussions, multiple tabletop exercises, and computer simulation exercises. This course can also be taught onsite at your department by sending a request to [click here](#).

**Prerequisite:** Hazardous Materials Technician Parts I & II and ICS 100 & ICS 200 or equivalent  
**Hours:** 32  
**MI-TRAIN Course ID:** 1034094  
Please [click here](#) to request an offering of this course in your area.
Hazardous Materials Technician Level Response–Private Sector–24 Hour

This 24-hour course provides information and skills needed to recognize, evaluate, and control an incident involving the release, or potential release, of hazardous materials at the technician level. The focus of this course is on recognizing and evaluating a hazardous materials incident, organizing the response team, identifying and using response resources, decision-making, and protecting the public and environment. Participants will wear fully encapsulating chemical protective ensembles.

This course addresses the training competencies of 29 CFR 1910.120 and Michigan's CIS/OHS-HAZWOPER Part 432.

Course content includes implementing the employer's emergency response plan, use of field survey instruments to classify, identify, and verify hazardous materials used on-site, incident command, use of personal protective equipment provided by the employer, decontamination, hazard/risk assessment, control/containment/confine ment techniques, termination procedures, and basic chemical and toxicological terminology and behavior relevant to the materials used or stored on-site. Students will qualify to perform limited offensive tactics required for site specific hazards.

Prerequisite: Hazardous Materials First Responder Operations
Hours: 24
MI-TRAIN Course ID: 1033199
Please click here to request an offering of this course in your area.

Hazardous Materials Technician Part I

This course provides emergency response personnel, with the information and skills needed to meet the training requirements cited in NFPA 472, Michigan's CIS/OHS-HAZWOPER Part 432, OSHA CFR 1910.120(q) and HMEP Guidelines for Public Sector Hazardous Materials Training. It is intended for members of hazardous materials response teams, to recognize, evaluate, and control an incident involving the release or potential release of hazardous materials.

The focus of the course is on recognizing and evaluating a hazardous materials incident, organizing the response team, protecting response personnel, identifying and using response resources, implementing basic control measures, refine decision-making skills, and protecting the public. Following NIMS Requirements, this course also addresses how the Haz Mat Branch falls into the Command Structure and utilizes this feature throughout the course.

Topics that are discussed include chemical and physical properties of hazardous materials, toxicology, recognition and identification of hazardous materials, direct-reading instruments, standard operating procedures, personnel protection and safety, informational resources and many more. This program is based on an 80-hour training curriculum that is broken down into many formats to allow more responders the opportunity to attend the training.

Instructional methods used are lectures, class problem-solving sessions, and exercises. Emphasis is on the hands-on use of equipment to practically apply lecture information. Class members will participate in simulations designed to apply and test the lessons learned during the week. Participants will wear fully encapsulating suits and SCBA.

Prerequisite: Hazardous Materials First Responder Operations
Hours: 40
Cost: $400 (double occupancy lodging included)
MI-TRAIN Course ID: 1029020
Dates and Locations: October 9-13, 2017 – Lansing
March 19-23, 2018 – Lansing
Hazardous Materials Technician Part II

This advanced-level course includes specific training about a variety of fixed site and transportation topics an emergency responder is likely to encounter. Instruction and practical application is included regarding small package goods, chlorine cylinders, drum patching/handling, highway cargo tanks, railroad tank cars, product transfer operations, and above-ground storage tanks. The skills learned are reinforced through a variety of hands-on applications and response scenarios.

This course is extremely informative as industry professionals assist with the instruction and these professionals bring real world experience and knowledge to share with each class based solely within their expertise.

This course provides emergency response personnel, with the information and skills needed to meet the training requirements cited in NFPA 472, Michigan's CIS/OHS-HAZWOPER Part 432, OSHA CFR 1910.120(q) and HMEP Guidelines for Public Sector Hazardous Materials Training. Following NIMS Requirements, this course also addresses how the Haz Mat Branch falls into the Command Structure and utilizes this feature throughout the course.

Class members will participate in simulations designed to apply and test the lessons learned during the week. Participants will wear fully encapsulating suits and SCBA.

Prerequisite: Hazardous Materials Technician Part I
Hours: 40
Cost: $400 (4 nights of double occupancy lodging included)
MI-TRAIN Course ID: 1029041
Dates and Locations: October 30-November 3, 2017 – Lansing
April 23-27, 2018 – Lansing

Hazardous Materials Technician Tactical Scenario Refresher

This one-day refresher course is designed for the first responder who desires hands-on application of skills learned in the Hazardous Materials Technician Part I and II courses. The majority of this class will be practical and scenario based training from an operational perspective. The students will be expected to don personal protective equipment and solve “real world” emergencies involving hazardous materials. Each year the emphasis of this class will change to foster a continuous improvement of the Hazardous Materials Technicians’ competencies.

Prerequisite: Hazardous Materials Technician Part I and II or the equivalent
Hours: 8
MI-TRAIN Course ID: 1052412
Please click here to request an offering of this course in your area.

Hazardous Waste Operations (HAZWOPER) 8-Hour Refresher

This one-day course provides participants with the opportunity to review and practice the skills originally presented in 24-hour and 40-hour training programs. This course is intended to meet OSHA annual refresher training requirements in accordance with 29 CFR 1910.120, Paragraphs e and q.

This course can also be held at your facility and delivered to a group. Please click here to request an offering of this course in your area.

Prerequisite: 24-hour or 40-hour HAZWOPER course
Hours: 8
Cost: $130
MI-TRAIN Course ID: 1029004
Dates and Locations: February 9, 2018 – Lansing
March 26, 2018 – Lansing
May 18, 2018 – Lansing
August 30, 2018 – Lansing
Highway Cargo Tank Specialty

This three-day course is designed and intended for hazardous materials technicians who respond to releases, or potential releases, of hazardous materials from cargo tank trucks for the purpose of controlling the releases. This program provides the responder with the knowledge and skills necessary to analyze an incident involving a cargo tank truck, to plan a response within the capabilities and competencies of available personnel and equipment, and to implement the planned response to mitigate the hazardous incident. Responders will be given several scenarios in this class including both tabletop and hands-on exercises using real tank trucks.

Prerequisites: Hazardous Materials Technician
Hours: 24
Cost: $390 (2 nights of double occupancy lodging included)
MI-TRAIN Course ID: 1034713
Dates and Locations: May 22-24, 2018 – Lansing

Homeland Security Exercise and Evaluation Program (HSEEIP) Course – Classroom (L0146)

This two-day HSEEIP training course will focus on exercise program management to include design and development, conduct, evaluation, and improvement planning. Additionally, the course will give participants a working knowledge of HSEEIP, including the resources, tools, and policies that support compliance. It will highlight exercise program management in detail, and the HSEEIP cycle in exercise design, development, conduct, evaluation, and improvement planning.

Prerequisites: IS-100, IS-120
Hours: 16
Cost: No cost
MI-TRAIN Course ID: 1018869
Dates and Locations: January 30-31, 2018 – Lansing
April 18-19, 2018 – Region 2
August 1-2, 2018 – Region 8

ICS 300–Intermediate ICS for Expanding Incidents

This 2.5 day course provides training on and resources for personnel who require advanced application of the Incident Command System (ICS). This course expands upon information covered in the ICS-100 and ICS-200 courses. The course objectives are to describe how the National Incident Management System (NIMS) Command and Management component supports the management of expanding incidents and describe the Incident/Event Management process for supervisors and expanding incidents as prescribed by the Incident Command System (ICS). Also covered is the implementation of the Incident Management process on a simulated Type 3 incident and development of an Incident Action Plan for a simulated incident.

The target audience for this course is for individuals who may assume a supervisory role in expanding incidents or Type 3 incidents. Note: During a Type 3 incident, some or all of the command and general staff positions may be activated, as well as division/group supervisor and/or unit leader level positions. These incidents may extend into multiple operational periods.

This course is MCOLES approved for 302 funds. It is also eligible for Standardized E.M.S. Continuing Education Credits. Please reference the Pre-Approved Standardized CE Credits guide available at http://www.michigan.gov/mdch/0,4612,7-132-2946_5093_28508-47472--,00.html#Forms_Pubs for further details.

Prerequisites: ICS-100, ICS-200, IS-700, and IS-800
Hours: 18
Cost: No cost
MI-TRAIN Course ID: 1029037
Dates and Locations: October 24-26, 2017 – Lansing
February 6-8, 2018 – Lansing
June 19-21, 2018 – Lansing
(The end time on the last day of the course is noon.)
ICS-400 Advanced ICS Command and General Staff—Complex Incidents

This two-day course provides training on and resources for personnel who require advanced application of the Incident Command System (ICS). This course expands upon information covered in the ICS-100, ICS-200, and ICS-300 courses. The target audience for this course is senior personnel who are expected to perform in a management capacity in an area command or multi-agency coordination entity.

The course objectives are to explain how major incidents engender special management challenges, describe the circumstances in which an area command is established, and describe the circumstances in which multiagency coordination systems are established.

This course is MCOLES approved for 302 funds. It is also eligible for Standardized E.M.S. Continuing Education Credits. Please reference the Pre-Approved Standardized CE Credits guide available at http://www.michigan.gov/mdch/0,4612,7-132-2946_5093_28508-47472--,00.html#Forms_Pubs for further details.

**Prerequisites:** ICS-100, ICS-200, ICS-300, IS-700, and IS-800

**Hours:** 16

**Cost:** No cost

**MI-TRAIN Course ID:** 1029045

**Dates and Locations:**
- February 13-14, 2018 – Lansing
- August 14-15, 2018 – Lansing

Incident Command System (ICS) Private Sector

Private organizations working to implement a crisis or incident management structure as part of their business continuity program often look to available public standards for guidance. One such structure, a standard practice throughout much of the public sector, is called the Incident Command System, or ICS. This two-day program introduces the Incident Command System (ICS) and provides the foundation for higher level ICS training. This course describes the history, features, principles, and organizational structure of the Incident Command System. It also explains the relationship between ICS and the National Incident Management System (NIMS).

**Hours:** 16

**MI-TRAIN Course ID:** 1037214

Please [click here](http://www.michigan.gov/emhsd-training) to request an offering of this course in your area.

Incident Command System/Emergency Operations Center Interface (G191)

This one-day course highlights the concepts and interaction between two disaster management systems: the Incident Command System and the Emergency Operations Center. Both elements will be studied as integral parts of the National Incident Management System required in disaster response. Discussion will examine issues in communication, coordination, and decision making enabling participants to properly plan for response and recovery.

**Prerequisites:** IS-100, IS-200, and ICS-300

**Suggested Courses:** IS-701 and ICS-400

**MI-TRAIN Course ID:** 1017942

**Cost:** No cost

**Dates and Location:**
- January 9, 2018 - Lansing
- May 15, 2018 – Region 2
- July 19, 2018 – Region 8
- September 11, 2018 – Region 5
Instructor Development Workshop (MGT-323)

This three day course primarily serves to give instructors, most of whom already have years of instructional experience within their own organizations, insight into adult education principles as well as the opportunity to comment on and improve their instructional style. The course focuses on enhancing instructional skills that may be applied within DHS-certified courses, but it also discusses organization specific policies, procedures and practices. The goal of this course is to ensure instructional excellence by providing a forum for experienced instructors to share their experiences with participants and learn together, both during discussions of instructional techniques and in commenting on each other’s presentation skills during prepared teachbacks.

