

MI COVID RESPONSE DATA AND MODELING UPDATE

NOTE: All data as of Dec. 26 unless otherwise noted

December 29, 2020

Executive summary

Michigan has recorded the **19th highest number of cases (↓4)** , **7th highest number of deaths (↓2)**, **46th highest case rate (↓3)**, and **T13th highest death rate (↓7)** in the last 7 days (source: CDC COVID Data Tracker)

Michigan has the **25th highest hospitalization rate as a percent of total beds (↓1)**, and **9th highest number of COVID patients in the ICU (↔)** (source: Becker's Hospital Review)

Case rates (302.0, ↓103.7) and **percent positivity** (9.0%, ↓1.0%) are decreasing

More than 14.2% of available inpatient beds are filled with COVID patients (↓2.3) and state trends for COVID hospitalizations are decreasing

There were **753 deaths (↓165)** during the week of Dec 13-Dec 19 and the state death rate is **10.8 deaths/million/day (↓2.4)**, but these are lagging indicators of cases and hospitalizations from several weeks ago

Daily diagnostic tests dropped to an average of 42.4K per day (↓6.2K) over the last week and the state rate is **4,264.7 tests/million/day (↓517.1)**

Comparison across states: Summary 12/28

What we see today:

- 8 states seeing increasing 2 week case trends (down vs. 19 last week)
- 48 states (stable) with significant outbreaks (high/increasing cases, increasing/high positivity increasing/high hospitalizations over 2 weeks (>100 per M))
- Nevada, Pennsylvania, Arizona, Alabama, Delaware have highest per capita hospitalized patient numbers
- Most rapid 2 week case growth: CA, TN, GA, HI, ME
- Midwest:
 - Wisconsin showing continued decline in hospitalizations (190/M), declining cases (377/M)
 - Indiana with slow drop in hospitalizations (405/M), and cases (725/M)
 - Illinois showing continued slow decline in hospitalizations (335/M), cases down (448/M)
 - Ohio with slow decline in hospitalizations (385/M) and cases (615/M)
 - Michigan showing continued decline in hospitalizations (255/M) and cases (290/M)

COVID-19 Spread

Positivity has dropped to 9.0%

- Six MERC regions below 10%

Cases continue to decrease for 36 days

- Decreases are seen among most age groups, races, and ethnicities
- Fewer cases have race and ethnicity documented
- Number of active outbreaks is down 10% from previous week
- Number of reported school outbreaks decreased again since last week (142 to 119)

