STATE OF MICHIGAN

RICK SNYDER, Governor

DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET

January 3, 2011

The Honorable Rick Snyder
Governor, State of Michigan,

Members of the Legislature
State of Michigan,

Retirement Board Members
and
Members, Retirees and Beneficiaries

Ladies and Gentlemen:

We are pleased to present the comprehensive annual financial report of the Michigan State Police Retirement System (System) for fiscal year 2010.

INTRODUCTION TO REPORT

The System was established by legislation under Public Act 251 of 1935. It now operates under the provisions of Public Act 182 of 1986, as amended, and is administrated by the Office of Retirement Services (ORS). The number of active and retired members and beneficiaries of the System is presented in Note 1 of the financial statements in the Financial Section of this report. The purpose of the System is to provide benefits for all State Police officers. The services performed by the staff provide benefits to members.

Responsibility

Responsibility for both the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests with the leadership team of the System. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of operations of the System.

Internal Control Structure

The leadership team of the System is responsible for maintaining adequate internal accounting controls designed to provide reasonable assurance that transactions are executed in accordance with management's general or specific authorization, and are recorded as necessary to maintain accountability for assets and to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America. The internal

INTRODUCTORY SECTION

Letter of Transmittal (continued)

control structure is designed to provide reasonable assurance regarding the safekeeping of assets and reliability of all financial records.

Independent Auditors and Actuary

The Office of the Auditor General (OAG), independent auditors, conducted an annual audit of the System. The independent auditor's report on the System's financial statements is included in the Financial Section of this report.

Statute requires that an annual actuarial valuation be conducted. The purpose of the valuation is to evaluate the mortality, service, compensation and other financial experience of the System and to recommend employer-funding rates for the subsequent year. The annual actuarial valuation was completed by Gabriel Roeder Smith & Company for the fiscal year ended September 30, 2009. Actuarial certification and supporting statistics are included in the Actuarial Section of this report.

Management's Discussion and Analysis (MD&A)

Generally Accepted Accounting Principles (GAAP) require that management provide a narrative introduction, overview, and analysis to accompany the Basic Financial Statements in the form of MD&A. This letter of transmittal is intended to complement MD&A and should be read in conjunction with it. The MD&A can be found immediately following the Independent Auditor's Report.

PROFILE OF THE GOVERNMENT

The State Police Retirement System was created by Public Act 251 of 1935 and later superseded by Public Act 182 of 1986. A nine-member board, under the direction of a chairperson elected from the membership, administers the System to provide retirement benefits for State Police officers. Financing is provided by investment income and by an annual legislative appropriation.

ECONOMIC CONDITIONS AND OUTLOOK

Despite challenging economic times, the System continues to show steady performance over the long-term.

Investments

The State Treasurer is the investment fiduciary and custodian of all investments of the System pursuant to State law. The primary investment objective is to maximize the rate of return on the total investment portfolio, consistent with a high degree of prudence and sufficient diversity to eliminate inordinate risks and to meet the actuarial assumption for the investment return rate. The investment activity for the year produced a total rate of return on the portfolio of 8.5%. For the last five years, the System has experienced an annualized rate of return of 3.4%. A summary of asset allocation and rates of return can be found in the Investment Section of this report.

Accounting System

Transactions of the System are reported on the accrual basis of accounting. Additions are recorded when earned and deductions are recorded when incurred. Participants' benefits are recorded when payable by law. We believe the accounting and administrative internal controls established by the System provide reasonable assurance the System is carrying out its responsibilities in safeguarding its assets, in maintaining the reliability of the financial records for preparing financial statements, and in maintaining accountability for its assets.

INTRODUCTORY SECTION

Letter of Transmittal (continued)

Funding

Funds are derived from the excess of additions to plan net assets over deductions from plan net assets. Funds are accumulated by the System to meet future benefit obligations to retirees and beneficiaries. The percentage computed by dividing the actuarial value of assets by the actuarial accrued liability is referred to as the “funded ratio.” This ratio provides an indication of the funding status of the System and generally, the greater this percentage, the stronger the System. Effective in fiscal year 2001, the System uses the actuarial valuation from the previous fiscal year for this report in accordance with Governmental Accounting Standards Board (GASB) Statement No. 25. Consistent with this approach, the most recent actuarial valuation was performed as of September 30, 2009. The actuarial value of the assets and actuarial accrued liability of the System were \$1.2 billion and \$1.5 billion, respectively, resulting in a funded ratio of 80.7% at September 30, 2009. An historical perspective of funding levels for the System is presented on the Schedule of Funding Progress in the Required Supplementary Information in the Financial Section of this report.

Postemployment Benefits

An actuarial valuation is completed annually to determine the actuarial accrued liability if the postemployment benefits were to be pre-funded. If these benefits were pre-funded, the actuarial accrued liability as of September 30, 2009, would be \$882.3 million. Statement No. 43 does not require retroactive application of the reporting changes. Therefore, only three valuation years are presented and included in the required supplementary information of this report.

MAJOR GOALS ACCOMPLISHED

The Michigan Department of Technology, Management & Budget, Office of Retirement Services (ORS) is an innovative retirement organization driven to empower our customers for a successful today and a secure tomorrow. During fiscal year 2010, we continued to follow our strategic planning for our business goals. Strategic planning has united staff members from across the organization, generated fresh and unique perspectives, and created broad staff support of the strategic objectives.

Additional accomplishments are highlighted below.

Continuously Renewed Business-Driven Technology

Digital file transfers make insurance enrollment fast and secure - We replaced paper enrollment forms for our vision, dental and prescription insurance carriers with automatic digital file transfers. This new process improves the accuracy and timeliness, as well as the security of the transferred information.

AWARDS AND ACKNOWLEDGEMENTS

ORS received the following recognitions:

- ORS won the Public Pension Standards 2010 Award by the Public Pension Coordinating Council for meeting standards for public retirement system management and administration.
- Michigan's Roth 401 (k) was awarded the 2009 Leadership Recognition Award for plan design and administration from the National Association of Government Defined Contribution Administrators (NAGDCA).
- The Government Finance Officers Association (GFOA) of the United States and Canada awarded ORS with the Certificate of Achievement for Excellence in Financial Reporting for our fiscal year 2009 Comprehensive Annual Finance Report (CAFR). This marks the 19th consecutive year ORS has received this prestigious award.
- ORS was listed in the Information Technology Ideas and Noted Practices report of Cost Effectiveness Measurement, Inc. for our highly formalized testing process.

Letter of Transmittal (continued)

Acknowledgements

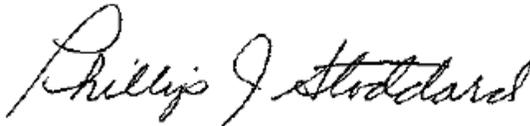

The preparation of this report was accomplished with the dedication and cooperation of many people. It is intended to provide complete and reliable information as a basis for making management decisions, as a means of determining compliance with legal provisions, and as a means for determining responsible stewardship of the funds of the System.

We would, therefore, like to express our appreciation for the assistance given by staff, advisors and the many people who contributed to its preparation. We believe their combined efforts have produced a report that will enable employers and plan members to better evaluate and understand the Michigan State Police Retirement System. Their cooperation contributes significantly to the success of the System.

Sincerely,

A handwritten signature in cursive script, appearing to read "Phyllis Mellon".

Phyllis Mellon, Chief Deputy Director
Department of Technology, Management & Budget

Independent Auditor's Report on the Financial Statements

Sergeant Richard Hale, Chair
Michigan State Police Retirement System Board
General Office Building
and
Ms. Phyllis Mellon, Chief Deputy Director
Department of Technology, Management & Budget
Lewis Cass Building
and
Mr. Phillip Stoddard, Director
Office of Retirement Services
Department of Technology, Management & Budget
General Office Building
Lansing, Michigan

Dear Sergeant Hale, Ms. Mellon, and Mr. Stoddard:

We have audited the accompanying basic financial statements of the Michigan State Police Retirement System as of and for the fiscal years ended September 30, 2010 and September 30, 2009, as listed in the table of contents. These financial statements are the responsibility of the Michigan State Police Retirement System's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and the significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

Independent Auditor's Report (continued)

In our opinion, the financial statements referred to in the first paragraph present fairly, in all material respects, the plan net assets of the Michigan State Police Retirement System as of September 30, 2010 and September 30, 2009 and the changes in plan net assets for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we will also issue a report on our consideration of the Michigan State Police Retirement System's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The management's discussion and analysis on pages 16 through 20 and the required supplementary information and corresponding note on pages 41 through 43 are not required parts of the basic financial statements but are supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The introductory, investment, actuarial, and statistical sections and the supporting schedules are presented for the purposes of additional analysis and are not a required part of the basic financial statements. The supporting schedules on pages 44 through 47 have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly stated, in all material respects, in relation to the basic financial statements taken as a whole. The introductory, investment, actuarial, and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

AUDITOR GENERAL

December 30, 2010

FINANCIAL SECTION

Management's Discussion and Analysis

Our discussion and analysis of the Michigan State Police Retirement System's (System) financial performance provides an overview of the System's financial activities for the fiscal year ended September 30, 2010. Please read it in conjunction with the transmittal letter in the Introductory Section on page 6 and the basic financial statements, which follow this discussion.

FINANCIAL HIGHLIGHTS

- System assets exceeded its liabilities at the close of fiscal year 2010 by \$1,003.8 million (reported as *net assets*). Net assets are held in trust to meet future benefit payments.
- The System's funding objective is to meet long-term benefit obligations through contributions and investment income. As of September 30, 2009, the funded ratio was approximately 80.7% for pension benefits and the funded ratio for other postemployment benefits (OPEB) was 0.0%.
- Additions for the year were \$173.1 million, which are comprised primarily of contributions of \$72.4 million and investment gains of \$100.6 million.
- Deductions increased over the prior year from \$120.5 million to \$129.8 million or 7.7%. This is largely due to increased retirement and health benefit payments. Including many Deferred Retirement Option Plan (DROP) payoffs as members reached the end date of their participation in the plan and withdrew their accumulated benefits.

THE STATEMENT OF PLAN NET ASSETS AND THE STATEMENT OF CHANGES IN PLAN NET ASSETS

This Comprehensive Annual Financial Report (CAFR) consists of two financial statements; *The Statements of Pension Plan and Other Postemployment Benefit Plan Net Assets* (page 22) and *The Statements of Changes in Pension Plan and Other Postemployment Benefit Plan Net Assets* (page 23). These financial statements report information about the System, as a whole, and about its financial condition that should help answer the question: Is the System, as a whole, better off or worse off as a result of this year's activities? These statements include all assets and liabilities using the economic resources measurement focus and the accrual basis of accounting. Under the accrual basis of accounting, all additions and deductions are taken into account regardless of when cash is received or paid.

The Statement of Pension Plan and Other Postemployment Benefit Plan Net Assets presents all of the System's assets and liabilities, with the difference between the two reported as net assets. Over time, increases and decreases in net assets measure whether the System's financial position is improving or deteriorating. *The Statement of Changes in Pension Plan and Other Postemployment Benefit Plan Net Assets* presents how the System's net assets changed during the most recent fiscal year. These two financial statements should be reviewed along with the Schedules of Funding Progress (page 41) and Schedules of Employer and Other Contributions (page 42) to determine whether the System is becoming financially stronger or weaker and to understand changes over time in the funded status of the System.