Professional Disciplines

The target audience for the Direct Delivery version of this course is experienced emergency response professionals including:

- Law enforcement
- Fire
- Hazardous materials personnel
- Personnel in the agricultural industry
- Emergency medical service personnel
- Emergency planners
- Subject Matter Experts (SMEs) involved in the planning, preparation, response or recovery phases of disaster or emergency response
- Healthcare professionals
- Former military personnel

MI-TRAIN Course ID: 1051560
Cost: No cost
Dates and Location: November 13-15, 2017 - Lansing

Law Enforcement Prevention & Deterrence of Terrorist Acts Train-the-Trainer (AWR-122-1)

This course trains law enforcement personnel on actions they can take to prevent, deter and respond to terrorist acts. The law enforcement officer is part of the front line defense in preventing and deterring WMD terrorist incidents where the release of WMD agents is likely to occur because of criminal actions. The nature of law enforcement officers’ daily work environment provides them with an enhanced understanding of the community not shared by the public. This heightened community awareness provides law enforcement officers with a unique opportunity to prevent or deter potential WMD terrorist incidents. This awareness level course focuses on the recognition, prevention, and deterrence of terrorist activity and crime-related high consequence events for law enforcement and other public safety professionals. Subject areas covered in the course include intelligence gathering, threat recognition, community-oriented policing, counterfeit identification detection, information sharing among agencies and chemical, biological, radiological, nuclear and explosive (CBRNE) agents or materials that can be procured either legitimately or illegally to produce a WMD.

The target audience for the Train-the-Trainer version of this course is established trainers/instructors in academies, agencies or departments who are seeking to train participants by teaching the Indirect version of this course using course materials provided by NCBRT.

Hours: 20
Cost: No Cost
MI-TRAIN Course ID: 1072232
Dates and Locations: December 5-7, 2017 – Lansing
Mass Fatality Incident Response (G386)

This course prepares state and local response personnel and other responsible agencies and professionals to handle mass fatalities effectively and to work with the survivors in an emergency or disaster. This course covers incident management, mass fatalities, planning before and operations during the incident, establishing a morgue, family assistance support operation, and assistance from the federal government.

**Hours:** 16  
**MI-TRAIN Course ID:** 1065103  
Please click here to request an offering of this course.

Mercury Spill Response

Both public and private sector hazardous materials responders are presented with many challenges when operating at a mercury-spill emergency. These challenges include mercury vapor monitoring capabilities, personnel protection, product recovery, and removal. This 4-hour training course will introduce risk based response tactical guidelines, emergency handling techniques, and toxicological effects for mercury related spills.

**Hours:** 4  
**MI-TRAIN Course ID:** 1032685  
Please click here to request an offering of this course.

MI CIMS (WebEOC) End-User Training-Local Emergency Management Responders

This is a 4-hour instructor led classroom based MI CIMS (WebEOC) End User Training computer training course for those who will need access to WebEOC during emergencies, disasters, and special events in Michigan. A participant for this class MUST have an assigned position with a Local Emergency Operations Center (EOC) in Michigan. All participants will be verified with their Emergency Management Coordinator before class. Anyone who is not able to be verified as associated with an Emergency Management Program will not be allowed to participate in class. A responder must attend a MI CIMS End User Training course in order to gain access into the system. These classes are not intended for those associated with a State Agency or the SEOC (please see course ID: 1034725).

**Prerequisites:** Sponsorship from a local Emergency Management Coordinator  
**MI-TRAIN Course ID:** 1034950  
**Dates and Location:** Various dates (See MI-TRAIN)

Michigan Specific Core EM Knowledge Requirement (MI-CEMKR)

The two-day MI-CEMKR course provides the basic knowledge a Michigan Emergency Manager needs to know, or where to go for the information, in order to effective in performing the essential duties of their job. Topics include Public Act 390 of 1976, the Michigan Emergency Management Plan, local Emergency Planning, Damage Assessment, Emergency Communication, and other essentials.