Table Date: 12/26/2020, 7 days from date table was produced: 12/19/2020

Table Date: 12/26/2020, 7 days from date table was produced: 12/19/2020

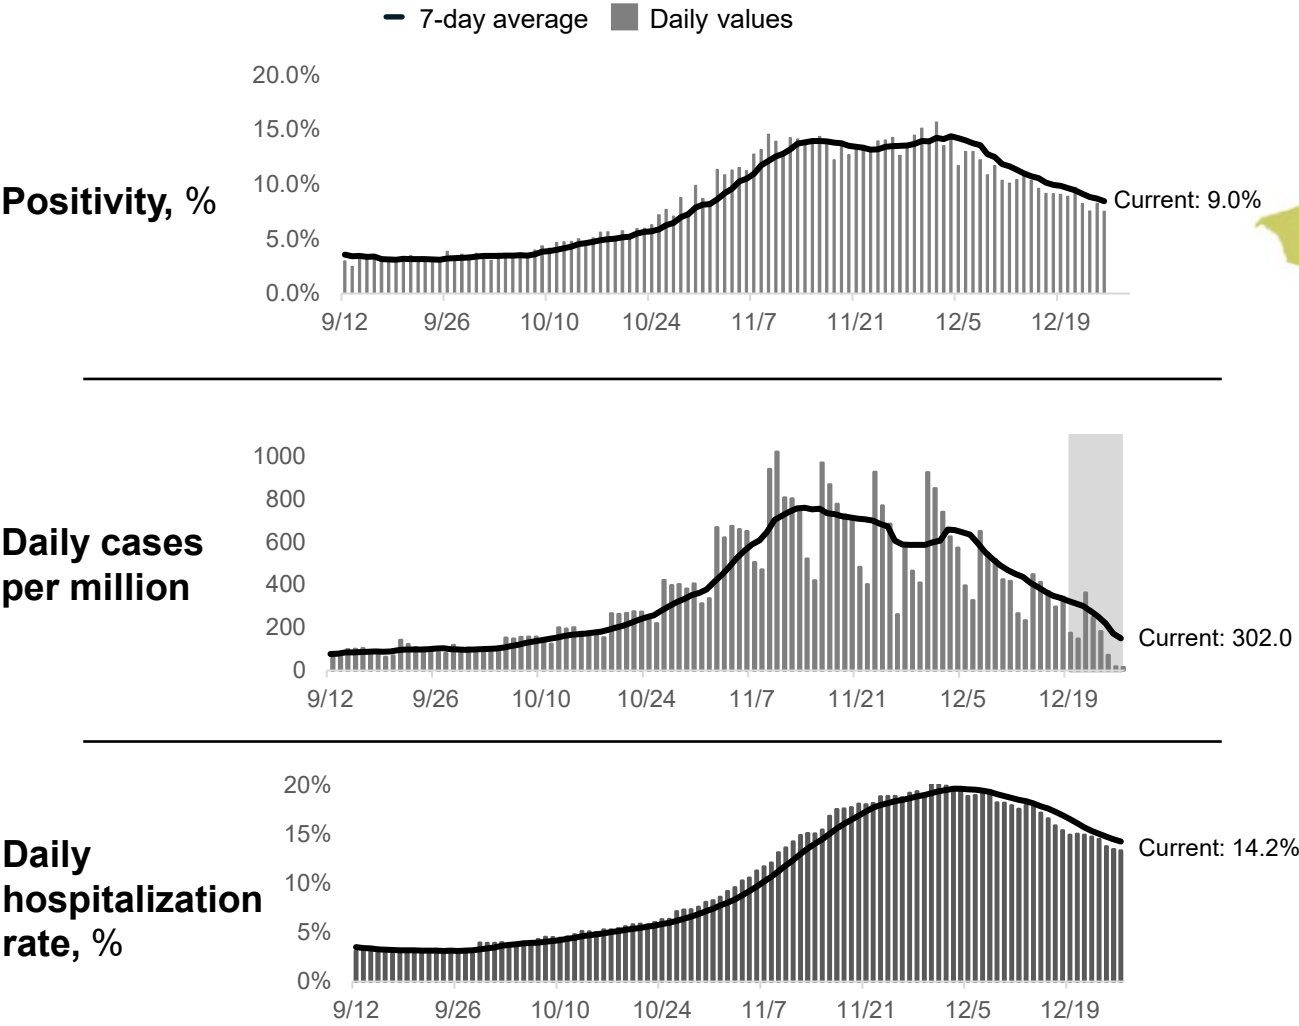

Cases

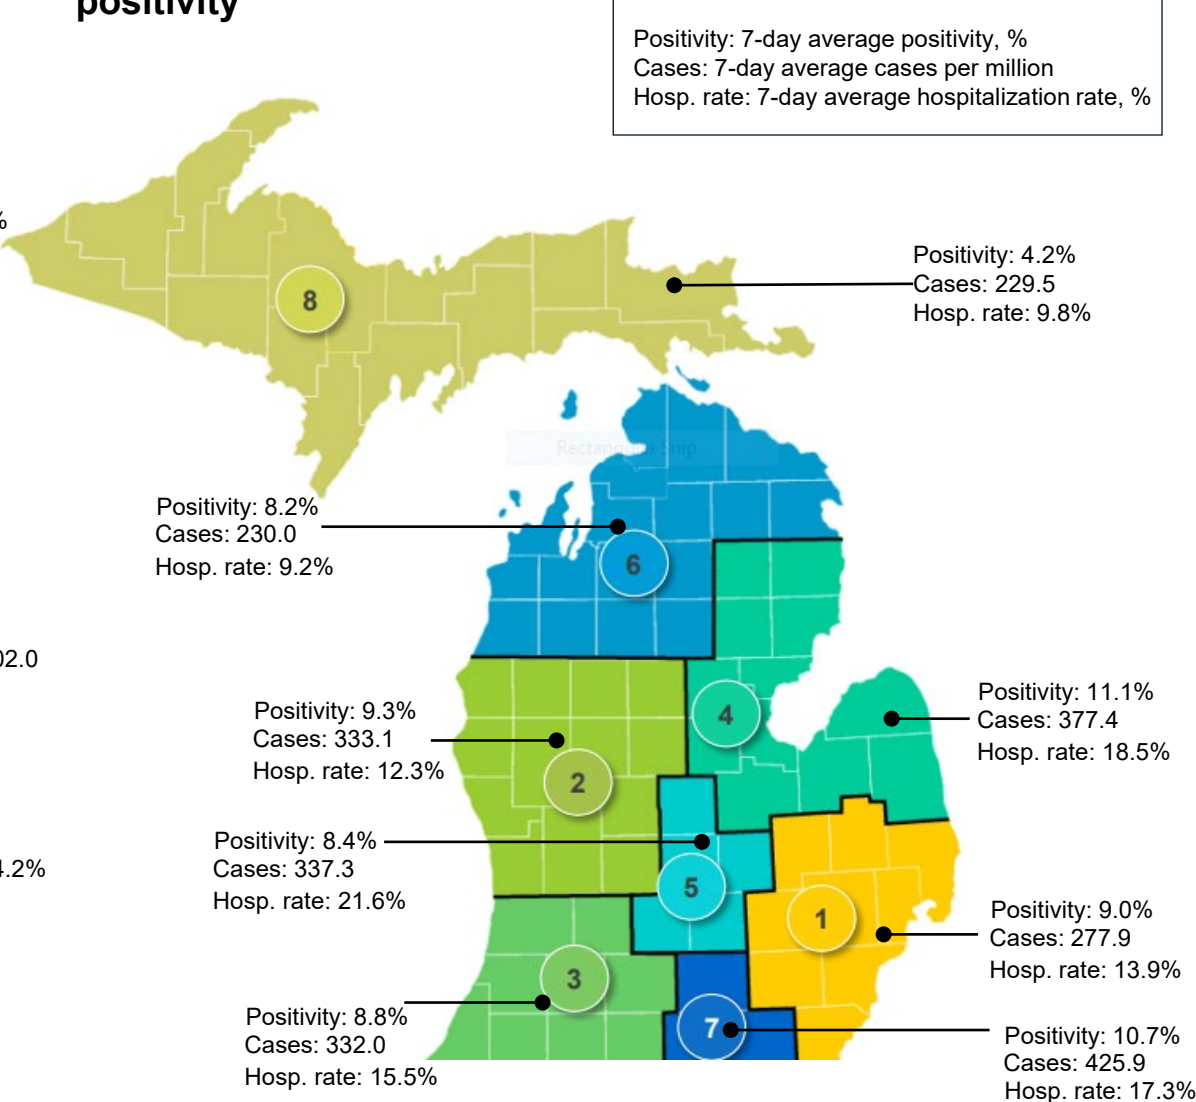

Recent statewide trends

Statewide trends

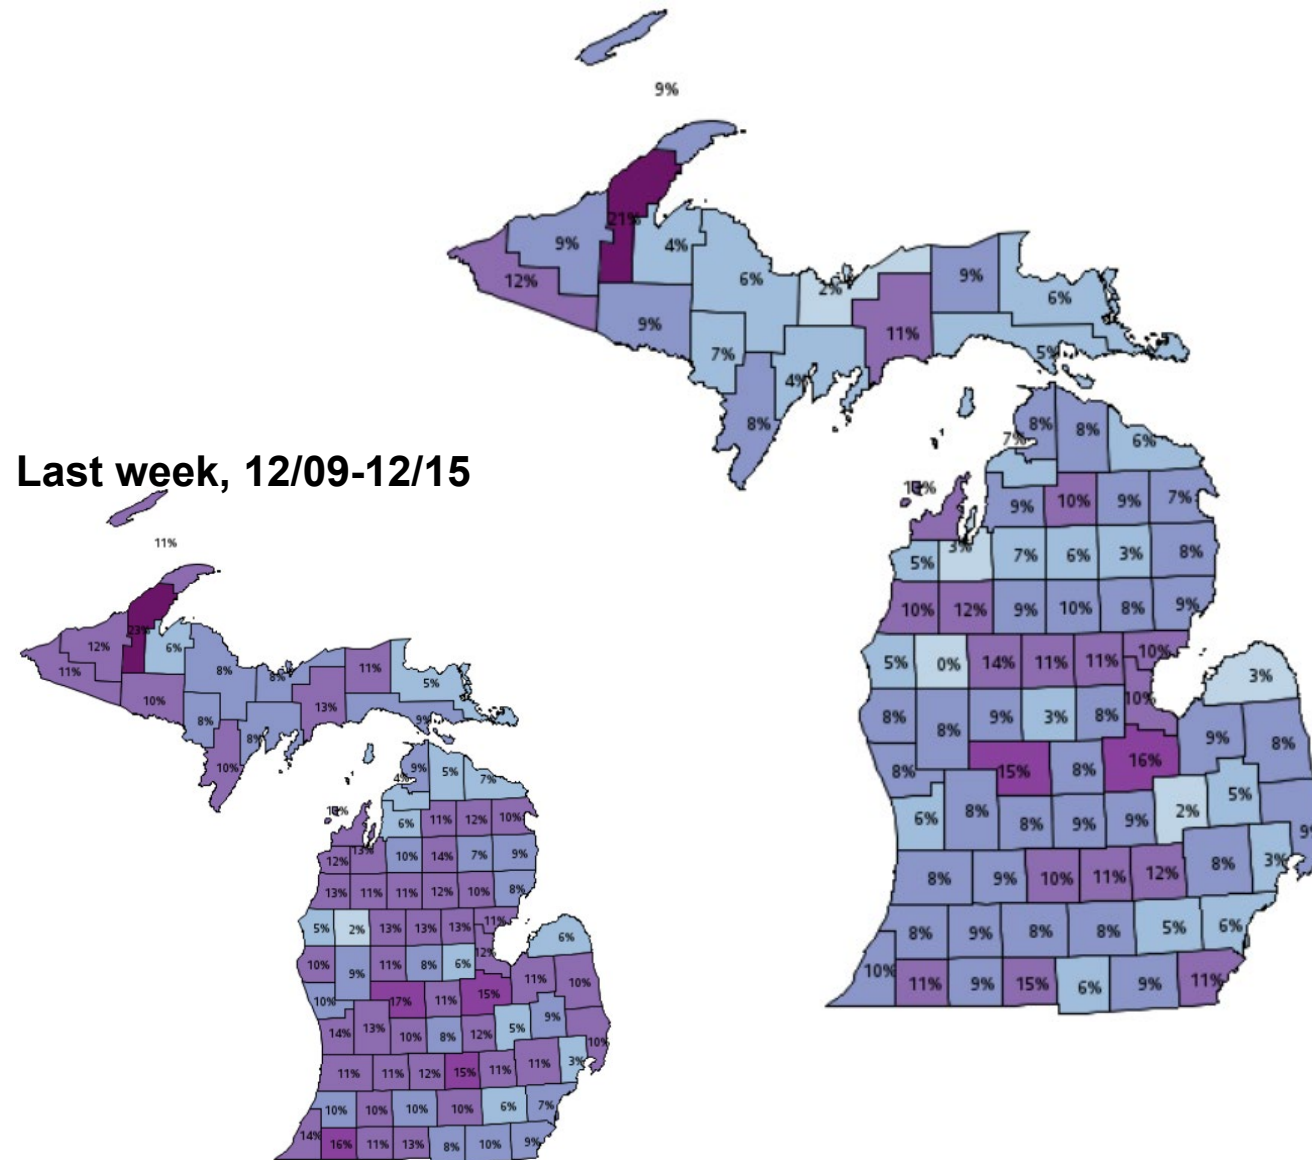

Regional breakdown: Cases, hospitalization rate, and positivity

Source: <https://mistartmap.info/>

Positivity by county, 12/16-12/22

**Average
positivity per day**

of counties

Updates since last week:

20 of 83 counties saw double digit positivity in the last week (16 county reduction)

Confirmed COVID-19 cases by report date: State of Michigan

Confirmed cases reported on prior day (7-day rolling average)