FINANCIAL SECTION

Management's Discussion and Analysis (continued)

FINANCIAL ANALYSIS

System total assets as of September 30, 2010, were \$1.2 billion and were mostly comprised of cash, investments, and contributions due from employers. Total assets increased \$21.8 million or 1.9% from fiscal year 2009 due primarily to an increase in invested assets, and decreased \$148.4 million or (11.5)% between fiscal years 2008 and 2009 due primarily to a decreases in invested assets.

Total liabilities as of September 30, 2010, were \$158.3 million and were mostly comprised of warrants outstanding, accounts payable, and obligations under securities lending. Total liabilities decreased \$21.5 million or (11.9)% between fiscal years 2009 and 2010 due primarily to a decrease in obligations under securities lending, and decreased \$17.3 million or (8.8)% between fiscal years 2008 and 2009, due primarily to a decrease in obligations under securities lending.

System assets exceeded its liabilities at the close of fiscal year 2010 by \$1,003.8 million. Total net assets held in trust for pension and OPEB increased \$43.3 million or 4.5% between fiscal years 2009 and 2010. The increase is the result of increases in invested assets for the year. Total net assets in fiscal year 2009 decreased by \$131.1 million or (12.0)% from the prior year.

Net Assets (in thousands)

FINANCIAL SECTION

Management's Discussion and Analysis (continued)

ADDITIONS TO PLAN NET ASSETS

The reserves needed to finance pension and other postemployment benefits are accumulated through the collection of employer contributions and through earnings on investments. Contributions and net investment gains for fiscal year 2010 totaled 173.1 million.

Total additions increased \$183.7 million from those of fiscal year 2010, due primarily to increased net investment gains. Total additions increased \$126.2 million between fiscal years 2008 and 2009 due primarily to less net investment losses. Total contributions increased between fiscal years 2009 and 2010 by \$5.4 million or 8.1%. This increase is due primarily to an increase in the contribution rate. Total contributions increased between fiscal years 2008 and 2009 by \$1.9 million or 2.8%. Net investment gains increased from fiscal year 2009 by \$178.3 million. Investment income losses decreased between fiscal years 2008 and 2009 by \$124.8 million. The Investment Section of this report reviews the results of investment activity for fiscal year 2010.

DEDUCTIONS FROM PLAN NET ASSETS

The primary expenses of the System include the payment of pension benefits to members and beneficiaries, payment for health, dental and vision benefits, refund of contributions to former members, and the cost of administering the System. Total deductions for fiscal year 2010 were \$129.8 million, an increase of 7.7% over fiscal year 2009 deductions.

Payments for health care benefits to members and beneficiaries increased by \$1.4 million or 4.6% from \$30.0 million to \$31.4 million. This compares to an increase of \$0.3 million or 1.1% from \$29.7 million to \$30.0 million between fiscal years 2008 and 2009. Pension benefit payments increased by \$8.7 million or 9.8% between fiscal years 2009 and 2010, and by \$0.9 million or 1.0% between fiscal years 2008 and 2009. The increase in pension benefit deductions in 2010 is due primarily to an increase in retirees (41). In fiscal year 2009, the increase in pension benefit deductions resulted from an increase in the average benefit paid to each retiree even with the decrease in retirees (15). Administrative expenses decreased by \$0.8 million or (37.9)% from \$2.0 million in fiscal year 2009 to \$1.2 million in fiscal year 2010, due primarily to a decrease in OPEB administrative fees paid to insurance carriers. Administrative expenses increased by \$0.1 million or 5.0% between fiscal years 2008 and 2009, due primarily to an increase in OPEB administrative fees paid to insurance carriers.

FINANCIAL SECTION

Management's Discussion and Analysis (continued)

RETIREMENT SYSTEM AS A WHOLE

The System's combined net assets experienced an increase in 2010 after a decrease in 2009 and a decrease in 2008. This increase is a result of an improving national economy that resulted in net investment gains for fiscal year ended September 30, 2010. The system's rate of return increased an over all 15.0% from a (6.5)% loss in fiscal year 2009 to an 8.5% return during fiscal year 2010. Management believes that the system remains financially sound and positioned to meet its ongoing benefit obligations due, in part, to a prudent investment program, cost controls, and strategic planning.

CONTACTING SYSTEM FINANCIAL MANAGEMENT

This financial report is designed to provide the Retirement Board, our membership, taxpayers, investors, and creditors with a general overview of the System's finances and to demonstrate the System's accountability for the money it receives. If you have any questions about this report or need additional financial information, contact the Office of Retirement Services, P.O. Box 30171, Lansing, MI 48909-7671.

NOTE 1 - PLAN DESCRIPTION

ORGANIZATION

The Michigan State Police Retirement System (System) is a single employer, state-wide, defined benefit public employee retirement plan governed by the State of Michigan (State), created under Public Act 251 of 1935, recodified and currently operating under Public Act 182 of 1986. Section 7 of this act establishes the board's authority to promulgate or amend the provisions of the System. The System's pension plan was established by the State to provide retirement, survivor, and disability benefits to Michigan State Police. In addition, the System's OPEB plan provides all retirees with the option of receiving health, dental, and vision coverage under the State Police Retirement Act. The System is a qualified pension trust fund under section 401(a) of the Internal Revenue Code.

The System's financial statements are included as a pension and other employee benefit trust fund in the combined financial statements of the State.

The System is administered by the Office of Retirement Services within the Michigan Department of Technology, Management & Budget (DTMB). The Department Director appoints the Office Director who serves as Executive Secretary to the System's Board, with whom the general oversight of the System resides. The State Treasurer serves as the investment officer and custodian for the System.

MEMBERSHIP

At September 30, 2010, and 2009 the System's membership consisted of the following:

Retirees and beneficiaries currently receiving benefits:		
Regular benefits	<u>2010</u>	<u>2009</u>
Survivor benefits	2,149	2,117
Disability benefits	441	438
	172	166
Total	<u>2,762</u>	<u>2,721</u>
Current employees:		
Vested	1,391	1,339
Non-vested	165	316
Total	<u>1,556</u>	<u>1,655</u>
DROP program participants	133	149
Inactive employees entitled to benefits and not yet receiving them	<u>35</u>	<u>26</u>
Total all members	<u><u>4,486</u></u>	<u><u>4,551</u></u>

Enrollment in the health plan is voluntary. The number of participants is as follows:

Health, Dental, and Vision Plans	<u>2010</u>	<u>2009</u>
Eligible participants	2,762	2,721
Participants receiving benefits:		
Health	2,460	2,420
Dental	2,447	2,406
Vision	2,454	2,411

BENEFIT PROVISIONS -- PENSION

Introduction

Benefit provisions of the defined benefit pension plan are established by State statute, which may be amended. Public Act 182 of 1986, Michigan State Police Retirement Act, as amended, establishes eligibility and benefit provisions for the defined benefit pension plan. Retirement benefits are determined by final average compensation. Members are eligible to receive a monthly benefit when they meet certain age and service requirements. The System also provides duty disability, non-duty disability, and survivor benefits.

A member who leaves Michigan State Police employment may request a refund of his or her member contribution account. The System is currently non-contributory. A refund cancels a former member's rights to future benefits and there is no provision for repaying the refund of contributions to restore the service represented by the refund.

Regular Retirement

The retirement benefit is available if a member retires after 25 years of credited service (employment). The retirement benefit equals 60% of a member's final average compensation and is payable monthly over the lifetime of a member. Final average compensation is the average annual salary for a member's last two years of service with the Department of State Police.

Deferred Retirement

Any member with 10 or more years of credited service who terminates employment but has not reached the age of 50 is a deferred member and is entitled to receive a monthly allowance upon reaching age 50, provided the member's accumulated contributions have not been refunded. The deferred benefit is equal to two percent of the final average compensation times the years and partial years of service credit.

Non-Duty Disability Benefit

A member with 10 or more years of credited service who becomes totally and permanently disabled not due to performing duties as an employee of the Michigan State Police is eligible for a non-duty disability pension. The non-duty disability benefit is 2.4% of the final average compensation times years and partial years of credited service (but not more than 25 years).

Duty Disability Benefit

A member who becomes totally and permanently disabled from performing duties as a Michigan State Police Officer is eligible for a duty disability pension. The amount, payable monthly, is equal to 60% of the final average compensation.

Survivor Benefit

Upon the death of a member who completed at least 10 years of service, the surviving spouse receives a benefit based on 2.4% of the final average compensation for each year and partial year of credited service. If there is no spouse, surviving children are entitled to equally share the benefit until age 18. If death occurs in the line of duty, the surviving spouse receives a benefit of 60% of the final average compensation. Children receive \$100 each month until age 18. A \$1,500 funeral expense is also authorized by State statute.

Post Retirement Adjustments

Effective October 1, 1996, the monthly pension was increased 10% if certain requirements were met. This was a one time increase.

Each October 1, the benefits of all pension recipients increase 2% (not to exceed \$500). This non-compounding increase is paid to persons who have been retired 12 months.

FINANCIAL SECTION

Notes to Basic Financial Statements (continued)

Contributions

Member Contributions - Members currently participate on a noncontributory basis. Under certain circumstances, members may contribute to the System for the purchase of creditable service, such as military, maternity or paternity leave, Peace Corps or VISTA service. If a member terminates employment before a retirement benefit is payable, the member's contribution and interest on deposit are refunded. If the member dies before being vested, the member's contribution and interest are refunded to the designated beneficiaries.

Employer Contributions - The statute requires that the employer contribute to finance the benefits of plan members. These employer contributions are determined annually by the System's actuary and are based upon level-percent-of-payroll funding principles so that the contribution rates do not have to increase over time. A chart showing the employer contribution rates is included on the Schedule of Additions by Source in the Statistical Section.

Deferred Retirement Option Plan

Public Act 83 of 2004 amended the State Police Retirement Act to create a Deferred Retirement Option Plan (DROP) for members with 25 years of service. This benefit program allows state police who are eligible to retire to defer their retirement and keep working for up to six years. The participant's pension amount is calculated on the day before the DROP period starts, and a percentage of the equivalent monthly pension is credited to an interest-bearing account in the participant's name. The DROP balance will be available at the time their DROP participation ends.

Banked Leave Time

Public Act 50 of 2004 amended the State Police Retirement Act to include Banked Leave Time (BLT) for members. BLT is an extension of the State's current annual leave program, which banks a predetermined number of hours per pay period. However, the BLT program will not have an effect on a member's Final Average Compensation calculation.

BENEFIT PROVISIONS – OTHER POSTEMPLOYMENT

Introduction

Benefit provisions of the postemployment benefit plan are established by State statute, which may be amended. Public Act 182 of 1986, as amended, establishes eligibility and benefit provisions for the OPEB plan. Members are eligible to receive health, prescription drug, dental, and vision coverage on the first day they start receiving pension benefits. There are no ad hoc or automatic increases. The State Police Retirement Act requires joint authorization by DTMB and the Civil Service Commission to make changes to retiree medical benefit plans.

Under the Michigan State Police Retirement Act, all retirees have the option of continuing health, dental, and vision coverage. Retirees with this coverage contribute 5%, 10%, and 10% of the monthly premium amount for the health, dental, and vision coverage, respectively. The State funds 95% of the health and 90% of the dental and vision insurance. The employer payroll contribution rate to provide these benefits was 27.9% and 25.0% for 2010 and 2009, respectively.

The State Health Plan PPO is by far the most often selected health care option. This plan includes comprehensive coverage traditionally referred to as basic and major medical, with full coverage for most services received in-network after an annual deductible is met. Preventive services are not subject to a deductible and are fully covered if received in-network subject to an annual maximum. Both retail and mail order prescription drug coverage is included. Retiree health, dental, and vision plan benefits have generally matched those in place for active employees.

Retirees are also provided with life insurance coverage equal to 25% of the active life insurance coverage, \$1,000 for spouse and \$1,000 for each dependent under the age of 23. Premiums are fully paid by the State.

FINANCIAL SECTION

Notes to Basic Financial Statements (continued)

The number of participants and other relevant financial information are as follows:

Dental	2,447	2,406
Vision	2,454	2,411
Expenses for the year	\$ 32,255,725	\$ 31,631,930
Employer payroll contribution rate	27.9%	25.0%

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting and Presentation

The System's financial statements are prepared using the accrual basis of accounting. Contributions from the State are recognized as revenue when due and payable. Benefits and refunds are recognized when due and payable in accordance with the terms of the System.

Reserves

Public Act 182 of 1986, as amended, created the Reserve for Employee Contributions, Reserve for Employer Contributions, Reserve for Retired Benefit Payments, Reserve for Undistributed Investment Income, and Reserve for Health (OPEB) Related Benefits. The financial transactions of the System are recorded in these reserves as required by Public Act 182 of 1986, as amended.

Reserve for Employee Contributions - Members do not contribute to this reserve except to purchase eligible service credit. This reserve represents active member contributions and interest less amounts transferred to the Reserve for Retired Benefit Payments for regular and disability retirement, amounts refunded to terminated members, and unclaimed amounts transferred to the income reserve. At September 30, 2010, and 2009, the balance in this reserve was \$901.7 thousand and \$802.4 thousand, respectively.

Reserve for Employer Contributions - All employer contributions are credited to this reserve. Interest from the Reserve for Undistributed Investment Income is credited annually. Amounts are transferred annually from this reserve to the Reserve for Retired Benefit Payments to fund that reserve. At September 30, 2010, and 2009, the balance in this reserve was \$71.3 million and \$34.1 million, respectively.

Reserve for Retired Benefit Payments - This represents the reserve for payment of future retirement benefits to current retirees. At retirement, a member's accumulated contributions plus interest are transferred into this reserve from the Reserve for Employee Contributions. Monthly benefits, which are paid to the retirees, reduce this reserve. At the end of each fiscal year, an amount is transferred from the Reserve for Employer Contributions to bring the reserve into balance with the actuarial present value of retirement allowances. Also included are reserves for casualty experience (injury or death of a member, or vested former member). The initial actuarial casualty valuation determined the full funding reserve requirements to be allocated from assets of the reserve. All retiree casualty payments are made from this reserve. At September 30, 2010, and 2009, the balance in this reserve was \$997.1 million and \$1,009.9 million, respectively.

Reserve for Undistributed Investment Income - The net investment earnings (losses) are recorded in this reserve. Interest as authorized by the board is transferred annually to the other reserves. Administrative expenses are paid from this reserve. At September 30, 2010, and 2009, the balance of this reserve was (\$70.2) million and (\$86.5) million, respectively.

FINANCIAL SECTION

Notes to Basic Financial Statements (continued)

Reserve for Health (OPEB) Benefits - This reserve is credited with employer contributions for retirees' health (including prescription coverage, dental, and vision) benefits. The required contribution is based on pay-as-you-go funding and represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liability (or funding excess) over a period not to exceed thirty years. However, the actual annual contributions have been less than the annual required contribution (ARC). From this reserve, the System pays 95% of the premiums for hospitalization and medical coverage insurance and 90% of the monthly premium for dental and vision coverage insurance. At September 30, 2010, the balance in this reserve was \$4.8 million. At September 30, 2009, the balance in this reserve was \$2.2 million.

Reporting Entity

The System is a pension and other employee benefit trust fund of the State. As such, the System is considered part of the State and is included in the State's Comprehensive Annual Financial Report as a pension and other employee benefit trust fund. The System and its Board are not financially accountable for any other entities or other organizations. Accordingly, the System is the only entity included in this financial report.

Benefit Protection

Public Act 100 of 2002 was passed by the Michigan Legislature to protect pension benefits of public employees from alienation (being transferred). Alienation is attachment, garnishment, levy, execution, bankruptcy or other legal process except for divorce orders or eligible domestic relation orders. The statutes governing the System contained an "anti-alienation" clause to provide for this protection; however, many smaller public pension systems did not have the benefit of this protection. Therefore, Public Act 100 of 2002 was passed to establish legal protection of pension assets that encompasses all public employees.

Fair Value of Investments

Plan investments are reported at fair value. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates. Corporate bonds not traded on a national or international exchange are based on equivalent values of comparable securities with similar yield and risk. Real estate debt is valued on the basis of future principal and interest payments, and is discounted at prevailing interest rates for similar instruments. The fair value of real estate investments is based on independent appraisals. Securities purchased with cash collateral under securities lending activities are recorded at estimated fair value. Other investments not having an established market are recorded at estimated fair value.

Investment Income

Dividend and interest income is recognized on the accrual basis. Fair value changes are recorded as investment income or loss. Purchases and sales of investments are recorded as of the trade date (the date upon which the transaction is initiated), except for purchase and sale of mortgages, real estate, and alternative investments, which are recorded as of the settlement date (the date upon which the transaction is ultimately completed). The effect of recording such transactions as of the settlement date does not materially affect the financial statements.

Costs of Administering the System

Each year a restricted general fund appropriation is requested to fund the on-going business operations of the System. These administrative costs are ultimately funded by the System through the regular transfer of funds from the System to the State's general fund based on either a direct cost or allocation basis depending on the nature of the expense. Costs of administering the System are financed by undistributed investment income of the System.

Property and Equipment

Office space is leased from the State on a year to year basis. Office equipment is capitalized if the value exceeds \$5,000. These assets are recorded at cost and are reported net of depreciation in the Statement of Pension Plan and Other Postemployment Benefit Plan Net Assets. Such assets are depreciated on a straight-line basis over 10 years. The System does not have equipment that falls within these parameters.

FINANCIAL SECTION

Notes to Basic Financial Statements (continued)

Related Party Transactions

Leases and Services — The System leases operating space and purchases certain administrative, data processing, legal and investment services from the State. The space and services are not otherwise available by competitive bid. The following summarizes costs incurred by the System for such services.

	<u>2010</u>	<u>2009</u>
Building Rentals	\$ 10,801	\$ 10,474
Technological Support	81,170	74,654
Attorney General	44,727	41,842
Investment Services	278,040	257,864
Personnel Services	96,279	92,564

Cash— On September 30, 2010, and 2009, the System had \$4.1 million and \$4.9 million, respectively in a common cash investment pool maintained for various State operating funds. The participating funds in the common cash pool earn interest at various rates depending upon prevailing short-term interest rates. Earnings from these activities amounted to \$2,954 and \$22,940 for the years ended September 30, 2010, and 2009, respectively.

Reclassification of Prior Year Amounts

Amounts due from members and amounts due from employers for fiscal year 2009 activity have been reclassified between line items on the Statement of Net Assets. Components of investment income (loss), specifically the net appreciation/(depreciation) in fair value of investments and interest, dividends and other lines on the fiscal year 2009 Statement of Changes in Plan Net Assets have been reclassified between line items. The total activity for the System has remained the same.

NOTE 3 – CONTRIBUTIONS AND FUNDED STATUS

Contributions

Members currently participate in the System on a noncontributory basis. Under certain circumstances, members may contribute to the System for the purchase of creditable service, such as military service or maternity leave. The State is required by Public Act 182 of 1986, as amended, to contribute amounts necessary to finance the benefits of its employee and retiree OPEB. Contribution provisions are specified by State statute and may be amended only by action of the State Legislature.

Employer contributions to the System are determined on an actuarial basis using the entry age normal actuarial cost method. Under this method, the actuarial present value of the projected benefits of each individual included in the actuarial valuation is allocated on a level basis over the service of the individual between entry age and assumed exit age. The portion of this cost allocated to the current valuation year is called the normal cost. The remainder is called the actuarial accrued liability. Normal cost is funded on a current basis. For retirement and OPEB benefits, the unfunded (overfunded) actuarial accrued liability will be amortized over a 26 year period for the 2010 fiscal year and is amortized over a 27 year period for the 2009 fiscal year.

Actual employer contributions for retirement benefits were \$37.9 million and \$35.4 million for fiscal years 2010 and 2009, respectively, representing 28.8% of annual covered payroll for the year ended September 30, 2009. The fiscal year 2010 annual covered payroll is not yet available. Required employer contributions, based on previous year actuarial valuations, for pensions included:

1. \$22.9 million and \$22.4 million for fiscal years 2010 and 2009, respectively, for the normal cost of pensions representing 18.5% and 18.5% (before reconciliation) of annual covered payroll for fiscal years 2009 and 2008, respectively.
2. \$18.8 million and \$14.3 million for fiscal years 2010 and 2009, respectively, for amortization of underfunded actuarial accrued liability representing 15.2% and 11.9% (before reconciliation) of annual covered payroll for fiscal years 2009 and 2008, respectively.

FINANCIAL SECTION

Notes to Basic Financial Statements (continued)

Actual employer contributions for OPEB were \$32.9 million and \$29.8 million for fiscal years 2010 and 2009, respectively, representing 26.7% of annual covered payroll for the year ended September 30, 2009. The fiscal year 2010 annual covered payroll is not yet available. Required employer contributions, based on previous year actuarial valuations, for OPEB included:

1. \$24.6 million and \$26.5 million for fiscal years 2010 and 2009, respectively, for the normal cost of OPEB representing 19.9% and 22.0% (before reconciliation) of annual covered payroll for fiscal years 2009 and 2008 respectively.
2. \$35.5 million and \$37.4 million for fiscal years 2010 and 2009, respectively, for amortization of unfunded actuarial accrued liability representing 28.8% and 31.0% (before reconciliation) of annual covered payroll for fiscal years 2009 and 2008, respectively.

The system is required to reconcile with actuarial requirements annually. Any funding excess or deficiency for pension benefits is smoothed over five years. One-fifth (20%) of the funding excess or deficiency is included in each of the subsequent years' contribution, and is not recognized as a payable or receivable in the accounting records.

