2024 Michigan State Police
Crime Clearance and
Crime Count Comparison Report

Data contained within this report represents crime reported by the Michigan State Police to the Michigan Incident Crime Reporting (MICR) Program as of March 1, 2025.

The "Total Arrests" and "Except. Clear." columns indicate the number of incidents in the "Total Incidents" column that were cleared by arrest or by exceptional clearance.

The clearance rate is determined by summing total incidents with arrests and total incidents involving exceptional clearances and dividing by total incidents. The Total Arrests column in the tables below represents total incidents with at least one reported arrest.

The Crime Count percent change is calculated using the formula: (2024 Crime Count – 2023 Crime Count) / 2023 Crime Count X 100.

Starting in 2021, updated previous year clearance rates are being provided to compare to current year clearance rates. The 2023 clearance rates in this report have been updated to include all data submitted for 2023 incidents through March 1, 2025, to account for criminal incidents that were cleared by arrests or exceptional clearances after the data deadline for last year's report (March 1, 2024). Users should be aware that because criminal incidents that occurred in 2023 have had an additional year to be investigated to the point of arrest or exceptional clearance compared to 2024 incidents, 2023 clearance rates may automatically be higher in some areas. Using updated numbers, the 2023 clearance rate increased 5.9 percentage points. A similar increase is expected for the 2024 clearance rates when the 2025 report is created.

MICR Offense – Crimes Against Person	Total Victims	Total Offenses	Total Incidents	Total Arrests	Except. Clear.	2-Year Clear. Rate Comparison		2-Year Crime Count Comparison

*Official MICR Crime Counts use the following logic: for Crimes Against Persons, Victim Counts are used based on an offense hierarchy where only the most serious offense per victim is counted; for any other crimes, Offense Counts are used except for three file classes. Crime Counts for MICR 22001 and 22002 (Burglary) are determined by the total premises entered during the commission of those offenses. Crime Counts for MICR 24001 (Motor Vehicle Theft) are determined by the sum of the total attempted motor vehicle thefts and the total vehicles stolen.