COVID-19 cases by onset date: State of Michigan

Cumulative confirmed and probable cases, by date of onset of symptoms

New confirmed and probable cases, by date of onset of symptoms

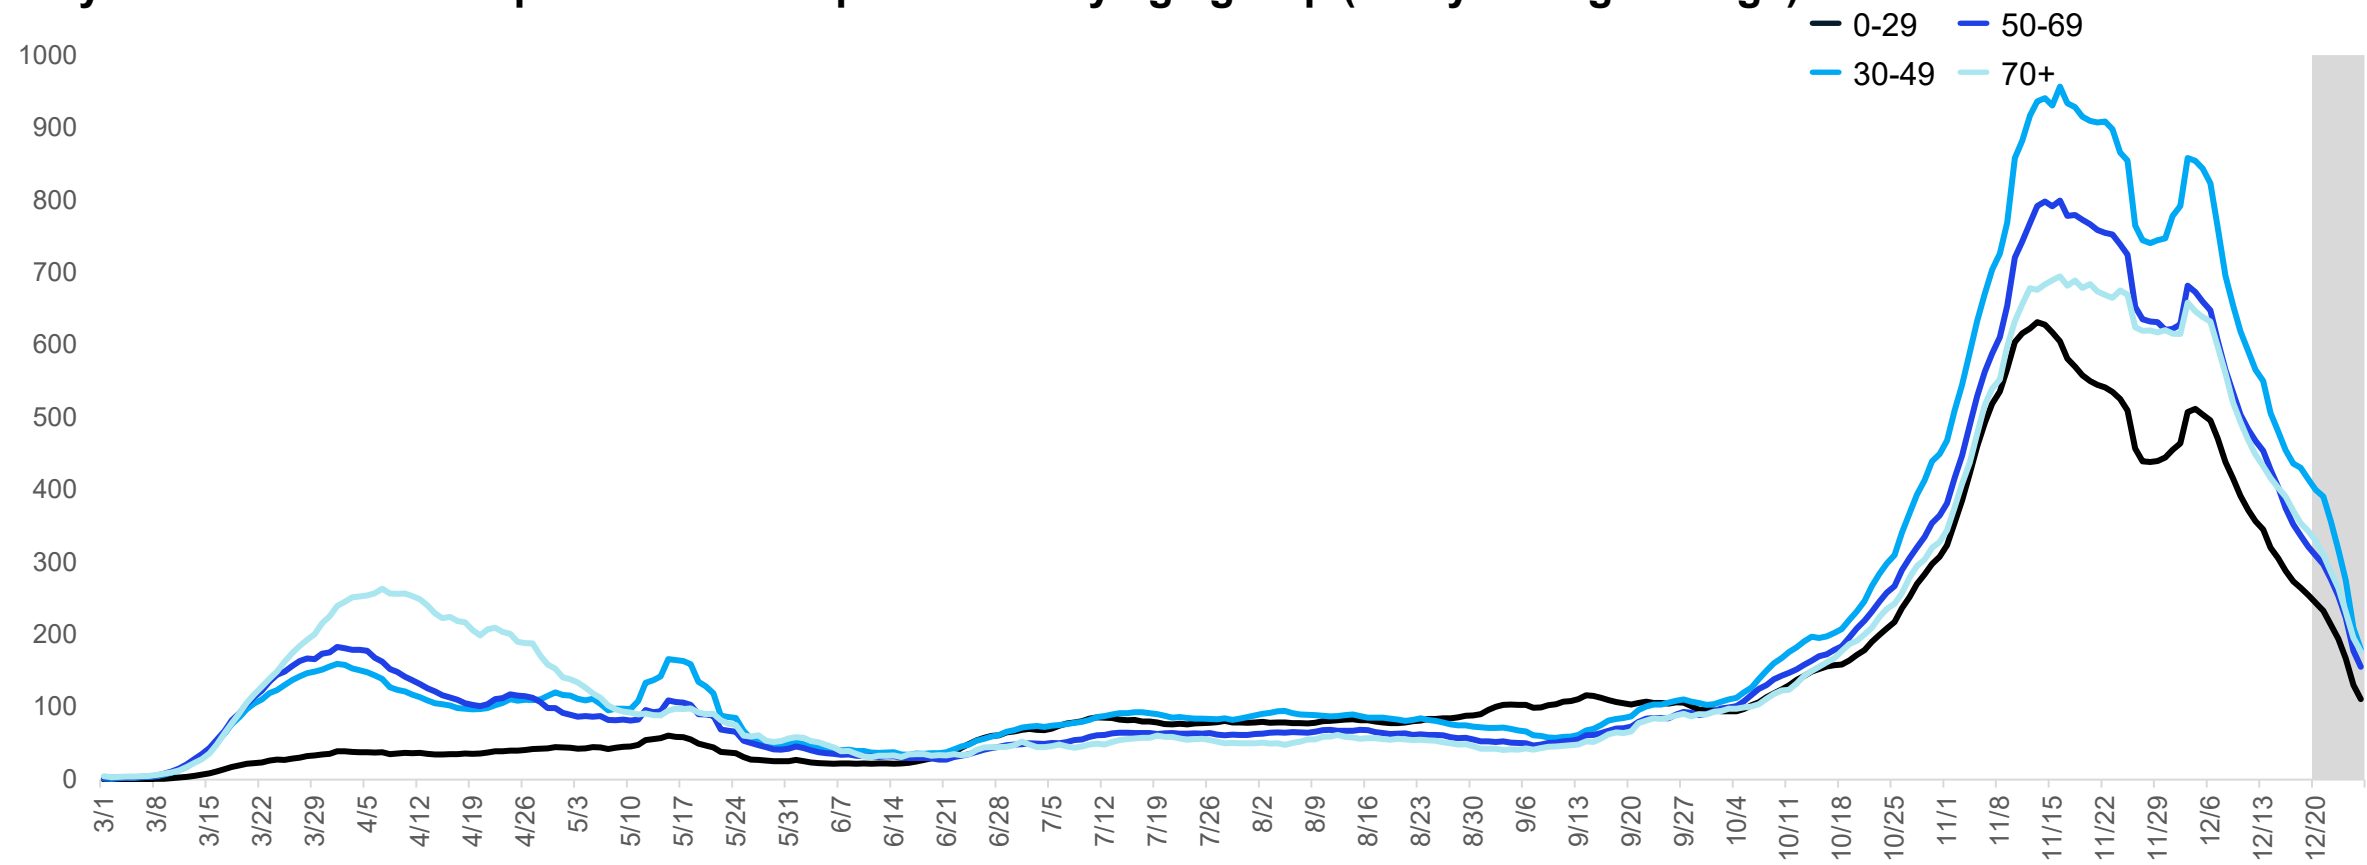

Updates since last week:

Cases have dropped for the fifth week in a row

Current daily case rate remains more than 3x the rate from early October, down from 5x times two weeks ago

Age group: average new daily cases

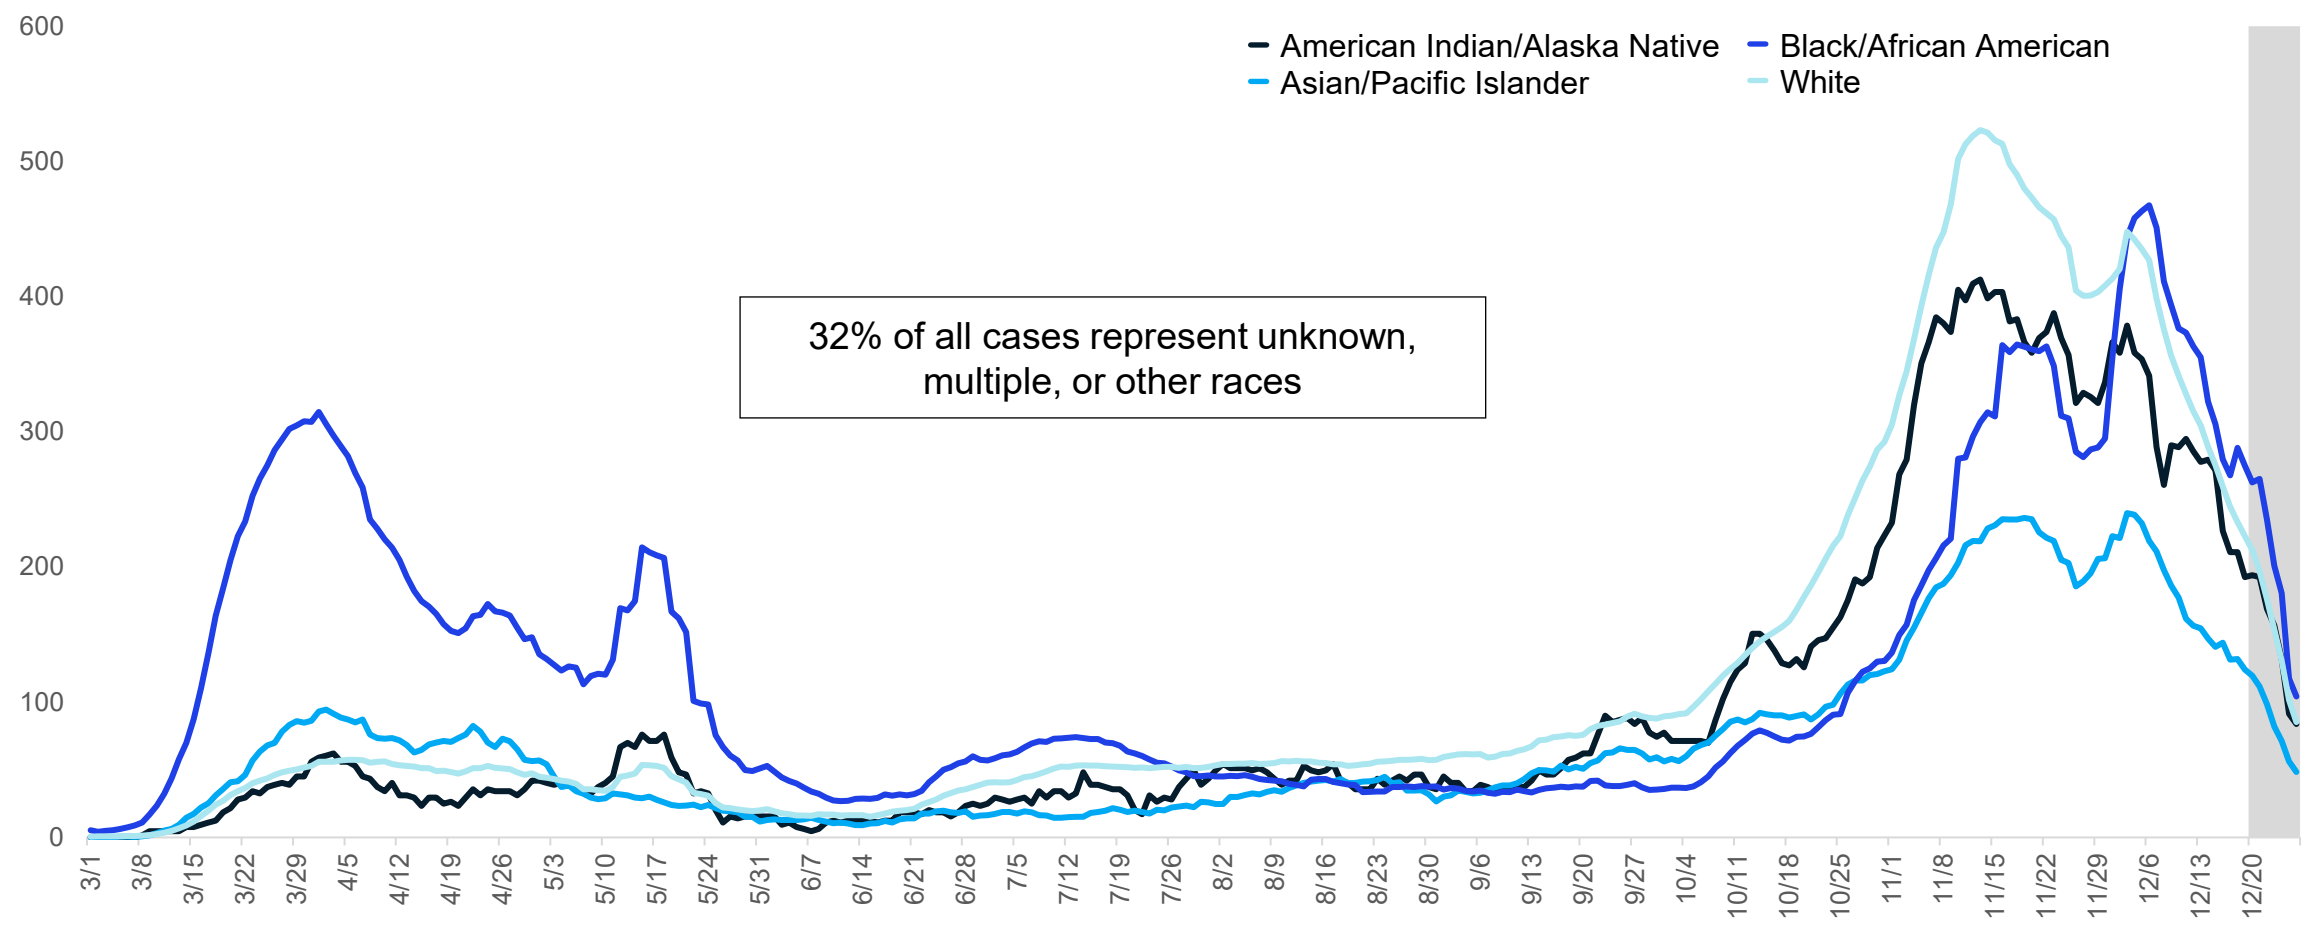

Daily new confirmed and probable cases per million by age group (7-day rolling average)

30-49 age group continues to have the highest cases per million, though cases per million have decreased for all age groups over the past 7 weeks

Average daily new cases per million people by race

Daily new confirmed and probable cases per million (7 day rolling average) by race category

Note: Cases information sourced from MDHHS and reflects date of onset of symptoms; note that Multiple Races, Other, and Unknown race/ethnicity are not included in calculations