Funded Status

The employer is required to contribute at an actuarially determined rate for both pension benefits and OPEB. For fiscal year 2009, the actuarial accrued liability (AAL) for pension benefits was \$1.5 billion, and the actuarial value of assets was \$1.2 billion, resulting in an unfunded actuarial accrued liability (UAAL) of \$295.9 million and a funded ratio of 80.7%. The covered payroll (annual payroll of active employees covered by the plan) was \$123.2 million, and the ratio of the UAAL to the covered payroll was 240.1%.

For fiscal year 2009, the actuarial accrued liability (AAL) for OPEB was \$882.3 million, and the actuarial value of assets was \$0, resulting in an unfunded actuarial accrued liability (UAAL) of \$882.3 million and a funded ratio of 0.0%. The covered payroll (annual payroll of active employees covered by the plan) was \$123.2 million, and the ratio of the UAAL to the covered payroll was 715.9%.

Actuarial Valuations and Assumptions

Actuarial valuations for both the pension and OPEB plans involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trends. Amounts determined regarding the funded status of the plan and the annual required contributions (ARC) are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedules of funding progress, presented as required supplementary information following the notes to the financial statements, present multi-year trend information about whether the actuarial value of plan net assets for both pension and OPEB plans is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

The accompanying schedules of employer contributions present trend information about the amounts contributed to the plans by employers in comparison to the ARC, an amount that is actuarially determined in accordance with the parameters of GASB Statement No. 25 for pension contributions and GASB Statement No. 43 for OPEB contributions.

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

FINANCIAL SECTION

Notes to Basic Financial Statements (continued)

The information presented in the required supplementary schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest actuarial valuation follows:

Summary of Actuarial Assumptions

Valuation Date	9/30/2009
Actuarial Cost Method	Entry Age, Normal
Amortization Method - Pension	Level Percent of Payroll, Closed
Amortization Method - OPEB	Level Percent of Payroll, Closed
Remaining Amortization Period - Pension	27 years *
Remaining Amortization Period - OPEB	27 years
Asset Valuation Method - Pension	5-Year Smoothed Market
Asset Valuation Method - OPEB	Market
Actuarial Assumptions:	
Wage Inflation Rate	3.5%
Investment Rate of Return--Pension	8.0%
Investment Rate of Return--OPEB	4.0%
Projected Salary Increases	3.5% - 93.5%
Cost-of-Living Pension Adjustments	2% Annual Non-Compounded with Maximum Annual Increase of \$500 for those eligible
Healthcare Cost Trend Rate	9.0% Year 1 graded to 3.5% Year 12
Other Assumptions OPEB only:	
Opt Out Assumption	6% of eligible participants are assumed to opt out of the retiree health plan
Survivor Coverage	85% of male retirees and 70% of female retirees are assumed to have coverage continuing after the retiree's death
Coverage Election at Retirement	85% of male and 70% of female future retirees are assumed to elect coverage for 1 or more dependents

* Based on the provisions of GASB Statement Nos. 25, 43 and 45 when the actuarial accrued liability for a defined benefit pension plan is underfunded or overfunded, the difference should be amortized over a period not to exceed thirty years for the fiscal periods beginning on or after June 15, 2006.

NOTE 4 - INVESTMENTS

Investment Authority

Under Public Act 380 of 1965, as amended, the authority for the purchase and the sale of investments resides with the State Treasurer. Investments are made subject to the Michigan Public Pension Investment Act, Public Act 314 of 1965, as amended. The Michigan Public Pension Investment Act authorizes, with certain restrictions, the investment of pension fund assets in stocks, corporate and government bonds and notes, mortgages, real estate, and certain short-term

FINANCIAL SECTION

Notes to Basic Financial Statements (continued)

and alternative investments. Investments must be made for the exclusive purposes of providing benefits to active members, retired members and beneficiaries, and for defraying the expenses of investing the assets.

Under Public Act 314 of 1965, as amended, the State Treasurer may invest up to 5% of the System's assets in small businesses having more than one-half of assets or employees in Michigan as described in section 20(a) of the Act and up to 20% of the System's assets in investments not otherwise qualified under the Act as described in section 20(d).

Alternative investments include limited partnerships and distributions from these partnerships in the form of bonds, preferred stock, common stock, and direct investments.

Derivatives

The State Treasurer employs the use of derivatives in the investment of the pension and other employee benefit trust funds (the trust funds).

Derivatives are used in managing the trust fund portfolios, but uses do not include speculation or leverage of investments. Less than 12% of the total trust funds' portfolio has been invested from time to time in future contracts, swap agreements, and option contracts. State investment statutes limit total derivative exposure to 15% of a fund's total asset value, and restrict uses to replication of returns and hedging of assets. Swap agreements represent the largest category of derivatives used, and they represented 6.2% of market value of total pooled assets on September 30, 2010 and 7.8% of market value of total pooled assets on September 30, 2009. In fiscal year 2010, structured notes were purchased. These notes represented 0.3% of market value of total pooled assets on September 30, 2010. Future contracts represented 0.0% of market value of total pooled assets on September 30, 2010, and September 30, 2009. Option contracts represented 0.0% of market value of total pooled assets on September 30, 2010, and September 30, 2009. The derivative fair values are reported on the Statements of Pension Plan and Other Postemployment Benefit Plan Net Assets as of September 30, 2010 and 2009 statements, in their respective investment pools market value. Derivative realized and unrealized gain (loss) are reported on the Statement of Changes in Pension Plan and Other Postemployment Benefit Plan Net Assets for fiscal years ended September 30, 2010 and 2009 statements, under "Investment income (loss)", in "Net appreciation (depreciation) in fair value of investments".

To diversify the trust funds' portfolio, the State Treasurer has entered into swap agreements with investment grade counterparties, which are tied to stock market indices in twenty-three foreign countries for the International Equity Pools. The notional amounts of the swap agreement at September 30, 2010 and 2009, were \$65.3 million and \$89.1 million, respectively. Approximately one quarter of the notional amount tied to foreign stock market indices is hedged against foreign currency fluctuations. The swap agreements provide that the System will pay quarterly, over the term of the swap agreements, interest indexed to the three month London Inter Bank Offer Rate (LIBOR), adjusted for an interest rate spread, on the notional amount stated in the agreements. The maximum loss due to counterparty credit risk is the amount that would be incurred if the counterparties to the derivative instrument failed to perform according to the terms of the contract, without respect to any collateral or other security, or netting arrangement. Counterparty credit risk will always be significantly less than the swap agreement notional totals. On September 30, 2010 and 2009, the maximum amount of counterparty credit risk was \$7.8 million and \$7.1 million, respectively. At the maturity of the swap agreements, the trust funds will either receive the increase in the value of the equity indices from the level at the inception of the agreements, or pay the decrease in the value of the indices. Swap agreement maturity dates range from October 2010 to April 2012. U.S. Domestic LIBOR based floating rate notes and other investments earning short-term interest are held to correspond with the notional amount of the swap agreements. The State Treasurer maintains custody and control of these dedicated notes and short-term investments.

The value of these synthetic equity structures is a combination of the value of the swap agreements and the value of the notes and short-term investments. The book value represents the cost of the notes and short-term investments. The current value represents the current value of the notes and short-term investments and the change in the value of the underlying indices from the inception of the swap agreements. The current value is used as a representation of the fair value based on the intention to hold all swap agreements until maturity. For fiscal years ending September 30, 2010 and 2009, international equity investment programs involving swaps, incurred a net realized investment income loss of \$6.9 million and \$3.6 million, respectively.

FINANCIAL SECTION

Notes to Basic Financial Statements (continued)

The net unrealized gain of \$1.5 million at September 30, 2010, primarily reflects increases in bond market values, increases in international indices, and changes in currency exchange rates. The combined swap structure generally realizes gains and losses on a rolling multi-year basis.

The respective September 30, 2010 and 2009, swap values are as follows:

	<u>Notional Value</u>	<u>Current Value</u>
9/30/2010 (dollars in millions)	\$65.3	\$64.5
9/30/2009 (dollars in millions)	\$89.1	\$77.8

To get enhanced passive exposure to the Dow Jones UBS Commodity Total Return Index, the State Treasurer purchased structured notes from investment grade counterparties for the Absolute Return Pools. These notes are fully collateralized and pay cash rates on the underlying collateral, as well as, providing the enhanced index return. Similar to a swap agreement with prices changing with the underlying index fluctuations, the notes differ due to their daily put option which allows the structure to end and settle before its final maturity in November 2016. For the fiscal year ending September 30, 2010, the notional value was \$3.2 million and the fair value of the structured notes was \$3.3 million. At September 30, 2010, the structured notes' fair value of \$3.3 million was subject to counterparty credit risk. The unrealized gain at September 30, 2010, was \$0.1 million.

To enhance management flexibility, the State Treasurer traded U.S. Treasury bond future contracts for the Fixed Income Pools. The U.S. Treasury bond future contracts were used to manage duration and yield curve exposure. U.S. Treasury bond future contracts' notional values at September 30, 2010 and 2009, were \$0.2 million and (\$0.2) million, respectively. For the fiscal year ending September 30, 2010 and 2009, the fair values were \$0.5 thousand and \$1.9 thousand, respectively. The realized gain at September 30, 2010, was \$5.2 thousand and the realized loss at September 30, 2009, was \$14.6 thousand.

To provide downside protection and enhance current income the State Treasurer traded covered equity options on single securities for the Absolute Return Pools. Put options are used to protect against large negative moves in single stocks, as well as, to express interest in a security that is trading well below its intrinsic value. Call options have been used to achieve current income on single equity securities that are trading near their intrinsic value. Equity options' notional values on September 30, 2010 and 2009 were \$0.0 and \$0.1 million, respectively. For the fiscal years ending September 30, 2010 and 2009, the fair values of the equity options were \$0.0 and (\$0.4) thousand, respectively. The realized gain on options at September 30, 2010 and 2009, was \$77.2 thousand and \$28.7 thousand, respectively.

Securities Lending

State statutes allow the System to participate in securities lending transactions, and the System has, by way of an Agreement, authorized Credit Suisse, the agent bank, to lend the System's securities to broker-dealers and banks pursuant to a form of loan agreement.

During the fiscal years, the agent bank lent, at the direction of the State Treasurer, the System's securities and received cash (United States) as collateral. The types of securities lent were equity, and fixed income, which includes government and corporate bonds and notes. Borrowers were required to deliver collateral for each loan equal to (i) in case of loaned securities denominated in United States dollars or whose primary trading market was located in the United States or sovereign debt issued by foreign governments, 102% of the fair value of the loaned securities; and (ii) in the case of loaned securities not denominated in United States dollars or whose primary trading market was not located in the United States, 105% of the fair value of the loaned securities.

The agent bank agreed to indemnify the System by purchasing replacement securities, or returning cash collateral in the event borrower failed to return the loaned security or pay distributions thereon, due to the borrower's insolvency.

