Technology Resources for Safe Driving

According to the U.S. Center for Disease Control and Prevention, motor vehicle crashes are a leading cause of death for teens in the United States. Based on miles driven, teen drivers are three times as likely to be in fatal crashes as drivers age 20 and older. This list of technology resources was developed by the Michigan Drivers Age 20 and Younger Action Team for parents to help them monitor their teen's driving with the goal of decreasing teen traffic fatalities and serious injuries.

This list is for information purposes only. It is not intended to be all inclusive of available technology resources. Participating members of the Michigan Drivers Age 20 and Younger Action Team have not evaluated and do not endorse the resources on this list. To add a resource or request revisions, contact Bobby Gwizdz at GwizdzR@Michigan.gov. For the most recent list visit Michigan.gov/NewDrivers.

Resource Name	What It Does	Charge	Devices Needed to Use	Logo/Picture
Drivesafe.ly Pro	Texts and emails are read aloud; App automatically responds without touching a button.	\$9.99	Android or Blackberry	
<u>iPhone Driving</u> <u>Focus</u>	Automatically silences incoming alerts and notifications when you are driving, as well as send automatic notifications to people who are contacting you.	Free	iPhone with iOS 11 or newer.	Driving Focus
<u>Life360</u>	Provides location and driving safety including family driving summaries and individual driving reports.	4.99-19.99/ month depending on plan	Smartphone	Dife360
