Total Number of Mosquito Pools Tested	<b>1,359</b>
Total Number of Mosquitoes Tested	<b>29,379</b>
<a href="#">Human WNV cases</a>	<b>2</b>
Human California Group virus cases	<b>2</b>
<a href="#">WNV asymptomatic, viremic blood donor</a>	<b>3</b>
<a href="#">Equine/Other Animal WNV cases reported</a>	<b>0</b>
<a href="#">Avian WNV cases reported</a>	<b>11</b>
<a href="#">Human Eastern Equine Encephalitis cases reported</a>	<b>7</b>
<a href="#">Animal Eastern Equine Encephalitis cases reported</a>	<b>14</b>

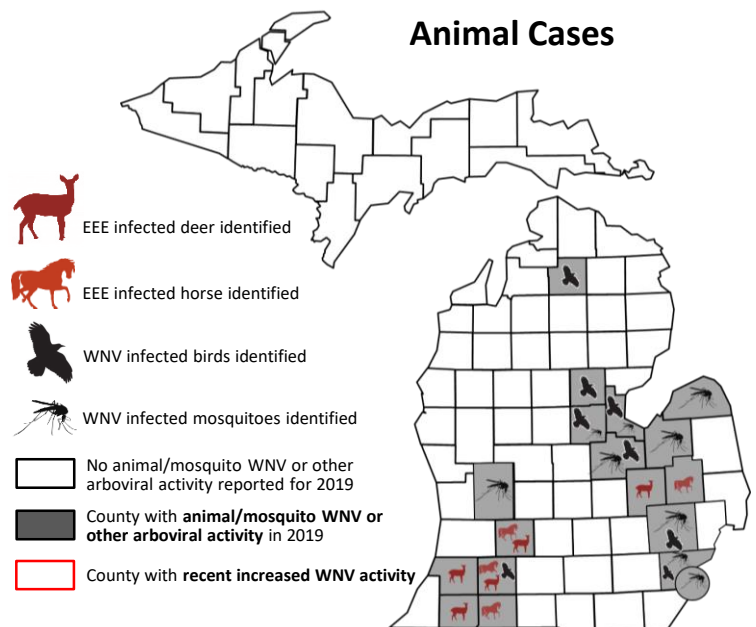

### Highlights

- This year, Eastern Equine encephalitis virus (EEE) infected 7 Michigan residents (1 Barry, 1 Berrien, 1 Cass, 3 Kalamazoo, and 1 Van Buren) with 3 fatalities. EEE has also infected animals including 9 horses (3 Kalamazoo, 3 St. Joseph, 2 Barry and 1 Lapeer) and 5 deer (1 Cass, 1 Barry, 1 Kalamazoo, 1 Genesee, and 1 Van Buren).
- Additionally, 2 Michigan residents (1 Genesee and 1 Washtenaw) were infected with a California group virus.
- West Nile virus (WNV) has sickened 2 Michigan residents (1 Genesee and 1 Wayne) and routine testing of the blood supply identified WNV in 4 Michigan blood donors (1 city of Detroit, 1 Kent, 1 Oakland, and 1 Ottawa).

# Preventing Mosquito Bites and Arboviruses: Tips for Michigan Residents

The most effective way to avoid arboviruses is to prevent mosquito bites. Be aware of the West Nile virus and other arbovirus activity in your area and take action to protect yourself and your family.

## *Use Insect Repellent*

Use Environmental Protection Agency (EPA)-registered insect repellents with one of the active ingredients below. When used as directed, EPA-registered insect repellents are proven safe and effective, even for pregnant and breastfeeding women.

- DEET
- Picaridin
- IR3535
- Oil of lemon eucalyptus (OLE) or para menthane-diol (PMD)
- 2-undecanone

Find the insect repellent that's right for you by using [EPA's search tool](#)

## *Tips for Babies & Children*

- Always follow instructions when applying insect repellent to children.
- Do not use insect repellent on babies younger than 2 months old.
- Do not apply insect repellent onto a child's hands, eyes, mouth, and cut or irritated skin.
  - Adults: Spray insect repellent onto your hands and then apply to a child's face.
- Do not use products containing oil of lemon eucalyptus (OLE) or para-menthane-diol (PMD) on children under 3 years old.

## *Take steps to control mosquitoes inside and outside your home*

- Use screens on windows and doors. Repair holes in screens to keep mosquitoes outside.
- Once a week, eliminate potential breeding areas for mosquitoes. Check inside and outside your home. Mosquitoes lay eggs on or near water:
  - Discard old tires, tin cans, ceramic pots or other containers that can hold water
  - Repair failed septic systems
  - Drill holes in the bottom of recycling containers left outdoors
  - Keep grass cut short and shrubbery trimmed
  - Clean clogged roof gutters, particularly if leaves tend to plug up the drains
  - Frequently replace the water in pet bowls
  - Flush ornamental fountains and birdbaths periodically; aerate ornamental pools, or stock them with predatory fish.