Source: MDHHS – Michigan Disease Surveillance System

Average daily new cases per million people by ethnicity

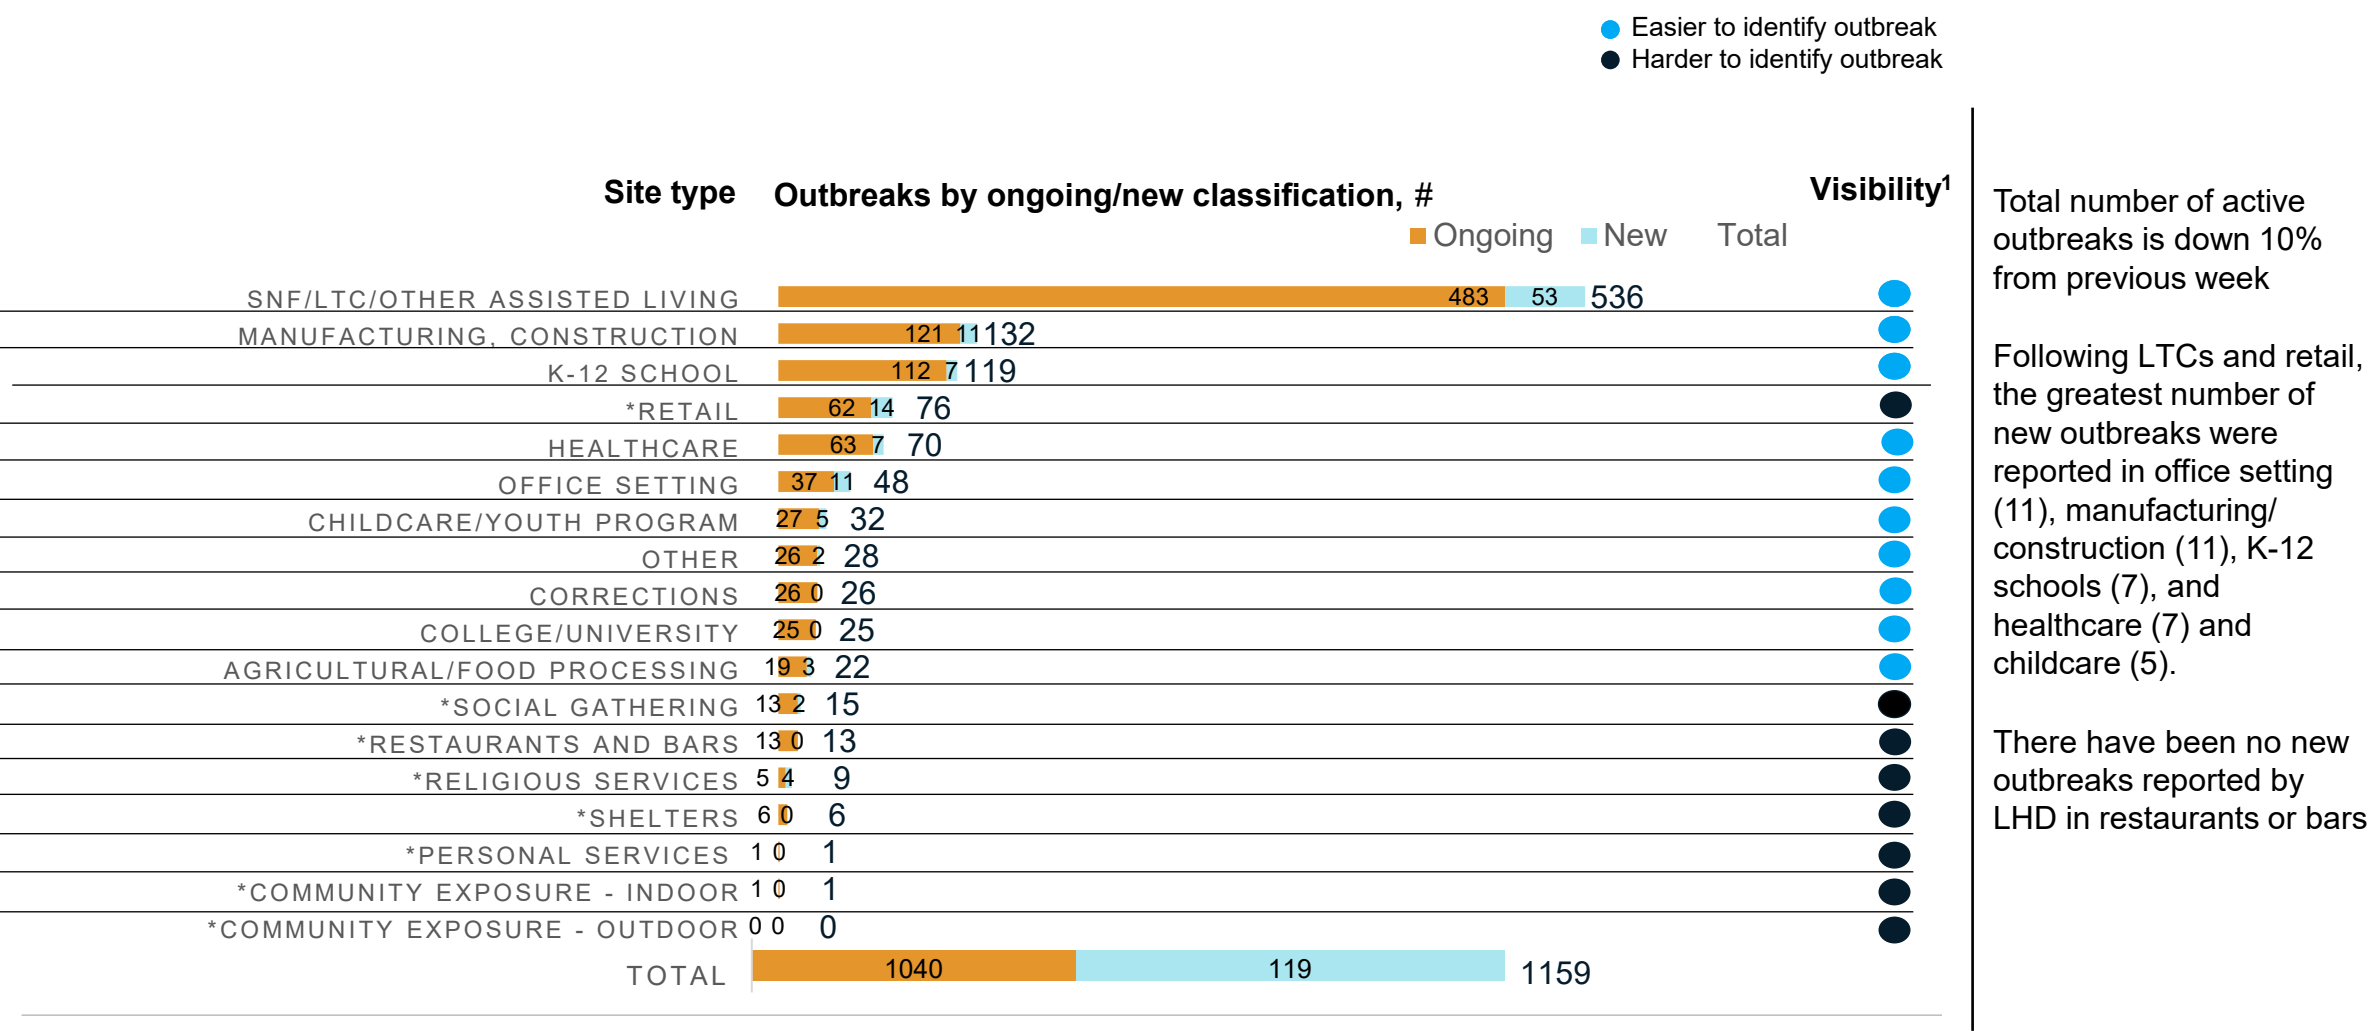

Daily new confirmed and probable cases per million (7 day rolling average) by ethnicity category

Note: Cases information sourced from MDHHS and reflects date of onset of symptoms; note that Multiple Races, Other, and Unknown race/ethnicity are not included in calculations

Source: MDHHS – Michigan Disease Surveillance System

Number of outbreak investigations by site type, week ending Dec 23

1. Based on a setting's level of control and the extent of time patrons/residents spend in the particular setting, different settings have differing levels of ability to ascertain whether a case derived from that setting

NOTE: Many factors, including the lack of ability to conduct effective contact tracing in certain settings, may result in significant underreporting of outbreaks. This chart does not provide a complete picture of outbreaks in Michigan and the absence of identified outbreaks in a particular setting in no way provides evidence that, in fact, that setting is not having outbreaks.

K-12 school outbreaks, recent and ongoing, week ending Dec 23

Number of reported outbreaks decreased since last week (142 to 119) including reductions in High School (48 to 40), Middle/Jr High (26 to 19), And Pre K-Elementary (57 to 49), with the number of Administrative outbreaks holding steady at 11

Region	Number of reported cases, #	# Ongoing - Excluding New	# New	Number of outbreaks	Range of cases per outbreak
Region 1	59 13			13	2-8
Region 2n	43 16			16	2-9
Region 2s	23 8			8	2-6
Region 3	172 30			30	2-18
Region 5	13 5			5	2-3
Region 6	575 35			35	2-79
Region 7	33 8			8	1-8
Region 8	37 4			4	2-11
Total	955 119			119	1-79

Grade level	Number of reported cases, #	# Ongoing - Excluding New	# New	Number of outbreaks	Range of cases per outbreak
Pre-school - elem.	221 15			49	1-18
Jr. high/middle school	122 7			19	2-16
High school	576 4			40	2-79
Administrative	25 1			11	2-6
Total	955 27			119	1-79

Many factors, including the lack of ability to conduct effective contact tracing in certain settings, may result in significant underreporting of outbreaks. This chart does not provide a complete picture of outbreaks in Michigan and the absence of identified outbreaks in a particular setting in no way provides evidence that, in fact, that setting is not having outbreaks.