**Prerequisites:** The FEMA Independent Study (IS) Professional Development Series (7 online courses); NIMS Training (IS-100, 200, 700, and 800); Damage Assessment Teams (online course); Damage Assessment for EOC Staff (online course); and Grants and Resources (online course)  
**Suggested Courses:** IS-1, IS-7, and IS-775  
**MI-TRAIN Course ID:** 1046211  
**Cost:** No cost  
**Dates and Location:** February 21-22, 2018 – Lansing  
June 5-6, 2018 – Lansing  
September 18-19, 2018 – Lansing

www.michigan.gov/emhsd-training
Multi-Hazard Emergency Planning for Schools (G364)

This course provides schools with the knowledge, skills, and tools needed to refine or develop an all-hazards school Emergency Operations Plan (EOP) and to identify how to train and exercise the school EOP. This course follows the guidance set forth in the FEMA Comprehensive Preparedness Guide 101 (CPG 101) for developing an emergency operations plan and explains how to utilize the National Incident Management System (NIMS) as the foundation for planning and building partnerships with outside agencies such as law enforcement fire and emergency management.

**Prerequisite:** School Emergency Operations Plan (in any form--draft or final)

**Suggested Courses:** IS-0100.SCa, IS-0100.SC or IS-0100.b and IS-0700.a

**Hours:** 24

**MI-TRAIN Course ID:** 1050467

**Cost:** No cost

**Dates and Location:** October 11-13, 2017 – Region 6

NIMS ICS All-Hazards Finance/Administration Course (L 973)

This course provides local- and state-level emergency responders with a robust understanding of the duties, responsibilities, and capabilities of an effective Incident Commander (IC) on an All-Hazards Incident Management Team (AHIMT). These responsibilities fall into two categories: 1) responding to the incident and command needs of the incident, and 2) effectively fulfilling the position responsibilities of an IC on an All-Hazards ICS IMT. Exercises, simulations, discussions, and a final exam enable participants to process and apply their new knowledge.

**Prerequisites:** IS-100, IS-200, ICS-300, ICS-400, IS-700 and IS-800

**Hours:** 24

**Cost:** No Cost

**MI-TRAIN Course ID:** 1052483

**Dates and Locations:** March 13-15, 2018 – Lansing

Professional Emergency Manager (PEM) Designation Exam

The Professional Emergency Manager Designation exam is a comprehensive set of 100 questions covering the five phases of emergency management. Successful candidates will receive the title of Professional Emergency Manager after fulfilling the requirements of the Professional Emergency Manager Program and passing the test with 75% or higher. Registrations must be submitted at least thirty (30) days prior to the exam date.

**Prerequisites:** Completion of the requirements set forth in the PEM program

**MI-TRAIN Course ID:** 1018983

**Dates and Locations:**
- December 12, 2017 – Lansing
- May 1, 2018 – Lansing
- August 28, 2018 – Lansing
Railcar Specialty for Hazardous Materials Technician

The goal of the competencies at this level shall be to provide the hazardous materials technician with a tank car specialty with the knowledge and skills to perform tasks safely. It is in compliance with NFPA 472, Chapter 12.1.2.1.

When responding to hazardous materials/WMD incidents, the hazardous materials technician with a tank car specialty shall be able to perform the following tasks:

1. Analyze a hazardous materials/WMD incident involving tank cars to determine the complexity of the problem and potential outcomes by completing the following tasks:
   a. Determine the type and extent of damage to tank cars.
   b. Predict the likely behavior of tank cars and their contents in an emergency
2. Plan a response to an emergency involving tank cars within the capabilities and competencies of available personnel, personal protective equipment, and control equipment by determining the response options (offensive, defensive, and nonintervention) for a hazardous materials/WMD incident.
3. Implement or oversee the application of the planned response to a hazardous materials/WMD incident involving tank cars. NFPA 472, Chapter 12.1.2.2

Prerequisites: Hazardous Materials Technician Part I and II

Hours: 24
MI-TRAIN Course ID: 1029065
Please click here to request an offering of this course in your area.