Under Master Securities Lending Agreements between the System and each borrower, the System and the borrowers have the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested in assets held in a collateral account dedicated to the System. As of September 30, 2010 and 2009, such assets had an average weighted maturity to next reset of 3.8 years and 3.5 years respectively and an average weighted maturity of 12.6 years and 8.5 years respectively. Because the loans are terminable at will, their duration did not generally match

FINANCIAL SECTION

Notes to Basic Financial Statements (continued)

the duration of the investments made with cash collateral. On September 30, 2010 and 2009, the System had no credit risk exposure to borrowers. The cash received for securities on loan for the System as of September 30, 2010 and 2009, was \$141,700,861 and \$173,583,109 respectively. The fair market value of assets held in the dedicated collateral account at the custodian for the System as of September 30, 2010 and 2009, was \$110,384,585 and \$134,959,834 respectively. The carrying amount, which is the fair market value, of securities on loan for the System as of September 30, 2010 and 2009, was \$138,269,636 and \$168,902,632 respectively.

Gross income, including capital gains and losses, from security lending for fiscal years ended September 30, 2010 and 2009, with Credit Suisse was \$2,468,782 and \$3,543,537 respectively. Expenses associated with this income were the borrower's rebate of \$221,126 and \$1,363,624 and fees paid to the agent bank of \$425,770 and 327,248 respectively.

In 2008 substantial volatility in the financial markets impacted the fair value estimates for securities lending collateral. The System recorded an unrealized loss of \$44.6 million at September 30, 2008 and a reduction of the losses of \$7.3 million and \$6.0 million at September 2010 and 2009 respectively.

Risk

In accordance with GASB Statement No. 40, investments require certain disclosures regarding policies and practices, and the risks associated with them. The credit risk (including custodial credit risk and concentration of credit risk), the interest rate risk, and the foreign currency risk are discussed in the following paragraphs. Amounts represent the pro-rata share of the underlying investments as required by GASB Statement No. 40. These are held in internal investment pools and reported as such in the financial statements.

Credit Risk - Credit risk is the risk that an issuer will not fulfill its obligations.

- Short-Term Fixed Income Investments - Prime commercial paper investments must be rated A-1 or P-1 at the time of purchase as rated by the two major rating services Standard and Poor's Corporation (S&P) and Moody's Investor Service (Moody's), respectively. Borrowers must have at least \$400.0 million in commercial paper outstanding, and the State Treasurer may not invest in more than 10% of the borrowers' outstanding debt. The investments are further limited to \$200.0 million in any borrower, unless the borrower has an A-1+ rating in which case the investment is not to exceed \$300.0 million.
- Long-Term Fixed Income Investments - These investments must be investment grade or better at the time of purchase unless specific requirements are met as defined by Public Act 314 of 1965, as amended, and the State Treasurer's investment policy. Law defines investment grade as investments in the top four major grades, rated by two national rating services, S&P (AAA, AA, A, BBB) and Moody's (Aaa, Aa, A, Baa). At September 30, 2010 and 2009, the System was in compliance with the policy in all material aspects.

¹ International Investment types consist of domestic floating rate note used as part of a Swap strategy.

Custodial Credit Risk - Custodial credit risk for investments is the risk that, in the event of a failure of the counterparty, the State will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party.

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government and are held by either:

- The counterparty; or
- The counterparty's trust department or agent but not in the government name.

The State Treasurer does not have a policy for custodial credit risk. However, the State's custodial bank had a credit rating of A+ at September 30, 2010. As of September 30, 2010 and September 30, 2009, no securities were exposed to custodial credit risk.

FINANCIAL SECTION

Notes to Basic Financial Statements (continued)

Concentration of Credit Risk - Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer.

Other than obligations issued, assumed or guaranteed by the United States, its agencies or United States government sponsored enterprises, the System is prohibited by Public Act 314 of 1965, as amended, from investing in more than 5% of the outstanding obligations of any one issuer or investing more than 5% of a System's assets in the obligations of any one issuer.

At September 30, 2010, and 2009, there were no investments in any single issuer that accounted for more than 5% of the System's assets nor were there any investments totaling more than 5% of the obligations of any one issuer, other than U.S. Government Securities as described above.

Interest Rate Risk - Fixed Income Investments - Interest rate risk is the risk that changes in interest rates of debt investments will adversely affect the fair value of an investment.

The State Treasurer's policy states that cash equivalents are invested in short-term fixed income securities with an average weighted maturity of less than one year to provide liquidity and safety of principal from capital market and default risk. At September 30, 2010, and 2009, the fair value of the System's prime commercial paper was \$38.8 million and \$25.3 million with the weighted average maturity of 8 days and 5 days, respectively.

The State Treasurer does not have a policy regarding interest rate risk for long-term debt investments. However, the trust funds are invested with a long-term strategy. The goal is to balance higher returns while accepting minimum risk for the return. Analyzing the yield curve on individual securities as compared to U.S. Treasuries determines, in part, what is an acceptable risk for the return. Therefore, market conditions such as lower interest rates result in shorter duration and higher interest rates result in longer duration.

FINANCIAL SECTION

Notes to Basic Financial Statements (continued)

Foreign Currency Risk - Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or deposit.

The System invests in various securities denominated in foreign currencies. These investments are limited to 20% of the total assets of the System with an additional limit of 5% of the outstanding foreign securities of any single issuer. No investment is allowed in a country that has been identified by the United States State Department as engaging in or sponsoring terrorism. These limits are set forth in Public Act 314 of 1965, as amended. The types of foreign investments include equities, fixed income, mutual funds, real estate, and limited partnerships. At September 30, 2010, and 2009, the total amount of foreign investment subject to foreign currency risk was \$112.2 million and \$84.9 million which amounted to 10.8% and 8.5% of total investments (exclusive of securities lending collateral) of the System, respectively.

NOTE 5 – ACCOUNTING CHANGES AND RESTATEMENT

The GASB has issued Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments*. This statement establishes accounting and financial reporting requirements for derivative instruments entered into by state and local governments. The requirements of this new Statement are effective for financial statements for periods beginning after June 15, 2009.

NOTE 6 - COMMITMENTS AND CONTINGENCIES

Under the Administrative Procedures Act, members may appeal a decision by the Board. Once the administrative procedure has been exhausted, the decision may be appealed in Michigan's court system. Various cases that have exhausted the administrative procedures have been appealed in the court system. These cases are in the normal course of business and the System does not anticipate any material loss as a result of the contingent liabilities.

FINANCIAL SECTION

Required Supplementary Information

Schedules of Funding Progress

Expressing the net assets available for benefits as a percentage of the actuarial accrued liability provides one indication of the System's funding status. Analysis of this percentage over time indicates whether the System is becoming financially stronger or weaker. Generally, the greater this percentage, the stronger the System. Trends in unfunded actuarial accrued liability and annual covered payroll are both affected by inflation. Expressing the unfunded or overfunded actuarial accrued liability as a percentage of annual covered payroll approximately adjusts for the effects of inflation and aids analysis of progress made in accumulating sufficient assets to pay benefits when due. Generally, the smaller this percentage, the stronger the System.

Note to Required Supplementary Information

NOTE A - DESCRIPTION

Ten year historical trend information designed to provide information about the System's progress made in accumulating sufficient assets to pay benefits when due is presented in the preceding schedules. Other ten year historical trend information related to the System is presented in the Statistical and Actuarial Sections of the report. This information is presented to enable the reader to assess the progress made by the System in accumulating sufficient assets to pay pension and other postemployment benefits as they become due. Because this is the fourth year the system is reporting other postemployment benefits in accordance with GASB Statement No. 43, only four years of historical trend information is provided.

The comparability of trend information is affected by changes in actuarial assumptions, benefit provisions, actuarial funding methods, accounting policies, and other changes. Those changes usually affect trends in contribution requirements and in ratios that use the pension and other postemployment benefit obligations as a factor.

The Schedules of Funding Progress and Schedules of Employer Contributions are reported as historical trend information. The Schedules of Funding Progress are presented to measure the progress being made to accumulate sufficient assets to pay benefits when due. The Schedules of Employer Contributions are presented to show the responsibility of the Employer in meeting the actuarial requirements to maintain the System on a sound financial basis.

Report on Investment Activity

INTRODUCTION

The State Treasurer reports investment activity quarterly to the Investment Advisory Committee (Committee), which reviews the investments, goals, and objectives of the retirement funds and may submit recommendations regarding them to the State Treasurer. The Investment Advisory Committee may also, by a majority vote, direct the State Treasurer to dispose of any holdings that, in the Committee's judgment, are not suitable for the funds involved, and may, by unanimous vote, direct the State Treasurer to make specific investments.

The Investment Advisory Committee was created by Act 380 of the Public Acts of 1965. The three public members of the five-member committee are appointed by the Governor with the advice and consent of the Senate for three-year terms. The Director of the Department of Energy, Labor and Economic Growth and the Director of the Department of Technology, Management & Budget are ex-officio members. As of September 30, 2010, members of the Committee were as follows: David G. Sowerby, CFA (public member), Glenn P. Murray (public member), Roger Robinson (public member), Andrew S. Levin (ex-officio member), and Kenneth D. Theis (ex-officio member). The public members serve without pay, but may be paid actual and necessary travel and other expenses.

INVESTMENT POLICY & GOALS

Investment policy states that the fiduciary will operate within standard investment practices of the prudent person and in accordance with Public Employee Retirement System Investment Act 314 of 1965. The fiduciary is authorized to invest in government obligations, corporate obligations, various short-term obligations, corporate (domestic and international) stocks, private equity interests, mutual funds, real estate interests, and other investments subject to specific parameters. Above all, trust fund assets are to be invested for the exclusive benefit of the members of the System, in a fiduciary capacity.

The System's Proxy Voting Policy sets forth directives on the following issues: Boards of Directors, corporate governance, social issues, corporate restructurings and defenses. All proxies are reviewed and voted in accordance with the System's policy.

The primary function of the System is to provide retirement, survivor and disability benefits along with health and other postemployment benefits to its members. The State Treasurer is the sole investment fiduciary and custodian of the System's investments pursuant to State law. The goals of the System are:

1. Achieve the optimal rate of return possible within prudent levels of risk.
2. Maintain sufficient liquidity to pay benefits.
3. Diversify assets to preserve capital and avoid large losses.
4. Meet or exceed the actuarial assumption over the long term.
5. Perform in the top half of the public plan universe over the long term.
6. Exceed individual asset class benchmarks over the long term.
7. Operate in a cost-effective manner.

The strategy for achieving these goals is carried out by investing the assets of the System according to a two-year asset allocation model. The System currently invests in seven different asset classes, which provides for a well-diversified portfolio.

INVESTMENT AUTHORITY

Pursuant to State Law (Section 91 of Act No. 380 of the Public Acts of 1965, as amended), the State Treasurer, State of Michigan, is the investment fiduciary for the following four State sponsored retirement systems: Michigan Public School Employees' Retirement System, Michigan State Employees' Retirement System, Michigan State Police Retirement System, and Michigan Judges' Retirement System.

Act No. 314 of the Public Acts of 1965, as amended, authorizes the investment of assets of public employee retirement systems or plans created and established by the State or any political subdivision.

INVESTMENT RESULTS

Total Portfolio Results

For the fiscal year ended September 30, 2010, the total System's rate of return was 8.5% as compiled by State Street Investment Analytics. Annualized rates of return for the three, five, seven, and ten year periods ending September 30, 2010 were: (3.8)%, 3.4%, 5.9%, and 3.1% respectively.