COVID-19 and Healthcare Capacity and COVID Severity

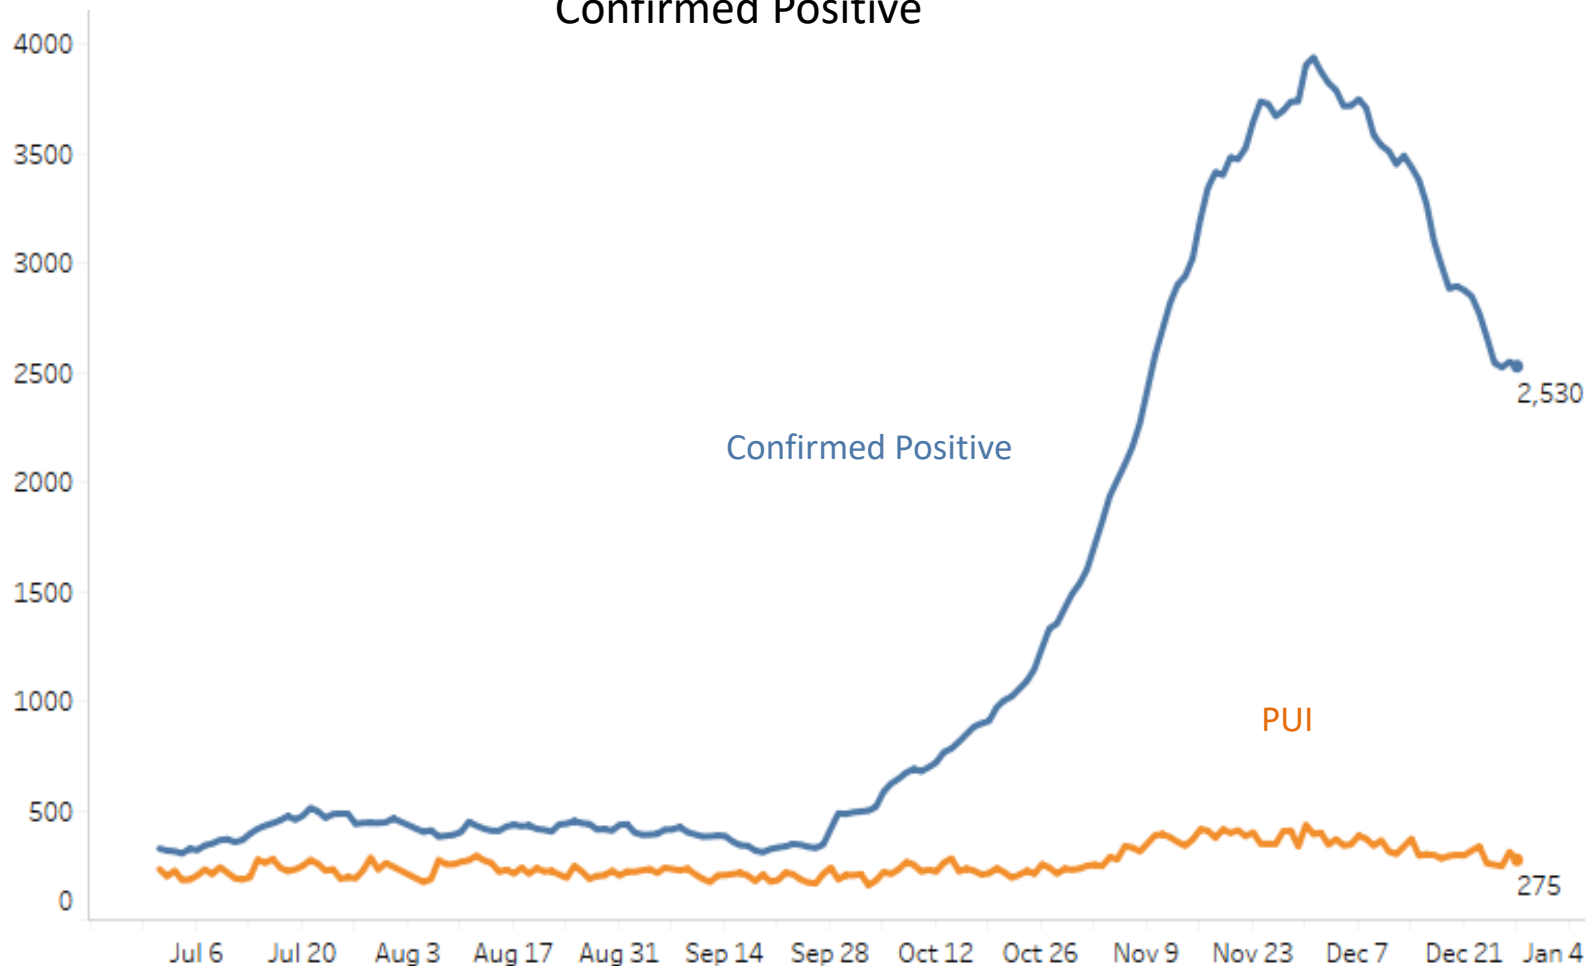

Hospitalizations and ICU utilization are decreasing

- Hospitalizations down 35% since December 1st peak
- ICU occupancy declined 7% over last week
- Only region 3 has >30% of Adult ICU beds with patients positive for COVID

Current deaths are a lagging indicator of cases, but the number of deaths is beginning to decline

Statewide Hospitalization Trends: Total COVID+ Census

Hospitalization Trends 7/1/2020 – 12/28/2020
Confirmed Positive

Hospital COVID+ census is down 12% from the previous week and down 35% from the December 1 peak.

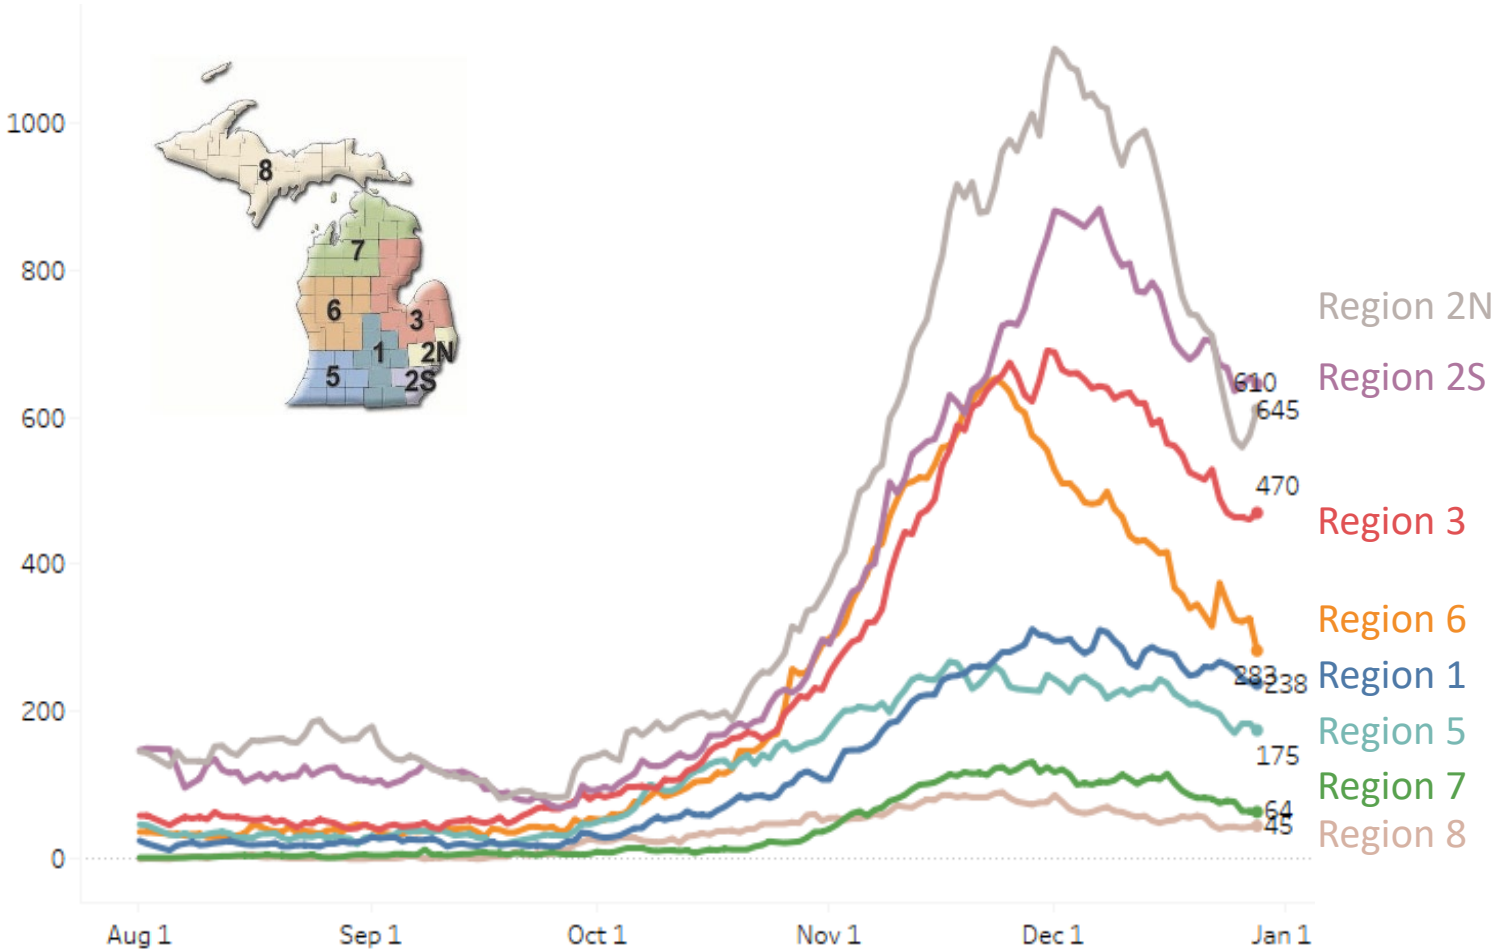

New COVID admissions are also down week over week

Hospitalized COVID Positive Long Term Trend (beginning March)

