

## Monroe Power Plant Environmental Controls Detroit Edison

Partnership Signing: September, 2007

As of March 31, 2014 this project has logged 8,198,802 hours and has gone 882 days without a lost time injury.

This is a \$600 million project that will span several years of work. The agreement is with DTE Energy, Washington Group Midwest LLC, Babcock and Wilcox Company, Hamon Custodis, Ideal Contracting, Michigan Building and Construction Trades Council and their affiliate unions, and subcontractors with their respective trade union employees.

**Implementation of Critical Lift Plan**

**Proper Rigging Techniques**

Innovative Best Practices/Safety Initiatives:
