## Overview of Michigan's Cohort Graduation and Dropout Rates

To comply with the *No Child Left Behind (NCLB) Act of 2001*, Michigan moved to an accountability system in which a graduation rate includes only "on-time" graduates who earn regular diplomas within four years of entering high school. This calculation meets the guidelines provided by the National Governors Association (NGA) Graduation Counts Compact and the United States Department of Education (USED) for calculation of such rates. As more and more states implement the cohort methodology standard, state-to-state comparisons will become more meaningful.

The formula for the calculation of 2010 graduation rates is possible because school districts have been tracking the enrollment of individual students and reporting those data to the Center for Educational Performance and Information (CEPI) since those students first enrolled in the 9th grade in the 2006-2007 school year. The gathering of this information at a statewide level allows CEPI to help districts track enrollments to reflect "transfers in" and "transfers out" of the district, as well as students who exit from the public education system itself, over the course of four years. For additional detail regarding the complete methodology, refer to the Support Documents section of the following Web page: [http://www.michigan.gov/cepi/0,1607,7-113-21423\\_30451\\_51357---,00.html](http://www.michigan.gov/cepi/0,1607,7-113-21423_30451_51357---,00.html).

2010 marks the third year that five-year graduation and dropout rates were calculated for students in the prior cohort. The five-year graduation rates include the students who were categorized as "off-track" at the end of four years and graduated in the fifth year with a regular high school diploma.

### **2010 Cohort Four-Year Graduation Rate**

The total number of students who were identified as first-time 9th-graders in fall 2006 formed the initial 2010 cohort. Students who transferred into the state, district or building at any time during the four-year period were added to the initial group. For students who moved within the public schools, student records were updated to reflect the correct district and building location. These students were considered "transfers out" of the district/building they left and "transfers in" to the district/building they entered. Students who exited the public school system entirely (out of state, to nonpublic school or to home school) or became deceased at any time during the four-year period are considered "exempt" and removed from the cohort.

To calculate the 2010 cohort four-year graduation and dropout rates after transfers are accounted for, students are placed into one of four categories:

1. On-track graduated - completed high school with a regular diploma in four years or less;
2. Other completer - earned a General Educational Development (GED) certificate or other certificate, or reached the special education maximum age;
3. Off-track continuing - did not complete high school in four years and is still continuing in school;
4. Dropout - left high school permanently at any time during the four-year period, or whereabouts are unknown.

A student is counted toward the graduation rate of the final building and district that the student attended during the four-year period. "On-track graduated" is counted as the numerator and divided by the total count of all categories. The total of all the categories is the 2010 Cohort Total. Students who transferred in are included as students with one of the four categories for that building/district, and students who transferred out have been included in another public entity's rates, if the students have been located.

On-Track Graduated  
2010 Cohort Total

**2010 Cohort Four-Year Dropout Rate**

**There is no national standard for calculating cohort four-year dropout rates.** Michigan has chosen to maintain consistency by using the cohort methodology recommended by NGA and USED to calculate this rate as well. A dropout rate is not equivalent to subtracting the graduation rate from 100 percent, because that method would count students who are classified as "Other completer" or "Off-track continuing" as dropouts, which they are not. The 2010 cohort four-year dropout rate is calculated using this formula:

$$\frac{\text{Dropouts}}{\text{2010 Cohort Total}}$$

**Reading the 2010 Cohort Four-Year Graduation and Dropout Rate Report**

The 2010 cohort four-year graduation and dropout rate report includes data for the state, every district and every building from which students graduate, and is divided into eleven columns:

**Table 1**

Column Name	Column Definitions
District/Building Name (Code)	The first line of the report shows the State of Michigan rates, followed by an alphabetical listing of LEAs, then PSAs and then ISDs. The district-level data are identified in shaded rows. The buildings that comprise the district appear below the district name in non-shaded rows that are slightly indented. Although ISDs do not graduate students, their students are reflected in the state rate.
First Time 9th Grade in Fall 2006	Total number of students who were identified as first-time 9th-graders in fall 2006, which was the group of students who initially formed the 2010 cohort.
(+) Transfers In	Total number of students who transferred into the state, district or building cohort at any time during the four-year period and remained there.
(-) Transfers Out & Exempt	Total number of transfers out and exempt students. Transfers out are students who transferred out of the district or building and were submitted by a new district. Exempt are those who exited the public school system at any time during the four-year period and did not return (exited to out of state, to nonpublic school or to home-school). Deceased students are also exempt.
Cohort	Total number of students in the 2010 cohort for the state, for each district and for each building after adjustments were made for transfers in, transfers out and exempt students.
On-Track Graduated	Total number of students in the 2010 cohort who completed high school with a regular diploma in four years or less.
Dropouts (Reported & MER)	Total number of cohort students who left high school permanently at any time during the four-year period, or whose whereabouts are unknown (MER = missing expected records).
Off-Track Continuing	Total number of cohort students who did not complete high school in four years and are still continuing in school.