Recovery from Disaster, The Local Government Role (G205)

This 2.5 day workshop is designed for local governments and community partners engaged in recovery from disasters, including local elected officials, emergency managers, VOAD officials, economic development agencies, community planners, public works leadership, and other community recovery partners. The goals of this course are:

- To increase understanding of local government and community responsibilities and challenges associated with disaster recovery.
- Provide a forum for discussion of “lessons learned” in disaster recovery at the local level.
- Prepare participants to develop and implement a pre-disaster recovery plan.

Hours: 18
MI-TRAIN Course ID: 1065105
Please click here to request an offering of this course in your area.

WMD Awareness Level Training (AWR 160)

Developed by the National Domestic Preparedness Consortium (NDPC), the WMD (Weapons of Mass Destruction) Awareness-Level Training Course is a six-hour program that provides emergency responders with awareness-level instruction on recognition, avoidance, isolation, and notification techniques in a WMD environment. The course covers prevention and deterrence and chemical, biological, radiological, nuclear, and explosive (CBRNE) hazards. This course is eligible for Standardized E.M.S. Continuing Education Credits. Please reference the Pre-Approved Standardized CE Credits guide available at http://www.michigan.gov/mdch/0,4612,7-132-2946_5093_28508-47472-.00.html#Forms_Pubs for further details.

Hours: 8
MI-TRAIN Course ID: 1029043

ONLINE COURSES

Damage Assessment for Emergency Operations Center Staff

Damage Assessment for Emergency Operations Center Staff online course examines the concepts of disaster assessment and information management, which is vital to obtain assistance after an emergency or disaster. This includes data compilation, analysis, and dissemination. The course will highlight proper reporting using MI CIMS.

Damage Assessment Teams

The Damage Assessment Teams online course was developed to help individuals who will be rating damage in the field. The course provides information on the Damage Assessment Classification System, Impact Analysis, Completing the Damage Assessment Worksheet, and Visual Documentation Guidelines. *Currently down for maintenance.

Hazmat/WMD Air Monitoring

The purpose of this online module is to introduce the participant to the basic techniques for surveying the scene of hazardous materials and identifying environmental conditions that pose a threat to the First Responder at the Operations Level.

Hazmat/WMD Awareness

The primary purposes of this online module is to introduce private and public service personnel to the “first responder” concept; and to emphasize the importance of the first responder’s safety at hazardous materials incidents, whether those incidents are intentional or accidental.

Hazmat/WMD Characteristics of Hazardous Materials

The purpose of this online module is to define chemical and physical properties of HazMat/WMD materials that may be accidentally or intentionally released. Understanding characteristics of HazMat/WMD agents will allow the first responder to predict and estimate likely harm and consequences of a release of hazardous materials.

Homeland Security Exercise and Evaluation Program (HSEEP) – Webinar (K0146)

This online, two-day, HSEEP training course will focus on exercise program management to include design and development, conduct, evaluation, and improvement planning. Additionally, the course will give participants a working knowledge of HSEEP, including the resources, tools, and policies that support compliance. It will highlight exercise program management in detail, and the HSEEP cycle in exercise design, development, conduct, evaluation, and improvement planning.

Course registration is required through the Emergency Management Institute.

Course Objectives:
• Increase awareness of the Homeland Security Exercise Evaluation Program Doctrine.
• Clarify Roles and Responsibilities.
• Improve Teamwork and Coordination.

Radiological Emergency Preparedness (REP) Basic

The Radiological Emergency Preparedness (REP) course is designed to provide basic preparedness information for the off-site responders involved in an incident at one of Michigan’s nuclear power plants.