At the beginning of the 2010 fiscal year, it appeared as though the multitudes of responses to the global financial crisis of 2007-2009 were taking hold, and it had appeared that the worst of the damage was in the past. The System's returns, reflecting this, were steady and positive during the first two quarters of the fiscal year. In April, the S&P 500 hit its closing fiscal year high at 1217.28 and the 10-year U.S. Treasury rate hit its highest yield for the year at just under 4%.

As spring was in full bloom, the path towards recovery became much less certain. The credit quality of European sovereign debt had come into question. It became less certain if countries such as Portugal, Ireland, Italy, Greece, and Spain that have a high level of debt when compared to their economic output would have the ability to honor the repayment of their debts.

INVESTMENT SECTION

Report on Investment Activity (continued)

With the market meltdown of 2007 still fresh on the minds of investors, anxiety began to be re-priced into the markets. Ultimately, the European Central Bank was able to step-in and avert more severe problems. However, confidence was shaken and the recovery appeared to be frail at best. In the media, questions were beginning to appear wondering if the economy would experience a “double dip”.

Adding to matters was the occurrence of two global events and the passage of major legislative reform. On April 14th, the Icelandic volcano Eyjafjallajökull erupted sending an ash plume high into the atmosphere. This enormous plume made the airspace unsafe for aviation travel for an extended period, and so a very high proportion of flights within, to, and from Europe were cancelled. On April 20th, a drilling rig named Deepwater Horizon, licensed by British Petroleum, exploded in the Gulf of Mexico. Subsequent to the explosion, oil spewed from the damaged well over the next 3 months. Finally, in the United States, sweeping legislative reforms targeting the financial and health care sectors were passed into law. The long-term impact on the operations of these companies due to the new laws is not yet certain. The end result was that the fiscal third quarter returns suffered during this time of uncertainty, giving up a large portion of the previous two quarter’s gains.

The spring gloom continued into the summer months. In July, during his semi-annual testimony before congress, Federal Reserve Chairman Ben Bernanke described the economic outlook as “unusually uncertain”. In September 2010, the National Bureau of Economic Research (NBER) officially declared the severe recession that started in December of 2007 actually ended in June 2009. As measured by duration or by contraction in real GDP, this recession was the worst on record since the Great Depression; however, not nearly as bad as the Great Depression. Of concern is the stunted and slow rate of recovery. At the end of September, 2010 the unemployment rate remained at a stubbornly high rate of 9.6% and from the calendar second quarter to third quarter, GDP was measured as growing at a mere 1.7% annual rate.

During the final fiscal quarter, many market pundits came to believe that the likelihood for an announcement by the Fed of a second round of quantitative easing (QE2) became highly probable. In anticipation of QE2, equity markets responded favorably. By September’s end, the 10-year Treasury rate closed near a 1-year low of just over 2.5%. September is notoriously bad for domestic equities historically; however, not this year as the S&P 500 Index return of 8.92% was the best return for the month since 1939. In other areas, commodities performed well during the last fiscal quarter and commercial real estate also rebounding off its bottom returning positive returns in both the 3rd and 4th quarter.

The positive returns experienced across the capital markets during the last-leg of the fiscal year were well welcomed. Although the timing of the returns coincides with the increased likelihood for QE2, such policies are not without costs. Because of the actions taken by the Federal Reserve, the returns associated with safer assets are very much below normal. Cash equivalents, as an example, now currently yield approximately 0.25% per annum. Treasuries maturing in 5 years yield just 1.27%, and as mentioned above, 10-year Treasuries earn a paltry 2.5%.

Domestic Equity Pools

The objective for investments made in domestic equities is to meet or exceed the total return of the S&P 1500 Super Composite for one, three, and five-year periods and a market cycle.

For active management strategies, the objective is to earn returns that exceed the most relevant S&P Index (or the most relevant Russell Index), adjusting for market capitalization and style, for one, three, and five-year periods and a market cycle. Rank above median in a universe of managers possessing a similar market cap and style characteristics.

INVESTMENT SECTION

Report on Investment Activity (continued)

For index, or passive return strategies, the objective is to return within 20 basis points of the S&P 500 Index, 50 basis points for the S&P 400 mid-cap, and 60 basis points for the S&P 600 small-cap over one, three, and five-year periods and a market cycle.

The pools are invested primarily in equities or equity-related securities of U.S. companies through internal and externally managed strategies. The goal is to build a portfolio of strategies that will provide excess returns relative to the S&P 1500 while providing minimal tracking error to the index. At times a portion of these pools may be invested in exchange traded funds (ETFs) and fixed-income short-term securities with maturities of less than one year.

The pools invest in equities and equity related securities that are listed on U.S. national securities exchanges, including American Depository Receipts (ADRs). They may also invest in stocks that are traded over-the-counter. The pools diversify their investments by allocating their equity strategies with consideration of the capitalization weightings of the S&P 1500 Index.

The following summarizes the weightings of the pools as of September 30, 2010:

Active	65.2 %
Passive	34.8
Total	<u>100.0</u> %
Large Cap	83.8 %
Mid Cap	10.3
Small Cap	5.9
Total	<u>100.0</u> %

The System's Domestic Equity pools total rate of return was 10.7% for fiscal year 2010. This compared with 10.9% for the S&P 1500 Index.

At the close of fiscal year 2010, the Domestic Equity pools represented 34.6% of total investments. This compares to 36.2% for fiscal year 2009. The following summarizes the System's 2.2% ownership share of the Domestic Equity pools at September 30, 2010:

Domestic Equity Pools (in thousands)

Short Term Pooled Investments	\$ 5,666
Equities	353,830
Settlement Principal Payable	(694)
Settlement Proceeds Receivable	878
Accrued Dividends	292
Total	<u>\$ 359,972</u>

International Equity Pools

The objective for investments made in international equity pools is to meet or exceed the total return of the S&P/Citigroup BMI -World ex-US with 25% of the currency hedged for one, three, and five-year periods and a market cycle.

For active management strategies, the objective is to earn returns that exceed the most relevant S&P Index (or the most relevant Russell Index), adjusting for market capitalization, style and geography for one, three, and five-year periods and a market cycle. Rank above median in a universe of managers possessing a similar market capitalization, style and geography characteristics.

For index, or passive return strategies, the objective is to Return within 250 basis points of the S&P/Citigroup BMI-EPAC Index with 25% of the currency hedged for one, three, and five-year periods and a market cycle. Return within 400 basis points of the MSCI Emerging Markets Index, for one, three, and five-year periods and a market cycle.

Active exposure is invested primarily in equities or equity-related securities of non-U.S. companies through externally managed strategies.

Passive exposure to international equity returns is achieved primarily by investing in a combination of fixed income LIBOR notes, short-term fixed income investments, and equity swap agreements on foreign stock indices in developed markets. Interest on the dedicated notes and short-term fixed income investments is exchanged for international stock returns, and the total notional amount of the swap agreements is invested in the approximate proportions of the S&P Broad Market Index (BMI) Europe and Pacific Composite (EPAC) country weightings in related indices. Use of swap agreements for a core position began in 1993, an American Depository Receipts (ADR) and index-related security portfolio was added in June of 1999 to increase portfolio management flexibility, and a multiple country fund portfolio with smaller capitalization stocks was added in September of 2002 to improve exposure to the smallest companies in the BMI index. Use of futures as an investment to hedge cash flows and balances began in December of 2008, and this use is expected to continue in the future. The combined Swap agreements, notes and short-term investments together continue to perform like a stock index fund that realizes all gains and losses on a rolling three year basis.

The pools diversify their investments by allocating their equity strategies with consideration of the economic development status weightings of the S&P/Citigroup BMI -World ex-US Index.

The following summarizes the weightings of the pools as of September 30, 2010:

Active	23.7 %
Passive	76.3
Total	<u>100.0</u> %
Developed	89.5 %
Emerging	10.5
Total	<u>100.0</u> %

The System's International Equity pools total rate of return was 6.5% for fiscal year 2010. This compared with 4.7% for the S&P/Citigroup BMI -World ex-US Index.

INVESTMENT SECTION

Report on Investment Activity (continued)

At the close of fiscal year 2010, the International Equity pools represented 13.3% of total investments. This compares to 12.6% for fiscal year 2009. The following summarizes the System's 2.1% ownership share of the International Equity Pools at September 30, 2010:

International Equity Pools (in thousands)

Short Term Pooled Investments	\$	7,957
Equities		69,567
Fixed Income Securities		60,693
Market Value of Equity Contracts		(220)
Accrued Dividends and Interest		119
Total	\$	<u>138,116</u>

Alternative Investment Pools

The Alternative Investment pools objective is to meet or exceed the benchmark for all private equity investments over long time periods. The benchmark is a blend of the S&P 500 Index plus 300 basis points and the 10 Year Yield plus 300 basis points using ending weights of equity and fixed income holdings within the portfolio.

Alternative Investments are investments in the private equity market, primarily through limited partnerships. The following summarizes the weightings of the pools as of September 30, 2010:

Buyout Funds	53.7 %
Special Situation Funds	21.3
Venture Capital Funds	9.8
Fund of Funds	5.5
Liquidation Portfolio	4.6
Other	2.8
Mezzanine Funds	2.3
Total	<u>100.0 %</u>

The Alternative Investment pools had a return of 19.8% for the fiscal year ended September 30, 2010, versus the benchmark of 13.1%.

At the close of fiscal year 2010, the Alternative Investment pools represented 21.3% of total investments. This compares to 19.0% for fiscal year 2009. The following summarizes the System's 2.2% ownership share of the Alternative Investment pools at September 30, 2010:

Alternative Investment Pools (in thousands)

Short Term Pooled Investments	\$	3,030
Equities		218,751
Total	\$	<u>221,781</u>

INVESTMENT SECTION

Report on Investment Activity (continued)

Real Estate Pool

The Real Estate pool seeks favorable returns primarily through rental income and appreciation of real estate investments. Real estate investments are typically held through various legal investment entities, such as limited partnerships or limited liability companies, established for the specific purpose of owning, leasing, managing, financing, or developing real estate and real estate related investments. Independent third parties regularly value the real estate investments to establish market values.

The Real Estate pool diversifies its holdings by:

- Geography - The pool is diversified geographically with emphasis placed upon domestic (U.S.) real estate investments. Foreign real estate investments are limited to 20% of the value of the pool.
- Property Size and Value - The pool diversifies its holdings by size so that it is not concentrated in a limited number of large real estate investments.
- Property Type - The pool is diversified by type of property as summarized in the table below.

Multi-family apartments	23.8 %
Commercial office buildings	19.7
Hotel	19.2
Retail shopping centers	16.6
Industrial warehouse buildings	8.7
For Sale Housing	6.9
Land	2.6
Senior Living	1.6
Short Term Investments	0.9
Total	<u><u>100.0 %</u></u>

The Real Estate pool generated a return of (16.4)% for fiscal year 2010. The two benchmark returns from the National Council of Real Estate Investment Fiduciaries: the National Property Index (less 130 basis points) was 4.5% and the Open-End Diversified Core Equity Index was 6.0%. Real estate fundamentals and values appear to have stabilized with improvement in nearly all property types. The slow economic recovery limited any real estate value appreciation to the fourth quarter of the fiscal year. Transaction activity remained at low levels as commercial real estate investors remained cautious and only investing in quality, cash flowing assets in prime markets.

