Food, Nutrition and Health Tips from the Academy of Nutrition and Dietetics

20 Health Tips

1. Eat Breakfast

Start your day with a healthy breakfast that includes lean protein, whole grains, fruits and vegetables. Try making a breakfast burrito with scrambled eggs, low-fat cheese, salsa and a whole wheat tortilla or a parfait with low-fat plain yogurt, fruit and whole grain cereal.

2. Make Half Your Plate Fruits and Vegetables

Fruits and veggies add color, flavor and texture plus vitamins, minerals and dietary fiber to your plate. Make 2 cups of fruit and 2 ½ cups of vegetables your daily goal. Experiment with different types, including fresh, frozen and canned.

3. Watch Portion Sizes

Use half your plate for fruits and vegetables and the other half for grains and lean protein foods. Complete the meal with a serving of fat-free or low-fat milk or yogurt. Measuring cups may also help you compare your portions to the recommended serving size.

4. Be Active

Regular physical activity has many health benefits. Start by doing what exercise you can. Children and teens should get 60 or more minutes of physical activity per day, and adults at least two hours and 30 minutes per week. You don't have to hit the gym – take a walk after dinner or put on music and dance at home.

5. Get to Know Food Labels

Reading the Nutrition Facts panel can help you choose foods and drinks to meet your nutrient needs.

6. Fix Healthy Snacks

Healthy snacks can sustain your energy levels between meals, especially when they include a combination of foods. Choose from two or more of the MyPlate food groups: grains, fruits, vegetables, dairy, and protein. Try raw veggies with low-fat cottage cheese or hummus, or a tablespoon of nut or seed butter with an apple or banana.

7. Consult an RDN

Whether you want to lose weight, lower your health-risks or manage a chronic disease, consult the experts! Registered dietitian nutritionists can help you by providing sound, easy-to-follow personalized nutrition advice.

8. Follow Food Safety Guidelines

Reduce your chances of getting sick with proper food safety. This includes: regular hand washing, separating raw foods from ready-to-eat foods, cooking foods to the appropriate internal temperature, and refrigerating food promptly. Learn more about home food safety at www.homefoodsafety.org.

9. Drink More Water

Quench your thirst with water instead of drinks with added sugars. Stay hydrated and drink plenty of water, especially if you are active, an older adult or live or work in hot conditions.

10. Get Cooking

Preparing foods at home can be healthy, rewarding and cost-effective. Master some kitchen basics, like dicing onions or cooking dried beans.

11. Order Out without Ditching Goals

You can eat out and stick to your healthy eating plan! The key is to plan ahead, ask questions and choose foods carefully. Compare nutrition information, if available, and look for healthier options that are grilled, baked, broiled or steamed.

12. Enact Family Meal Time

Plan to eat as a family at least a few times each week. Set a regular mealtime. Turn off the TV, phones and other electronic devices to encourage mealtime talk. Get kids involved in meal planning and cooking and use this time to teach them about good nutrition.

13. Banish Brown Bag Boredom

Whether it's for work or school, prevent brown bag boredom with easy-to-make, healthy lunch ideas. Try a whole-wheat pita pocket with veggies and hummus or a low sodium vegetable soup with whole grain crackers or a salad of mixed greens with low-fat dressing and a hard boiled egg.

14. Reduce Added Sugars

Foods and drinks with added sugars can contribute empty calories and little or no nutrition. Review the new and improved Nutrition Facts Label or ingredients list to identify sources of added sugars.

15. Eat Seafood Twice a Week

Seafood – fish and shellfish – contains a range of nutrients including healthy omega-3 fats. Salmon, trout, oysters and sardines are higher in omega-3s and lower in mercury.

16. Explore New Foods and Flavors

Add more nutrition and eating pleasure by expanding your range of food choices. When shopping, make a point of selecting a fruit, vegetable or whole grain that's new to you or your family.

17. Experiment with Plant-Based Meals

Expand variety in your menus with budget-friendly meatless meals. Many recipes that use meat and poultry can be made without. Vegetables, beans, and lentils are all great substitutes. Try including one meatless meal per week to start.

18. Make an Effort to Reduce Food Waste

Check out what foods you have on hand before stocking up at the grocery store. Plan meals based on leftovers and only buy perishable foods you will use or freeze within a couple of days. Managing these food resources at home can help save nutrients and money.

19. Slow Down at Mealtime

Instead of eating on the run, try sitting down and focusing on the food you're about to eat. Dedicating time to enjoy the taste and textures of foods can have a positive effect on your food intake.

20. Supplement with Caution

Choose foods first for your nutrition needs. A dietary supplement may be necessary when nutrient requirements can't be met or there is a confirmed deficiency. If you're considering a vitamin, mineral or herbal supplement, be sure to discuss safe and appropriate options with an RDN or another healthcare provider before taking.

20 Ways to Enjoy More Fruits & Vegetables

Building a healthy plate is easy when you make half your plate fruits and vegetables. It's also a great way to add color, flavor and texture plus vitamins, minerals and dietary fiber. Make 2 cups of fruit and 2 ½ cups of vegetables your daily goal. Try the following tips to enjoy more fruits and vegetables every day.