Statewide Hospitalization Trends: Regional COVID+ Census

Hospitalization Trends 8/1/2020 – 12/28/2020
Confirmed Positive by Region

All regions are showing decreasing trends in COVID+ hospitalizations

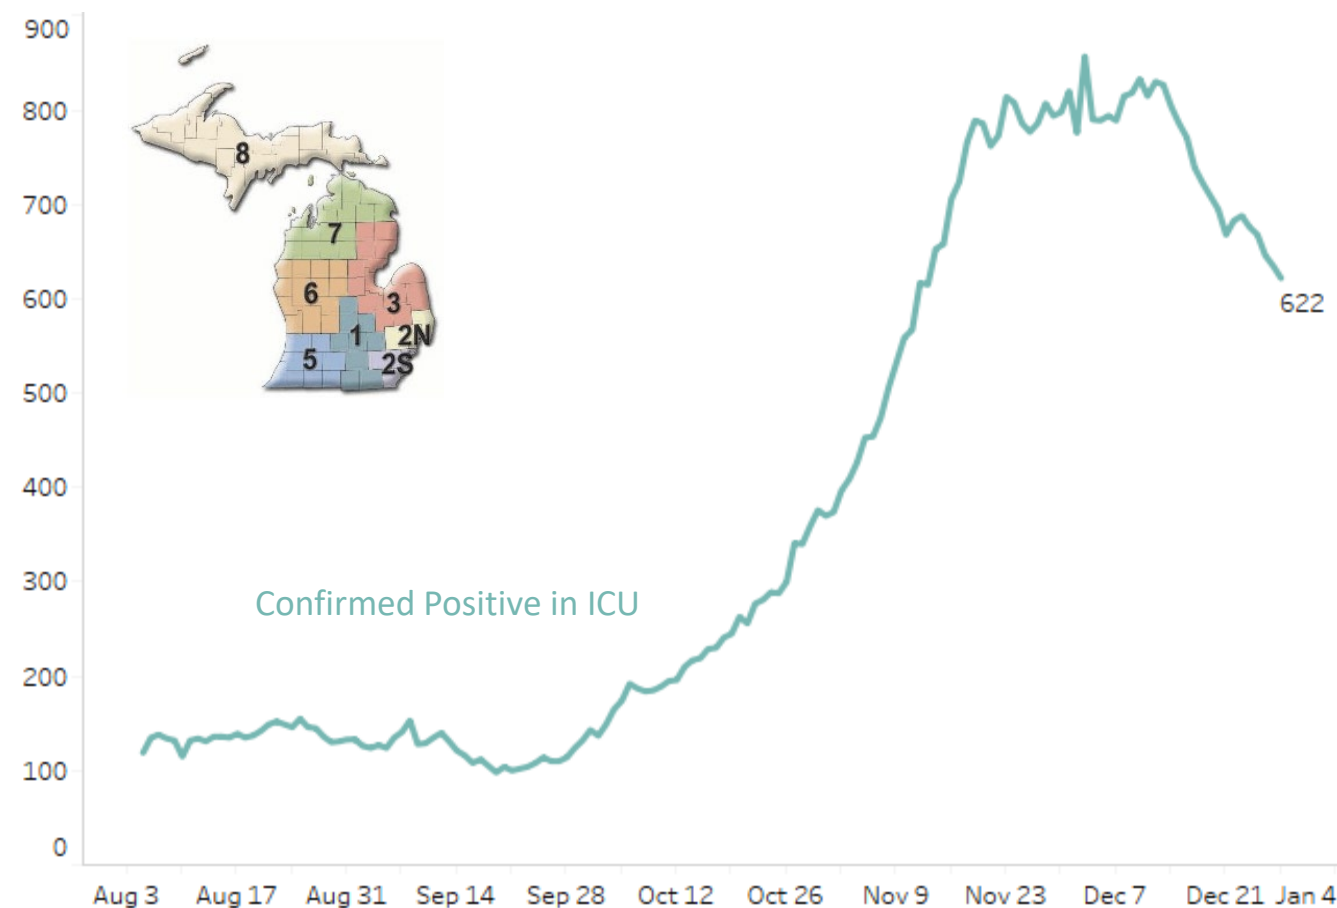

Region 7 and 8 showed largest percent decreases

Region 3 continues to be most impacted on a population adjusted basis

Region	Trend from Last Week	COVID+ Hospitalizations / MM
Region 1	-9%	220/M
Region 2N	-13%	275/M
Region 2S	-12%	290/M
Region 3	-9%	415/M
Region 5	-15%	184/M
Region 6	-15%	193/M
Region 7	-23%	128/M
Region 8	-17%	145/M

Statewide Hospitalization Trends: ICU COVID+ Census

Hospitalization Trends 8/1/2020 – 12/28/2020
Confirmed Positive in ICUs

COVID+ ICU Census has declined by 7% over the past week, with all regions showing declining trend except Region 6.

Only Region 3 continues to have >30% of ICU beds occupied by COVID+ patients

Region	Adult COVID+ in ICU (% Δ from last week)	Adult ICU Occupancy	% of Adult ICU beds COVID+
Region 1	56 (-7%)	84%	28%
Region 2N	118 (-13%)	79%	21%
Region 2S	171 (-6%)	86%	22%
Region 3	123 (-1%)	90%	33%
Region 5	34 (-13%)	86%	22%
Region 6	81 (+7%)	66%	22%
Region 7	27 (-33%)	72%	15%
Region 8	12 (0%)	65%	21%

Hospital bed capacity updated as of 12/23

COVID-19 deaths by date of death: State of Michigan

Cumulative confirmed and probable deaths, by date of onset of symptoms

New confirmed and probable deaths, by date of onset of symptoms

Updates since last week:

Although deaths are a lagging indicator of cases, the number of deaths has declined for one week

The current number of deaths is more than 8.5x the number of deaths in early October

Average and total new deaths, by age group

Daily new confirmed and probable deaths per million by age group (7 day rolling average)

Total new confirmed and probable deaths by age group (past 30 days, ending 12/26)

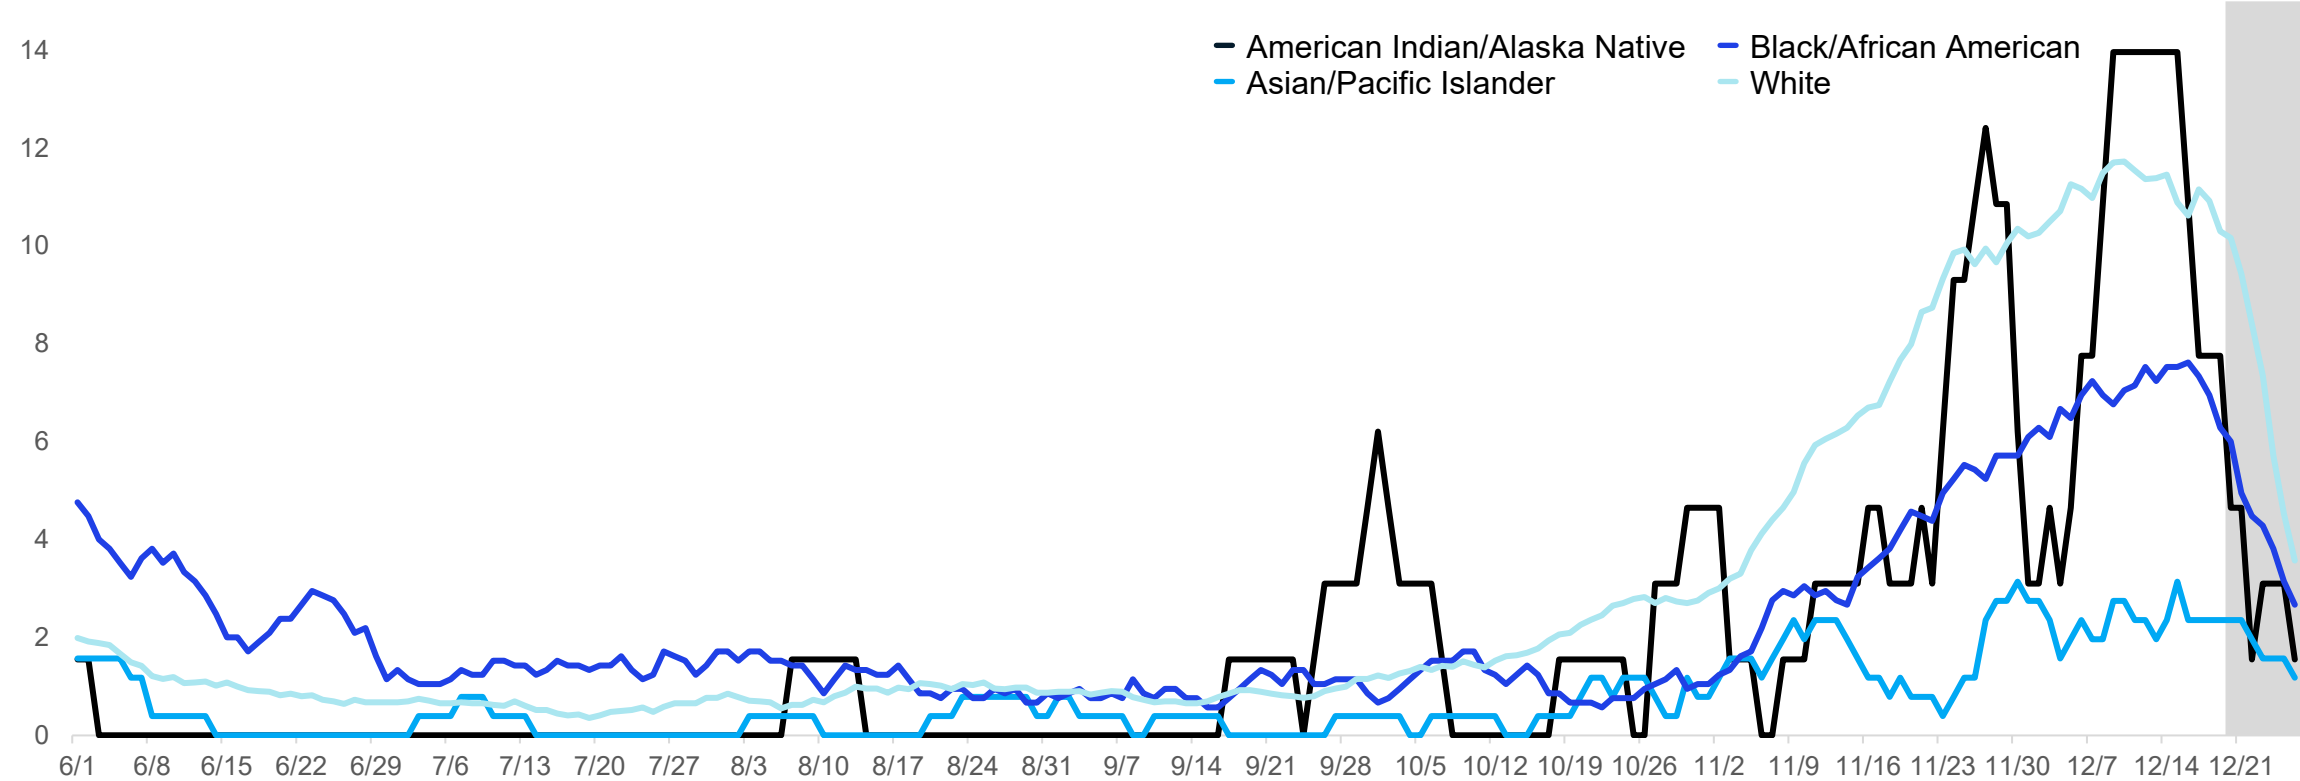

Note: Cases information sourced from MDHHS and reflects date of report

Source: MDHHS – Michigan Disease Surveillance System

Average daily new deaths per million people by race

Daily new confirmed and probable deaths per million (7 day rolling average)
By race category

Note: Multiple Races, Other, and Unknown race/ethnicity are not included in calculations
Source: MDHHS – Michigan Disease Surveillance System

Average daily new deaths per million people by ethnicity

Daily new confirmed and probable deaths per million (7 day rolling average)
By ethnicity

Note: Multiple Races, Other, and Unknown race/ethnicity are not included in calculations
Source: MDHHS – Michigan Disease Surveillance System

How is public health capacity?