Column Name	Column Definitions
Other Completer (GED, etc.)	Total number of cohort students who earned a GED or other certificate, or reached the special education maximum age.
Graduation Rate	The percentage, calculated as On-track graduated divided by the 2010 Cohort Total, of the total number of students in the 2010 cohort who completed high school with a regular diploma in four years or less.
Dropout Rate	The percentage, calculated as Dropouts divided by the 2010 Cohort Total, of the total number of students in the 2010 cohort who left high school permanently at any time during the four-year period, or whose whereabouts are unknown.

For many districts, the building totals do not sum to the district total. Buildings in which students have been ordered by the court to attend receive a building rate, but are not included in the district's rate. This method prevents a district from being held accountable for the performance of students who would normally not be present in the district, while still allowing for accountability for the building that provides the public education. Students must also be present for at least two count dates (one in September and one in February for the purpose of calculating state school aid payments) in order to be counted in a building rate. A student who is present for just one count date is only included in the district rate. Students who are claimed in a district, but were not present for any count days are only included in the state rate.

### **2009 Cohort Five-Year Graduation and Dropout Rates**

2010 marks the third year that five-year graduation and dropout rates were calculated for students in the prior cohort. The graduation rate includes the students who were categorized as "off-track continuing" at the end of four years and graduated in the fifth year with a regular high school diploma. The five-year graduation rate is calculated in the same manner as the four-year rate, with the addition of students who graduated in the fifth year (Off-track graduated) in the numerator. "On-track graduated" and "Off-track graduated" are the numerator and divided by the total of all categories (On-track graduated, Off-track graduated, Off-track continuing, Other completer and Dropout). Transfers-in and out during that fifth year are accounted for as well. The total of the categories is the 2009 Cohort Total:

$$\frac{\text{On-Track Graduated} + \text{Off-Track Graduated}}{\text{2009 Cohort Total}}$$

The cohort five-year dropout rate is calculated in the same manner as the four-year rate, with the addition of students who dropped out of high school in their fifth year. Transfers-in and out during that fifth year are accounted for as well.

$$\frac{\text{Dropouts}}{\text{2009 Cohort Total}}$$

### **Reading the 2009 Cohort Five-Year Graduation and Dropout Rate Report**

The 2009 cohort five-year graduation and dropout rate report includes data for the state, every district and every building from which students graduate, and is divided into eleven columns:

**Table 2**

Column Name	Column Definitions
District/Building Name (Code)	The first line of the report shows the State of Michigan rates, followed by an alphabetical listing of LEAs, then PSAs, and then ISDs. The

Column Name	Column Definitions
	district-level data are identified in shaded rows. The buildings that comprise the district appear below the district name in non-shaded rows that are slightly indented. Although ISDs do not graduate students, their students are reflected in the state rate.
First Time 9th Grade in Fall 2005	Total number of students who were identified as first-time 9th-graders in fall 2005, which was the group of students who initially formed the 2009 cohort.
(+ ) Transfers In	Total number of students who transferred into the state, district or building cohort at any time during the five-year period and remained there.
(-) Transfers Out & Exempt	Total number of transfers out and exempt students. Transfers out are students who transferred out of the district or building and were submitted by a new district. Exempt are those who exited the public school system at any time during the four-year period and did not return (exited to out of state, to nonpublic school or to home-school) Deceased students are also exempt.
Cohort	Total number of students in the 2009 cohort for the state, for each district and for each building after adjustments were made for transfers in, transfers out and exempt students.
On-Track + Off-Track Graduated	Total number of students in the 2009 cohort who completed high school with a regular diploma in four years or less, plus those who completed high school with a regular diploma in the fifth year.
Dropouts (Reported & MER)	Total number of cohort students who left high school permanently at any time during the five-year period, or whose whereabouts are unknown (MER: missing expected records).
Off-Track Continuing	Total number of cohort students who did not complete high school in five years and are still continuing in school.
Other Completer (GED, etc.)	Total number of cohort students who earned a GED or other certificate, or reached the special education maximum age.
Graduation Rate	The percentage, calculated as On-track graduated + Off-track graduated divided by the 2009 Cohort Total, of the total number of students in the 2009 cohort who completed high school with a regular diploma in five years or less.
Dropout Rate	The percentage, calculated as Dropouts divided by the 2009 Cohort Total, of the total number of students in the 2009 cohort who left high school permanently at any time during the five-year period, or whose whereabouts are unknown.

**Data validation and appeals process**

CEPI provided an appeal window for district staff members to review and request changes to graduation and dropout information on individual students in the Michigan Student Data System (MSDS). From July through September 2010, districts' authorized users accessed the MSDS to view their cohort members and could request: 1) cohort status/year changes; 2) changes to district and building accountability (Primary Education Providing Entity) and 3) linking of multiple students' unique identification codes (UICs). CEPI staff members approved or denied these requests. Exit status changes for students reported in the 2009-2010 school year were submitted in the student record maintenance collection by MSDS authorized users. Exit status changes for any student last reported in years prior to 2009-2010 had to be submitted via the ISD auditor as an audit finding. ISD auditors completed an exit status audit between October and the end of December 2010 in which any audit findings were recorded as exit status changes and the cohort status was modified accordingly for those student records.