1. Variety abounds when using vegetables as pizza topping. Try broccoli, spinach, green peppers, tomatoes, mushrooms and zucchini.
2. Mix up a breakfast smoothie made with low-fat milk, and frozen fruit - try strawberries and banana, or mango with pineapple or peach.
3. Make a veggie wrap with roasted vegetables and low-fat cheese rolled in a whole-wheat tortilla.
4. Try crunchy vegetables instead of chips with your favorite low-fat salad dressing for dipping.
5. Grill colorful vegetable kabobs packed with tomatoes, green and red peppers, mushrooms and onions.
6. Add color to salads with baby carrots, grape tomatoes, spinach leaves or mandarin oranges.*
7. Keep cut vegetables handy for mid-afternoon snacks, side dishes, lunch box additions or a quick nibble while waiting for dinner. Ready-to-eat favorites: red, green or yellow peppers, broccoli or cauliflower florets, carrots, celery sticks, cucumbers, snap peas or whole radishes.
8. Place colorful fruit where everyone can easily grab something for a snack-on-the-run. Keep a bowl of fresh, just ripe whole fruit in the center of your kitchen or dining table.
9. Get saucy with fruit. Puree apples, berries, peaches or pears in a blender for a thick, sweet sauce on grilled or broiled seafood or poultry, or on pancakes, French toast or waffles.

10. Stuff an omelet with vegetables. Turn any omelet into a hearty meal with broccoli, squash, carrots, peppers, tomatoes or onions with low-fat sharp cheddar cheese.
11. "Sandwich" in fruits and vegetables. Add pizzazz to sandwiches with sliced pineapple, apple, peppers, cucumber and tomato as fillings. Add raw or cooked veggies to tacos on whole-grain corn tortillas and whole wheat wraps.
12. Wake up to fruit. Make a habit of adding fruit to your morning oatmeal, ready-to-eat cereal, yogurt or toaster waffle.
13. Top a baked potato with beans and salsa or broccoli and low-fat cheese.
14. Microwave a cup of vegetable soup as a snack or with a sandwich for lunch.
15. Add grated, shredded or chopped vegetables such as zucchini, spinach, eggplant and carrots to pasta dishes, casseroles, curries, soups, and stews.
16. Make fruit your dessert: Slice a banana lengthwise and top with a scoop of low-fat frozen yogurt. Sprinkle with a tablespoon of chopped nuts.
17. Stock your freezer with frozen vegetables to steam or stir-fry for a quick side dish.
18. Make your main dish a salad of dark, leafy greens and other colorful vegetables. Add chickpeas or edamame (fresh soybeans). Top with low-fat dressing.*
19. Fruit on the grill: Make kabobs with pineapple, peaches and banana. Grill on low heat until fruit is hot and slightly golden.
20. Dip: Whole wheat pita wedges in hummus, baked tortilla chips in salsa, strawberries or apple slices in low-fat yogurt, or graham crackers in applesauce.

Eat Right

Food, Nutrition and Health Tips from the Academy of Nutrition and Dietetics

Eating Right on a Budget

Getting the most nutrition for your food budget starts with a little extra planning before you shop. There are many ways to save money on the foods that you eat. Here are some budget-friendly tips for eating right.

Cook more, eat out less

Eating out can be expensive. Many foods can be prepared for less money (and more healthfully) at home. Pre-packaged foods, like frozen dinners and packaged pasta or rice mixes can also add up when you calculate the cost per serving. Find a few simple, healthy recipes your family enjoys and save eating out for special occasions.

Plan what you're going to eat

Deciding on meals and snacks before you shop can save both time and money. Review recipes and make a grocery list of what ingredients are needed, then check to see what foods you already have and make a list for what you still need to buy. When shopping with a list you will be less likely to buy things that are not on it. To "Create a Grocery Game Plan", visit www.MyPlate.gov.

Decide how much to make or buy

Making a large batch by doubling a recipe will save time in the kitchen later on. Extra portions can be used for lunches or meals later in the week, or frozen as leftovers in individual containers for future use. Plus, purchasing ingredients in bulk is often cheaper.

Determine where to shop

Check the local newspaper and online or at the store for sales and coupons, especially when it comes to more expensive ingredients, such as meat and seafood. While at the store, compare prices of different brands and different sizes of the same brand to see which has a lower unit price. The unit price is usually located on the shelf directly below the product.

Shop for foods that are in season

Fresh fruits and vegetables that are in season are usually easier to get and may be less expensive. Frozen and canned produce are also good options and may be more affordable at certain times of the year. Look for fruit that is canned in 100% juice or water and canned vegetables that are labeled "low in sodium" or "no salt added".

Watch portion sizes

Eating too much of even lower cost foods and beverages can add up to extra dollars and calories. Use smaller plates, bowls and glasses to help keep portions under control. Fill half your plate with fruits and vegetables and the other half with grains and protein foods such as lean meat, poultry, seafood or beans. This is an easy way to eat a balanced meal while controlling portions and cost. To complete the meal, add a glass of fat-free or low-fat milk or a serving of fat-free yogurt for dessert.

Focus on nutritious, low-cost foods

Certain foods tend to be less expensive than others. Make the most of your food dollars by finding recipes that use the following ingredients: beans, peas, and lentils; sweet or white potatoes; eggs; peanut butter; canned salmon, tuna or crabmeat; grains such as oats, brown rice, barley or quinoa; and frozen or canned fruits and vegetables.

Make your own healthy snacks

Convenience costs money. Many snacks, even healthy ones, usually cost more when sold individually. Make your own snacks by purchasing large tubs of low-fat yogurt or cottage cheese and dividing them into smaller containers. For trail mix, combine unsalted nuts, dried fruit and whole grain pretzels or cereal; store small portions in airtight containers. Air-popped popcorn and whole fresh fruits in season also tend to cost less compared to pre-packaged items.

Start a garden or visit a Farmers Market

A garden can be a lot of fun, especially for kids. It's also an affordable way to eat more fruits and vegetables. Plants can be started from seed or purchased at a low price.

Another way to increase your family's variety of produce is to visit a farmers market. Locally grown fruits and vegetables are often available for less money than at the grocery store. Check and see where the closest farmers market is in your area.

Quench your thirst with water

Water from the tap is a low cost way to stay hydrated. Substituting plain water in place of sweetened beverages not only saves you money but may also help you reduce extra calories from added sugars.