Testing volume has declined to 45,255

- 16.0% are antigen tests
- Testing by county ranges from 1,600 to 6,700 daily tests per million residents

Compared to other states, Michigan has decreased in testing and testing per capita since last week

- Positivity has improved compared with other states

A higher percentage of case investigations are being completed

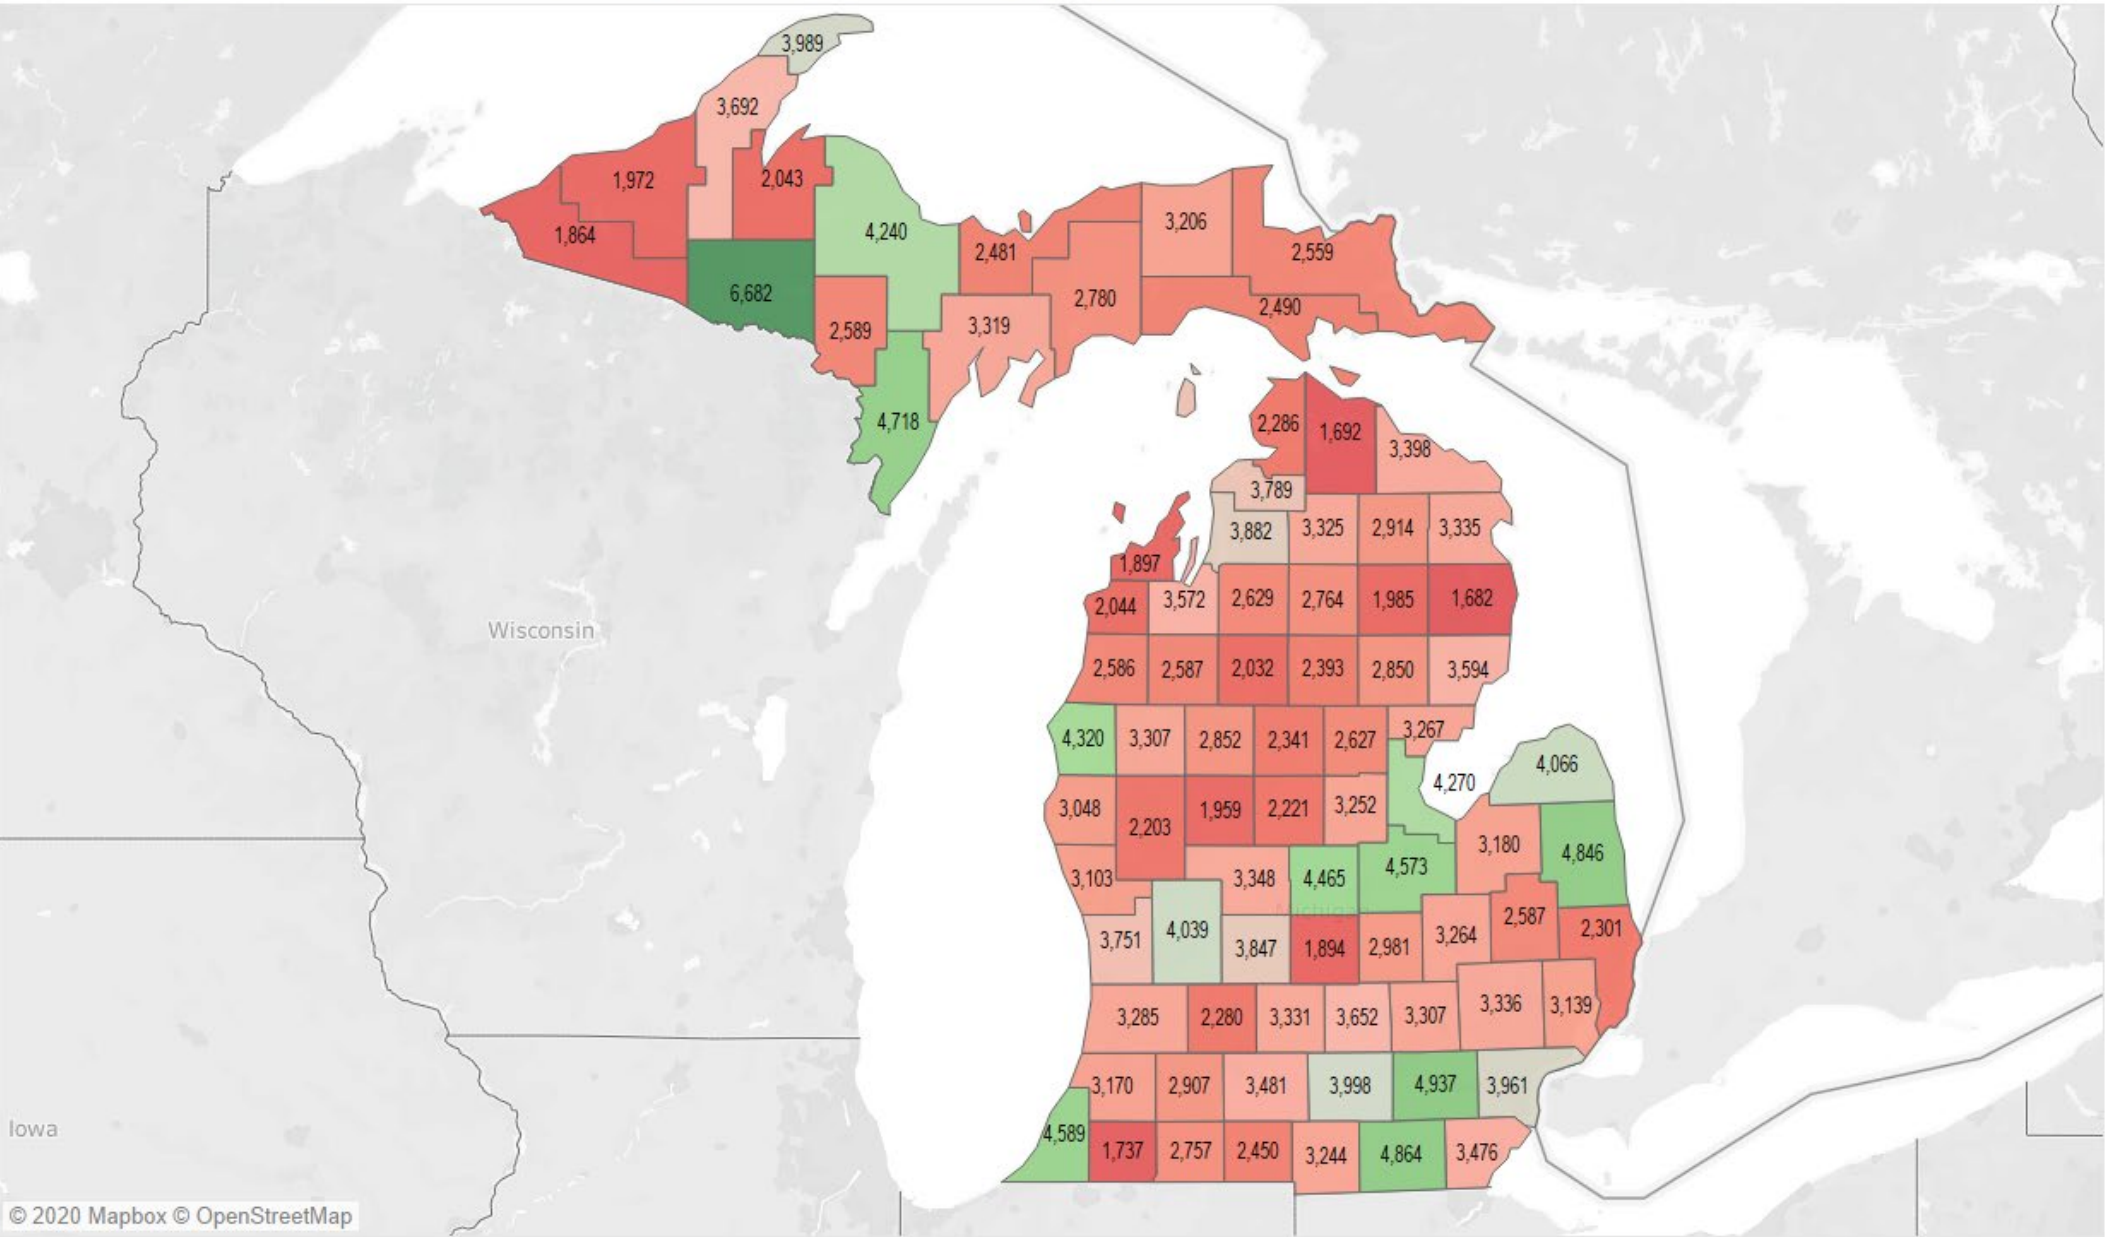

- Primarily attributed due to a decrease in number of cases

Daily diagnostic tests, by message date

New Case Investigation Metrics

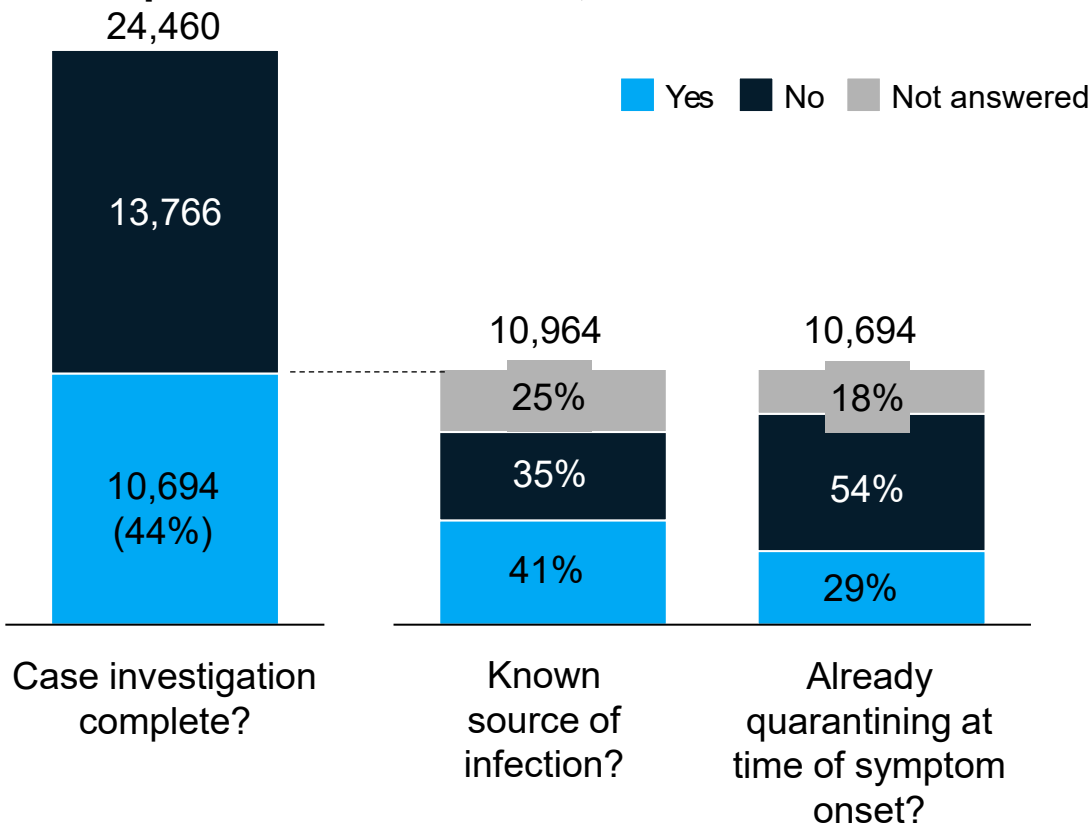

New Communicable Disease metrics slightly increased since last week:

- 43% of investigated cases having a known source (41% last week, 42% week prior)