At the close of fiscal year 2010, the Real Estate pool represented 9.2% of total investments. This compares to 9.3% for fiscal year 2009. The following summarizes the System's 2.3% ownership share of the Real Estate pool at September 30, 2010:

Real Estate Pool (in thousands)

Short Term Pooled Investments	\$	865
Equities		94,663
Total	\$	<u><u>95,528</u></u>

INVESTMENT SECTION

Report on Investment Activity (continued)

Fixed Income Pools

The objective for investments made in the fixed income pools is to meet or exceed the total blended return of 50% of the Barclays U.S. Government Index and 50% of the Barclays U.S. Credit Index over one, three, and five-year periods and market cycles. Rank above median in a nationally recognized universe of managers possessing a similar style.

For fixed income sub-strategies, the objective return is to meet or exceed the most relevant Barclays benchmark index.

The pools are invested primarily in fixed income securities of U.S. companies through internal and externally managed strategies. The goal is to build a portfolio of strategies that will provide excess returns relative to the blended benchmark while providing minimal tracking error to the index. At times a portion of the pools may be invested in exchange traded funds (ETFs) and fixed-income short-term securities with maturities of less than one year.

The pools invest in fixed income and related securities in a diversified portfolio of investment grade corporate issues, treasuries, agencies, government sponsored enterprises and government guaranteed mortgages. The pools diversify its investments by allocating its strategies with consideration of credit risk.

The System's Fixed Income pools total rate of return was 10.2% for fiscal year 2010. This compared with 8.7% for the blended return of 50% of the Barclays U.S. Government Index and 50% of the Barclays U.S. Credit Index.

At the close of fiscal year 2010, the Fixed Income pools represented 15.6% of total investments. This compares to 18.1% for fiscal year 2009. The following summarizes the System's 2.2% ownership share of the Fixed Income pools at September 30, 2010:

Fixed Income Pools (in thousands)

Short Term Pooled Investments	\$	3,969
Fixed Income Securities		157,499
Settlement Proceeds Receivable		3
Accrued interest		1,249
Total	\$	<u>162,720</u>

Absolute Return Pools

The Absolute Return Pools consist of the Absolute Return Strategies Pool and the Real Return and Opportunistic Investment Pool.

The primary investment objective of the Absolute Return Strategies Pool is to generate a rate of return that meets or exceeds T-bills by 400 basis points net of fees over the one, three, and five-year periods and a market cycle. Also, exceed the appropriate HFN Fund of Funds median net of fees over one, three, and five-year periods and a market cycle.

The Absolute Return Strategies pool rate of return for the fiscal year was 9.1% versus the benchmark's (0.6)%.

The primary investment objective of the Real Return and Opportunistic Pool is to generate a rate of return that meets or exceeds the increase in the CPI by at least five percent (5%) annually net of fees over one, three, and five-year periods and a market cycle. If a peer universe is available, rank above median in a nationally recognized universe of managers possessing a similar style.

INVESTMENT SECTION

Report on Investment Activity (continued)

For sub-strategies targeting a commodities index, the objective is to generate a rate of return that meets or exceeds the Dow Jones-AIG Total Return Commodities Index over one, three, and five year periods and a market cycle. Rank above median in a nationally recognized universe of managers possessing a similar style.

The Real Return and Opportunistic Investments pool rate of return inception to fiscal year end was 5.1%.

At the close of fiscal year 2010, the Absolute Return Pools represented 3.9% of total investments. This compares to 1.6% for fiscal year 2009. The following summarizes the System's 2.2% ownership share of the Absolute Return Pools at September 30, 2010:

Absolute Return Pools	
(in thousands)	
Absolute Return Strategies Pool	\$ 26,869
Real Return and Opportunistic Investment Pool	
Short Term Pooled investments	\$ 462
Equities	11,901
Fixed Income Securities	1,154
Settlement Proceeds Receivable	93
Accrued Dividends and Interest	33
Total	\$ 40,512

Short Term Investment Pools

The objective of the Short Term Investment pools is to closely match the return performance of its benchmark, the 30 day Treasury bill. The Short Term Investment pools return for the fiscal year was 1.0% versus the benchmark's 0.1%.

Potential areas of investment are:

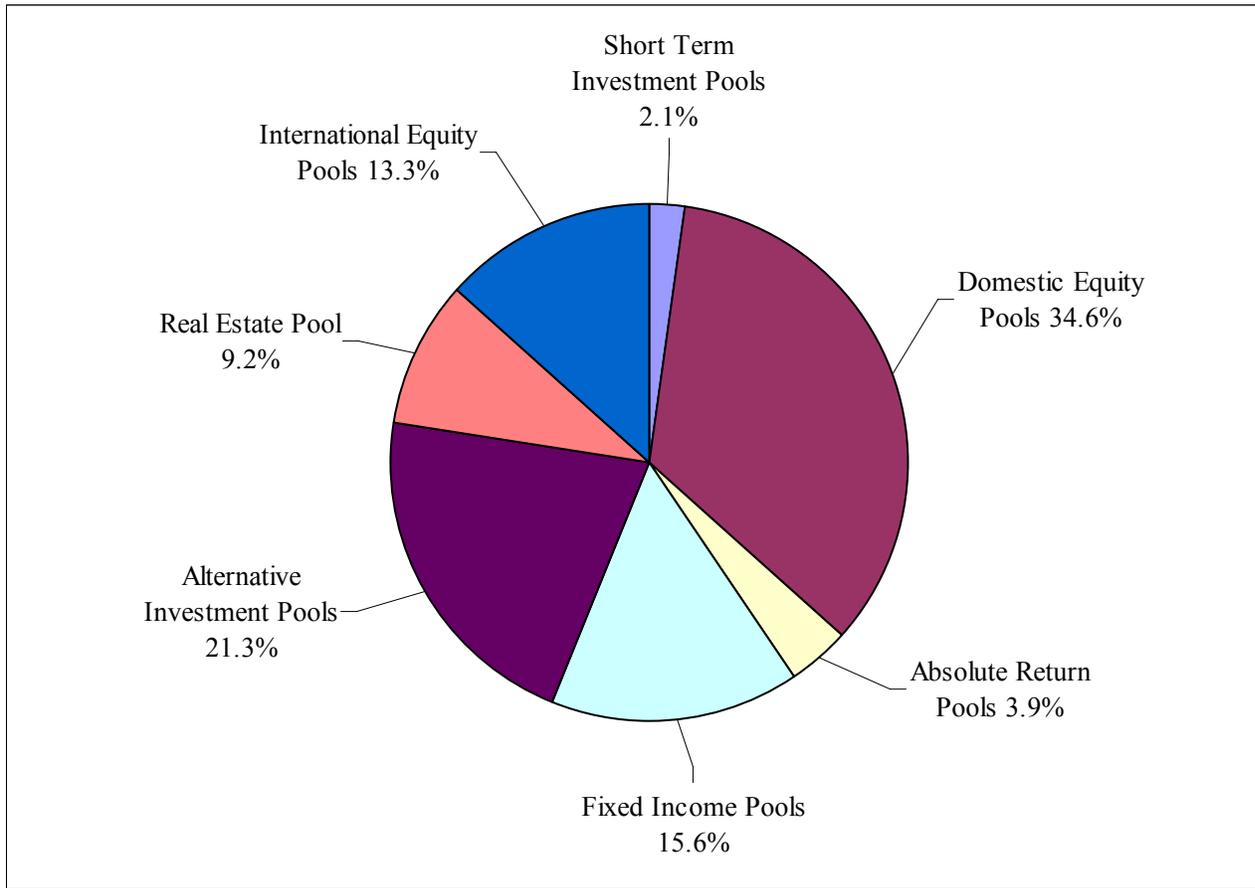

- Obligations of the United States or its agencies.
- Banker's acceptances, commercial accounts, certificates of deposit or depository receipts.
- Repurchase agreements for the purchase of securities issued by the US government or its agencies.
- Commercial paper rated at the time of purchase within the two highest classifications established by not less than two national rating services as determined by the State Treasurer.
- Short duration investment grade corporate issues.

At the close of fiscal year 2010, the Short Term Investment pools represented 2.1% of total investments. This compares to 3.2% for fiscal year 2009. The following summarizes the System's 2.6% ownership share of the Short Term Investment pools at September 30, 2010:

Short Term Investment Pools	
(in thousands)	
Short Term Pooled Investments	\$ 16,928
Fixed Income Securities	5,482

The System's assets are commingled in various pooled accounts. Amounts, par value and number of shares represents the System's pro-rata share based on its ownership of the investment pools.

INVESTMENT SECTION

Schedule of Investment Fees

The State Treasurer is the investment fiduciary and custodian of the System's funds pursuant to State law. Outside advisors are utilized to augment the State Treasurer's internal staff. Only 49.8% of the total investment portfolio is managed by fully discretionary outside advisors. The Michigan Department of Treasury's cost of operations applicable to the retirement system for the fiscal year amounted to \$275 thousand or five and three tenths basis points (0.053%) of the market value of the Assets under Management by the State Treasurer.

Act 380 of the Public Acts of 1965 created an Investment Advisory Committee (Committee) comprised of the directors of the Department of Energy, Labor and Economic Growth and the Department of Technology, Management & Budget, or their duly authorized representatives, and three public members appointed by the Governor with the advice and consent of the Senate. The public members serve without pay, but may be paid actual and necessary travel and other expenses. The Committee meets quarterly to review investments, goals and objectives and may submit recommendations to the State Treasurer. The Committee may also, by a majority vote, direct the State Treasurer to dispose of any holding, which in the Committee's judgment is not suitable for the fund involved, and may by unanimous vote direct the State Treasurer to make specific investments.

Schedule of Investment Fees

Investment Managers' Fees:

	Assets under Management (in thousands)	Fees (in thousands)	Basis Points *
State Treasurer	\$ 522,361	\$ 275	5.3
Outside Advisors for			
Fixed Income	33,728	73	21.5
Absolute Return	32,581	113	34.8
International Equity	50,505	159	31.5
Domestic Equity	94,075	527	56.0
Alternative	221,781	2,129	96.0
Real Estate	86,019	288	33.5
Total	\$ 1,041,051	\$ 3,563	

Other Investment Services Fees:

Assets in Custody	\$ 1,036,964	\$ 68
Securities on Loan	138,290	426

* Outside Advisors Fees are netted against the income for Fixed Income, Domestic Equity, International Equity, and Absolute Return. For Alternative Investment partnership agreements that define the management fees, the asset management fees range from 75 basis points on remaining assets under management to 250 basis points of the committed capital. For Real Estate, the asset management fees range from 50 to 200 basis points. Alternative and Real Estate fees, in most cases, are netted against income.

