

**State Tax Commission February 13, 2014 Tip**  
**Topic: Exemption Applications**

Dear STaCy,

I know there are a lot of exemptions that are approved by the State Tax Commission for businesses including IFT, NEZ, New Personal Property, Air and Water Pollution Control, OPRA, etc. Should the local unit send those applications to the State Tax Commission as they are approved or should we hold them and send them in all at once at the deadline?

Thanks,  
Justin Time

Dear Mr. Time:

The limited staff that processes these applications would very much appreciate you sending exemption applications in as they are completed by the local unit and not wait until the deadline. Staff will review them as they are received and put them on State Tax Commission agenda's for determination throughout the year.

Just for your information, there is a great deal of information regarding the various exemptions on our website ([www.michigan.gov/propertytaxexemptions](http://www.michigan.gov/propertytaxexemptions)) that will help you submit a completed application and make the review process as smooth as possible.

Sincerely,  
STaCy