- 28% of investigated cases noting that they were quarantining before symptoms (29% last week)

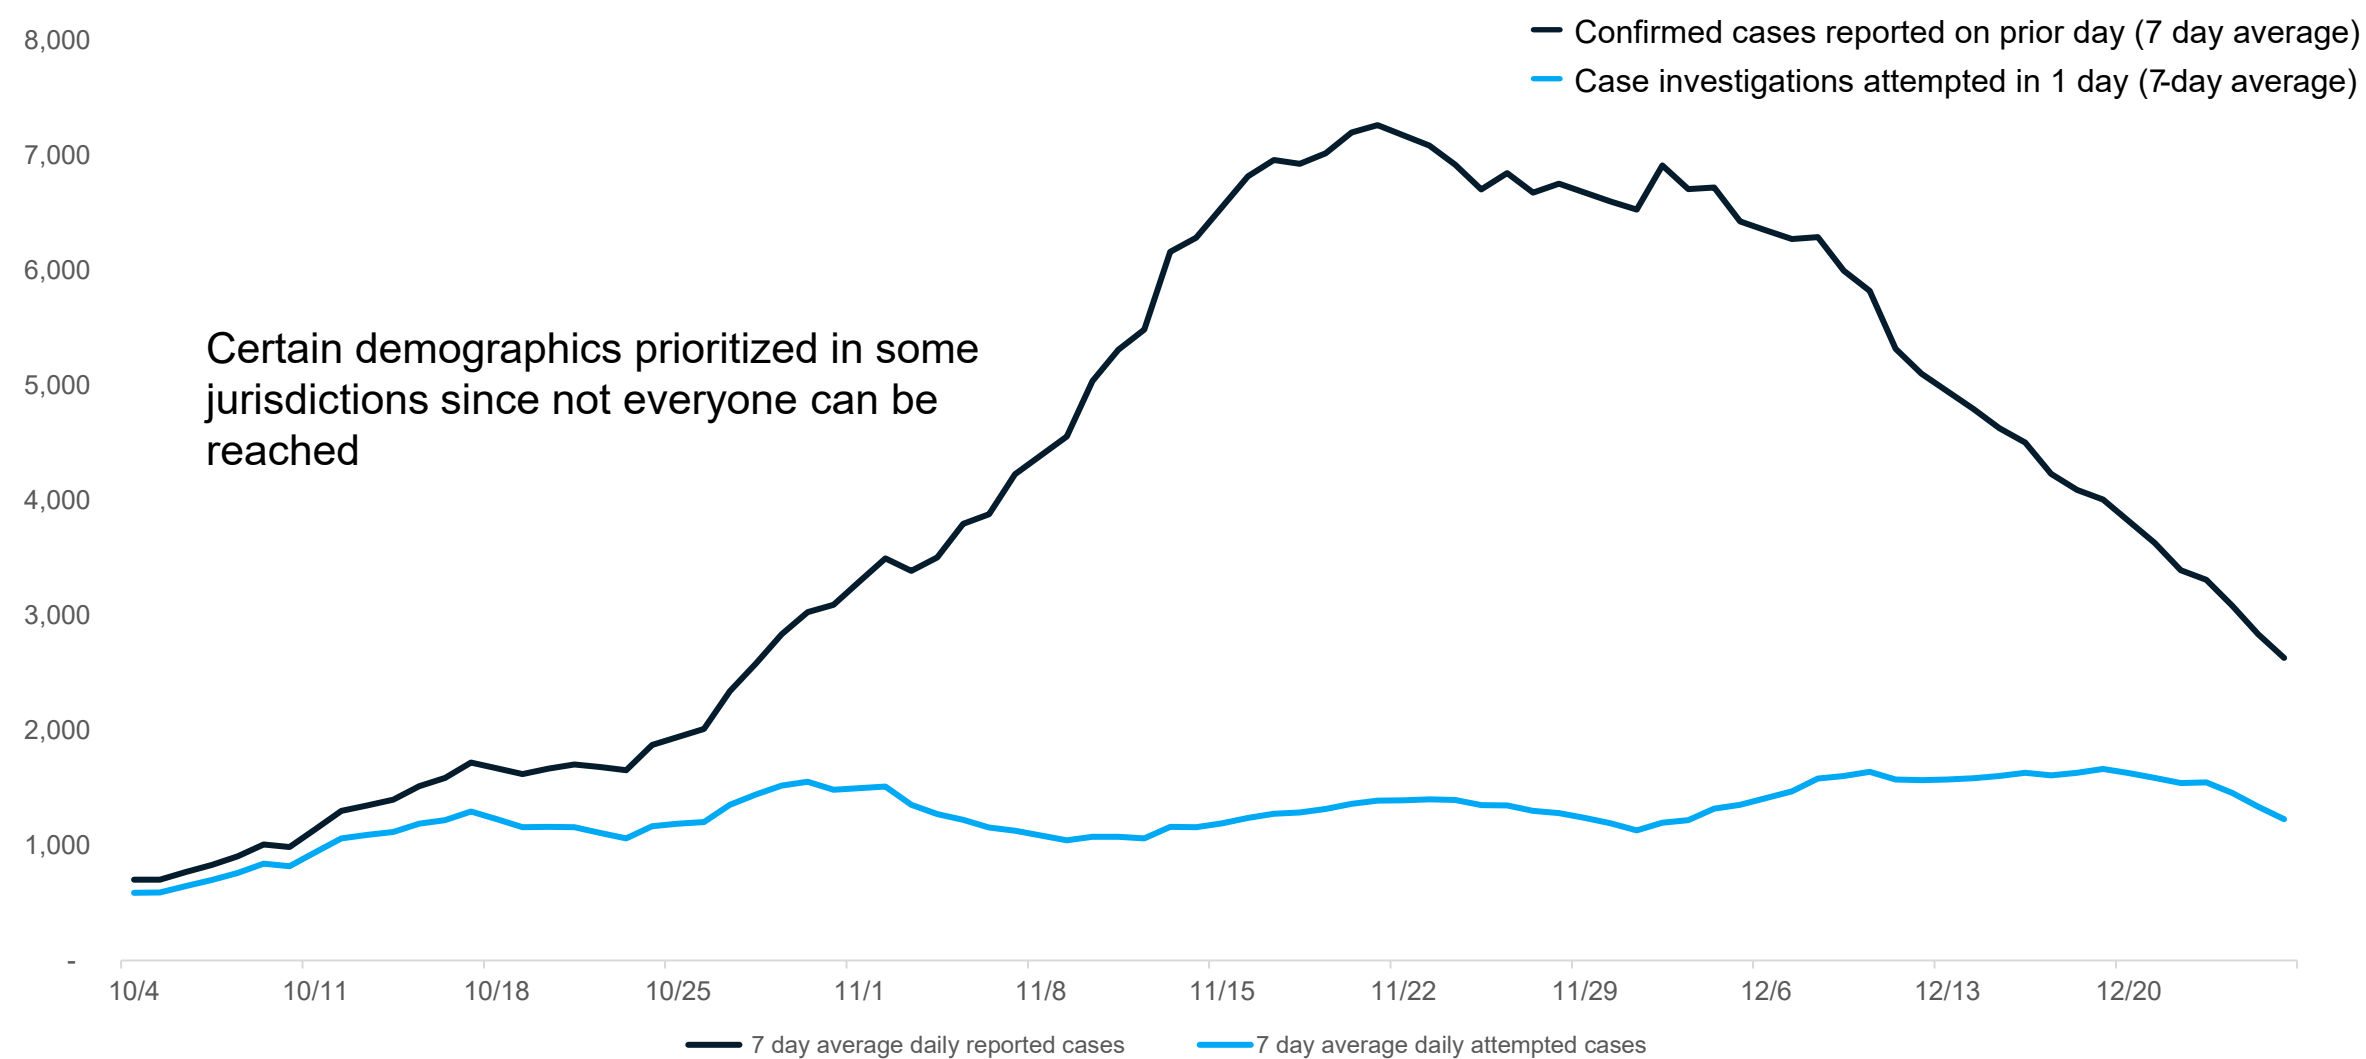

Case report form information, 12/19-12/25

Case report form information, 12/12-12/18

Cases vs. Attempted Case Investigations

Science Round Up

Mobility data show that Michiganders continue staying home

How many people are staying at home in Michigan?

- Stay-at-home levels increased in November
- Overall increase compared to 2019
- Stay-home levels stable (most recent data is 12/19)

Data Sources: [Bureau of Transportation Statistics](#),
MDHHS

Unacast mobility patterns show declines for MI

Decline has continued, although with a small uptick in the most recent data (data through 12/26)

Change in average mobility

Change in non-essential visits

Difference in encounter density