Ms. Phyllis Mellon, Acting Director
Department of Technology, Management and Budget
and
The Retirement Board
Michigan State Police Retirement System
P.O. Box 30171
Lansing, Michigan 48909

Ladies and Gentlemen:

The basic financial objective of the Michigan State Police Retirement System (SPRS) is to establish and receive contributions which when combined with present assets and future investment return will be sufficient to meet the financial obligations of the system to present and future benefit recipients.

The financial objective is addressed within the actuarial valuation. The valuation process develops employer contributions that are sufficient to fund the plan's normal cost (i.e., the costs assigned by the valuation method to the year of service about to be rendered), as well as to fund any unfunded accrued liabilities over a reasonable period. The most recent valuation was completed based upon population data, asset data, and plan provisions as of September 30, 2009.

The Retirement System provides the actuary with data for the actuarial valuation. The actuary relies on the data after reviewing it for internal and year to year consistency. The actuary summarizes and tabulates population data in order to analyze long term trends. The plan's external auditor also audits the actuarial data annually.

Annual actuarial valuations are based upon assumptions regarding future activity in specific risk areas including the rate of investment return and payroll growth, eligibility for the various classes of benefits and longevity among retired lives. These assumptions are adopted by the Board and the Department after considering the advice of the actuary and other professionals. The assumptions and the methods comply with the disclosure requirements of GASB Statement Nos. 25 and 43. Each actuarial valuation takes into account all prior differences between actual and assumed experience in each risk area and adjusts the contribution rates as needed.

Our firm provided the following supporting schedules for use in the Comprehensive Annual Financial Report:

Financial Section

- Note 1 - Table of System's Membership
- Note 3 - Summary of Actuarial Assumptions
- Schedules of Funding Progress
- Schedules of Employer Contributions (Annual Required Contribution)

Actuarial Section

- Summary of Actuarial Assumptions and Methods
- Percent of Eligible Active Members Retiring Within Next Year
- Separation from Active Employment Before Age and Service Retirement and Individual Pay Increase Assumptions
- Schedule of Active Member Valuation Data
- Schedule of Changes in the Retirement Rolls
- Prioritized Solvency Tests
- Analysis of System Experience

Statistical Section

- Schedule of Retired Members by Type of Pension Benefit (Retirement Type and Option)
- Schedule of Retired Members by Type of Health Benefit
- Schedules of Average Benefit Payments – Pension, Medical, Dental, and Vision

Although our firm provided supporting schedules in connection with GASB Statement Nos. 43 and 45, we recommend consultation with legal counsel and the auditors to determine whether Statement No. 43 applies.

The actuarial valuations of SPRS as of September 30, 2009 were performed by qualified actuaries in accordance with standards of practice prescribed by the Actuarial Standards Board and in compliance with applicable state statutes. The undersigned are Members of the American Academy of Actuaries (MAAA) and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein. It is our opinion that the calculated employer contribution meets the financial objective of the Retirement System.

Respectfully submitted,

James Koss, ASA, MAAA

Alan Somanstine, ASA, MAAA

Gabriel Roeder Smith & Company

ACTUARIAL SECTION

Summary of Actuarial Assumptions and Methods

1. The investment return rate used in the valuations was 8% per year net of expenses, compounded annually. This rate of return is not the assumed real rate of return. Considering other financial assumptions, this 8% investment return rate translates to an assumed real rate of return of 4.5%. Adopted 2004.
2. The healthy life mortality table used in evaluating allowances to be paid was the 1994 Group Annuity Mortality Table. Adopted 2004.
3. Sample probabilities of retirement with an age and service allowance are shown in Schedule 1 on the next page. Adopted 2004.
4. Sample probabilities of withdrawal from service and disability, together with individual pay increase assumptions, are shown in Schedule 2 on the next page. Adopted 2004.
5. Total active member payroll is assumed to increase 3.5% per year. This represents the portion of the individual pay increase assumptions attributable to inflation. In effect, this assumes no change in the number of active members. Adopted 1998.
6. An individual entry age actuarial cost method of valuation was used in determining age and service and deferred retirement actuarial liabilities and normal cost. Unfunded actuarial accrued liabilities, including actuarial gains and losses, are financed over a declining 40-year period for years beginning October 1, 1986. Adopted or re-adopted 1996.
7. The Department of Technology, Management & Budget approved the use of market value of assets as of September 30, 2006, for actuarial valuation purposes. For investment gains or losses that occur after that date, a 5-year smoothing technique will be used. Specifically, the excess (shortfall) of actual investment income (including interest, dividends, realized and unrealized gains or losses) over the imputed income at the valuation interest rate is considered the gain (loss), which is spread over five years. Adopted 2007.
8. The data about persons now covered and about present assets was furnished by the System's administrative staff. Although examined for general reasonableness, the data was not audited by the actuary.
9. The actuarial valuation computations were made by or under the supervision of a Member of the American Academy of Actuaries (MAAA). The assumptions used in the actuarial valuations were adopted by the System's Board and the Department of Technology, Management & Budget after consulting with the actuary.
10. A 5-year experience investigation, covering the period from September 30, 1997, through September 30, 2002, was completed in April 2004. The purpose of the study was to analyze the actual experience of the System versus that anticipated by the actuarial assumptions then in use. The combined effect of the recommended changes in assumptions was an increase in actuarial accrued liabilities of approximately 0.1% and an 8.3% decrease in computed employer contributions. Adopted 2004.
11. Gabriel Roeder Smith & Co. was awarded the actuarial and consulting services contract beginning October 4, 2006.

Prioritized Solvency Test

The System's funding objective is to meet long-term benefit promises through contributions that remain approximately level from year to year as a percent of member payroll. If the contributions to the System are level in concept and soundly executed, the System will pay all promised benefits when due, the ultimate test of financial soundness. Testing for level contribution rates is the long-term solvency test.

A prioritized solvency test is another means of checking a System's progress under its funding program. In a short condition test, the System's present assets (cash and investments) are compared with: (1) active member contributions on deposit; (2) the liabilities for future benefits to present retired lives; and (3) the liabilities for service already rendered by active and inactive members. In a system that has been following the discipline of level percent of payroll financing, the liabilities for active member contributions on deposit (liability 1) and the liabilities for future benefits to present retired lives (liability 2) will be fully covered by present assets (except in rare circumstances). In addition, the liabilities for service already rendered by active members (liability 3) are normally partially covered by the remainder of present assets. Generally, if the System has been using level-cost financing, the funded portion of liability 3 will increase over time. Liability 3 being fully funded is not necessarily a by-product of level percent of payroll funding methods.

The schedule below illustrates the history of the liabilities of the System and is indicative of the System's policy of following the discipline of level percent of payroll financing.

Analysis of System Experience

Gains/(Losses) in Accrued Liabilities During Year Ended September 30, 2009 Resulting from Differences Between Assumed Experience & Actual Experience

<u>Type of Activity</u>	<u>Gain/(Loss)</u>
1. Retirements (including Disability Retirement). If members retire at older ages or with lower final average pay than assumed, there is a gain. If younger ages or higher average pays, a loss.	\$ 2,174,590
2. Withdrawal From Employment (including death-in-service). If more liabilities are released by withdrawals and deaths than assumed, there is a gain. If smaller releases, a loss.	426,448
3. Pay Increases. If there are smaller pay increases than assumed, there is a gain. If greater increases, a loss.	13,078,491
4. Investment Income. If there is greater investment income than assumed, there is a gain. If less income, a loss.	(74,296,106)
5. Death After Retirement. If retirants live longer than assumed, there is a loss. If not as long, a gain.	(1,683,362)
6. New entrants/Rehires. New entrants into the System will generally result in an actuarial loss.	(831,554)
7. Other. Miscellaneous gains and losses resulting from data adjustments, timing of financial transactions, etc.	<u>521,939</u>
8. Composite Gain (or Loss) During Year	<u>\$ (60,609,554)</u>

ACTUARIAL SECTION

Summary of Plan Provisions

Our actuarial valuation of the System as of September 30, 2009, is based on the present provisions of Michigan State Police Retirement Act (Public Act 182 of 1986, as amended).

Regular Retirement

Eligibility - 25 years of credited service with no age requirement; or age 50 with 10 years credited service.

Annual Amount - If member has 25 or more years of credited service, 60% of final average compensation; if member has less than 25 years of credited service, total credited service times 2% of final average compensation.

Type of Final Average Compensation - Average of 2 final years.

Early Retirement

None.

Deferred Retirement (vested benefit)

Eligibility - 10 years of credited service. Benefit commences at age 50.

Annual Amount - Computed as Regular Retirement benefit based on credited service and final average compensation at termination.

Duty-Disability Retirement

Eligibility - No age or service requirement.

Annual Amount - 60% of final average compensation. Disability benefit plus workers' compensation benefit, if any, shall not exceed 100% of final average compensation.

Non-Duty Disability Retirement

Eligibility - 10 years of credited service.

Annual Amount - 2.4% of final average compensation times years of credited service, to a maximum of 60% of final average compensation.

Duty Death Before Retirement

Eligibility - No age or service requirement.

Annual Amount - 60% of final average compensation is payable to surviving spouse; additional \$1,200 per year for each child under 18 is also payable. If no surviving spouse, children under 18 share in 60% benefit until attainment of age 18. If no spouse or children, dependent parents are eligible for 60% benefit (plus \$1,200 per dependent sibling under 18). Retirement benefit plus workers' compensation, if any, shall not exceed 100% of final average compensation.

Lump Sum Payment - A \$1,500 funeral benefit is also payable.

Summary of Plan Provisions (continued)

Non-Duty Death Before Retirement

Eligibility - 10 years of credited service.

Annual Amount - 2.4% of final average compensation times years of credited service, to a maximum of 60% of final average compensation, payable to surviving spouse. If no surviving spouse, children under 18 share in benefit until attainment of age 18.

Death After Retirement

The retired member's benefit continues to the surviving spouse. If no surviving spouse, children under 18 share in the continued benefit until attainment of age 18.

DROP Program Provisions

DROP Eligibility - Any age with 25 years of service.

Maximum Years of DROP - 6 years.

Retirement Benefit - Monthly benefit frozen at date of DROP election.

DROP Account - Amount credited - 100% of the participant's Retirement Benefit if stay full six years (for all 6 years); 90% if stay 5 years; 80% if stay 4 years; 70% if stay 3 years; 60% if stay 2 years; 50% if stay 1 year; 30% if stay less than 1 year.

Interest Credit Rate - 3%

COLA - No COLA adjustment on Retirement Benefit until the end of the DROP period.

Benefit Options - At termination of DROP participation and commencement of retirement, options are lump sum of DROP account, partial lump sum, or maintain funds in account.

Post-Retirement Cost-of-Living Adjustments

All members retiring (or leaving employment with vested benefits), and their survivors, are eligible for automatic 2% annual (non-compounded) benefit increases, with a maximum annual increase of \$500.

Post-Retirement Health Insurance Coverage

Persons in receipt of retirement allowances (including members who did not retire directly from the System, but come from a vested deferred status), and their dependents, are eligible for 95% State-paid health insurance coverage and 90% State-paid dental and vision insurance.

Member Contributions

None.
